

VOLUME 3

**MEMBER OF PUBLIC
SPATIAL STRATEGY**

Title: Do you have any comments to make on the spatial strategy?

ID	Comment	Summary of changes being sought/proposed	Council response
687	<p>There has not been any improvement on the current infrastructure especially transport networks and maintenance of roads, pavements, public footpaths. An increase in traffic and pedestrians in the area is a disaster waiting to happen. The A48 is impossible to cross at peak periods there are no penalties for those not observing the reduced speed limits. There are several footpaths crossing A48 and those on the South side need to cross to get to schools, retail, leisure and work an increase in housing and 3 schools will Cleary exacerbate the situation with most homeowners now averaging 2 cars and the parents, staff, taxis and buses required to transport children to the schools especially those with special needs in Heronsbridge</p>	<p>Concerns regarding infrastructure / A48</p>	<p>Comments noted. In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of traffic, the proposed allocations (PLA2: Land South of Bridgend (Island Farm) / COM1(2) Craig y Parcau) are supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will</p>

			<p>be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p>
699	None.		Comments noted.
723	Bridgend has more than enough housing, we need to retain the green areas. Building more housing is just going to add to problems, the infrastructure for more housing is not available. It is difficult enough to get a doctors appointment as it is. Schools are over subscribed.	Concerns with housing / infrastructure	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
752	<p>I absolutely disagree with the proposal of putting extra housing on Island Farm. We simply do NOT have adequate infrastructure to support such a large housing estate. All the local schools are way over full and so are the Doctor surgeries. MerthyrMawr Road is so busy now and this will only get worse. Increased traffic will automatically be detrimental to the air quality overall. The only people who will benefit here are the developers, who are only interested in profit. Shameful that the LDP are even considering this proposal.</p>	<p>Concerns regarding Strategic Allocation PLA2: Island Farm</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as</p>

			<p>Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of education, Policy PLA2 will require 1.8 hectares of land to accommodate a minimum one form entry primary school and a financial contribution to nursery and primary school provision as required by the Local Education Authority. The financial contribution (including timing and phasing thereof) must be secured through Section 106 Planning Obligations in accordance with the Education Facilities and Residential Development SPG. The school must be accessible to new and existing residents by all travel modes, enabled by the development.</p> <p>In terms of health facilities, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working</p>
--	--	--	--

			<p>relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-</p>

			<p>designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p>
777	<p>Traffic is not the only issue, there are natural habitats, protected buildings, and history that should be protected and enjoyed by visitors coming to see the areas. The reason Merthyr Mawr is enjoyed because it's secluded. Children and animals have the freedom without the worry of increased traffic in the area. Why can't natural habitats and historical sites be enjoyed in natural surroundings with some countryside. For the amount of employment in the science park compared to the amount of homes that will go there, it doesn't make sense.</p>	<p>Concerns regarding Merthyr Mawr</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's</p>

			<p>success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In relation to nature/biodiversity, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health. For development to be sustainable, it needs to be soundly based on good environmental assessments, and to be well planned and controlled with regard to its environmental impact, in order to conserve and enhance biodiversity.</p> <p>There is clear guidance and legislation with regard to the protection of species and habitats recognised in legislation, Planning Policy Wales (PPW) and TAN5 Nature Conservation and Planning. The most relevant statutory requirements are set out in Section 61 of the Planning and Compulsory Purchase Act 2004, the Conservation of Habitats and Species Regulations 2017, Environment (Wales) Act 2016 Section 6 Biodiversity and Resilience of Ecosystems Duty and Section 7 Priority Habitats and Species, Section 11 of the Countryside Act 1981 and Section 28G of the Wildlife and Countryside Act 1981. Annex 1 of TAN5 lists all the other relevant legislation.</p> <p>To comply with the Environment (Wales) Act 2016 (Section 6 Duty) the LDP Strategy will seek to enhance the biodiversity and resilience of the County Borough's ecosystems through native species landscaping, careful location of development, the creation of green corridors, and open space management. It is important that</p>
--	--	--	---

			<p>biodiversity and resilience considerations are taken into account at an early stage in both development plan preparation and when proposing or considering development proposals. All reasonable steps must be taken to maintain and enhance biodiversity and promote the resilience of ecosystems and these should be balanced with the wider social needs of local communities. Only in exceptional circumstances, where it is in the public interest, will new development be located where it may have an adverse impact on sites designated for their importance for nature conservation. Robust mitigation and compensation will be provided wherever this situation is unavoidable, in line with considered advice from statutory and advisory organisations.</p> <p>The Environment Act (Section 6) sets out a framework for planning authorities to maintain and enhance biodiversity to provide a net benefit for biodiversity through a proactive and resilient approach. Policies SP17 and DNP6 of the LDP set the framework to deliver on this premise, as set out in Policy 9 (NDF). Policy DNP6 (LDP) will be revised to ensure it is based on a net benefit approach to achieve these outcomes.</p> <p>It is acknowledged that Strategic Allocation PLA2: Land South of Bridgend (Island Farm) contains a Site of Importance for Nature Conservation (SINC) (The Island Farm POW Camp) of which covers 14.03 hectares of land within the allocated site. PPW identifies SINC's as local non-statutory protected sites. Paragraph 6.4.20 states that 'Although non-statutory designations carry less weight than statutory designations, they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection in development plans and the development management process.'</p> <p>Existing Consent</p> <p>In relation to Strategic Allocation PLA2: Land South of Bridgend (Island Farm), development has already lawfully commenced on this site. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved 'Green Bridge'. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of 'enabling works' that had been approved under P/14/354/RES and P/14/824/RES. These 'enabling works' are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive;
--	--	--	--

			<ul style="list-style-type: none"> Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a 'commencement of development' triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the 'enabling works' constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council's opinion is that the permissions are extant.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a 'green lung' that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. A final masterplan must be prepared and agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will need to demonstrate how the development will create a well-connected, sustainable mixed-use urban extension to Bridgend, comprising a number of character areas that integrate positively with the existing landscape, SINC, adjacent Grade II* listed Merthyr Mawr House, existing housing clusters, community facilities, Active Travel Networks and public transport facilities. An illustrative masterplan will also be included in the final version of the Replacement LDP to enable all parties to understand how the site will be developed in broad terms, including proposed land uses, access, infrastructure requirements, constraints and areas of protection. This masterplan will clearly identify the location of the SINC in the context of the wider allocation.</p> <p>Ecological mitigation measures already implemented</p> <p>As part of the existing consent, a mitigation strategy was produced in 2009 to offset the impacts of the development. It was proposed that the SINC and south west field would become a wildlife conservation area within the new development. Surveys at the site found dormice <i>Muscardinus avellanarius</i> to be present, both within the woodland and scrub in the SINC and in the hedgerows of the agricultural fields. These areas are also known to be used by bats for foraging and commuting purposes, and the SINC area contains a roost site for lesser horseshoe bats <i>Rhinolophus hipposideros</i> and brown long-eared bats <i>Plecotus auritis</i>.</p> <p>As part of the development process some areas of these habitats were to be lost, and modification to the remaining areas due to the impacts of the development, including noise and light spillage. Part of the mitigation strategy to counter these losses included the creation of new habitats suitable for the relevant species. As such, habitat design was guided by the requirements of the protected species of which had the potential to utilise the site. In addition to dormice and bats, a further condition of the existing consent required the habitat requirements of Great Crested Newts <i>Triturus cristatus</i> to be taking into account.</p>
--	--	--	--

			<p>The habitat design for the consented scheme included:</p> <ul style="list-style-type: none"> • Tree and Scrub Planting: translocation and planting new trees and scrub in the south-west field, providing an alternative for displaced animals, including dormice, bats, and shelter for reptiles and amphibians. • Hedgerow Enhancement: enhancement and translocation of hedgerows from the centre of the site to the eastern site boundary has been undertaken, to create continuous hedge lines which help to buffer the expanded SINC site, and to filter out noise and light from development. Additionally, it provides a continuous flight line for bats and allow dormice to disperse more easily along the hedgerows. • Bat Roosting Building: a purpose-built bat roost building has been constructed within the south-west field, providing a suitable roost site for both lesser horseshoe and brown long-eared bats, which have both been found roosting in the old hut within the SINC. The building was constructed on the lesser horseshoe key flight line to enable them to rapidly locate it, and also be close to good feeding habitats on the Merthyr Mawr and the River Ogmore. • Dormouse Nest Boxes: 35 dormouse nest boxes placed within the field, to provide shelter for dormice that are to be displaced from other areas of the site. Placed within the north-east and south-east hedgerows, at approximately 10m interval. • Pond creation: two new ponds have been created within the south-west field, with the primary aim of providing habitat for Great Crested Newts. • Grassland Creation: rough grassland created around the pond to mitigate loss of existing grassland. <p>Proposed mitigation</p> <p>As part of the proposed development of Strategic Allocation PLA2: Land South of Bridgend (Island Farm), an ecological appraisal of the site has been prepared by Ethos Environmental Planning in order to:</p> <ul style="list-style-type: none"> • To establish baseline ecological conditions and determine the importance of ecological features present within the specified area; • To identify the existing habitats on site; • To identify the potential for protected species; • To identify if any further surveys are required with regards to protected habitats or species; and • To identify any key ecological constraints and make recommendations for design options to avoid significant effects on important ecological features/ resources. <p>General habitat – Existing</p> <p>The site was found to be comprised predominately of arable land in its winter stubble with very few plant species noted. The arable field margins provide good habitat for a range of species and buffer the existing hedgerows. There were numerous hedgerows across the site which ranged from mature hedgerows with trees and hazel coppice, to intensively managed species-poor hedgerows which dissected the arable fields. Two hedgerows had been translocated recently to the eastern boundary and appeared to show new growth.</p> <p>Two ponds which were created as part of the previous applications' ecological mitigation works were noted; however, neither was holding much water. Whilst there was very limited aquatic vegetation in the pond, vegetation in the immediate area included large swathes of tall ruderal and ephemeral/short perennial.</p> <p>Part of the site, in the northern section, was designated as a SINC partially due to the mosaic of grassland, woodland and scrub. This area is proposed for retention within the current masterplan, with the exception of an access road. Part of the site had been subject to clearance to enable works from the previous development proposals. The area cleared was not within the SINC identified on site. Detailed surveys will be undertaken to consider the botanical diversity of this area.</p>
--	--	--	---

			<p>Part of the area was brownfield land and whilst it was not an appropriate time of year for botany surveys, it was apparent that there were varied nutrient levels and areas of disturbed ground which are likely to result in higher botanical diversity.</p> <p>Built structures were also noted. These included 'Hut 9' a former prisoner of war camp from World War 2 located within the woodland in the north of the site and a dedicated bat roost located in the south-west of the site.</p> <p>A number of sink holes were noted across the site. These ranged from those which had apparently been present for a long period of time and had mature trees growing within them, to those very recently emerging and just comprising of small areas of collapsed earth.</p> <p>Natural Resources Wales (NRW) states that consideration will need to be given to protected species (Hazel Dormice, Lesser Horseshoe Bats, Brown Long Eared Bat records on site). Furthermore, NRW states that consideration will need to be given to impacts on the SINC, and habitat – ancient mature hedgerows and woodland.</p> <p>As such the ecological appraisal also considered the following species:</p> <p><u><i>Dormouse</i></u> The site contains hedgerows and woodland of which were assessed to hold high value for dormice. The previous surveys identified the presence of dormice within the SINC located in the north of the site. It was therefore assessed that further surveys would be required to update the status of the site for this species and to inform detailed proposals for the site.</p> <p><u><i>Riparian mammals</i></u> The River Ogmore was present along the eastern edge of the Craig-Y-Parcau, with records of both otter and water vole found south of the site. However, the previous surveys identified no evidence of riparian mammals within the development area. Considering the presence of previous records in the area and suitable habitat directly adjacent to the site, it is recommended surveys are undertaken for these protected species and to inform detailed proposals for the site.</p> <p><u><i>Great crested newt</i></u> The previous surveys assessed the ponds to be unsuitable for great crested newt (GCN) and that GCN were absent from the site. Since then, it is understood that the previously surveyed ponds have been removed and new wildlife ponds created in the south-west of the main site area. The two water bodies identified during the walkover had relatively low water levels and limited aquatic vegetation. The current proposals indicate the retention and protection of the ponds. Nevertheless, they could provide suitable breeding habitat for amphibians and it is recommended that a Habitat Suitability Index of each of the ponds within 500m of the development site to inform detailed planning application.</p> <p><u><i>Birds</i></u> There was a mix of permanent pasture and arable land providing suitable habitat for farmland birds. Also, the hedgerows and their margins within the fields was assessed to provide potential habitat for ground nesting birds. The woodland, hedgerows, scrub and scattered trees were assessed to have high potential for breeding birds. Evidence of barn owl was found in a stable in the south-east of the site. Further surveys for breeding birds have been recommended within section 5 to inform detailed proposals for the site.</p> <p><u><i>Bats</i></u> The previous surveys identified roosting lesser horseshoe and brown long-eared bats within Hut 9 in the woodland in the SINC. Since the previous surveys were undertaken, a dedicated bat roost has been created in</p>
--	--	--	---

			<p>the south-west of the main site. Additionally, the built structures within the Craig-Y-Parcau area were in extremely poor structural condition and a wide range of bat roosting features were visible for the external walkover. They were assessed to hold high potential for roosting bats. Therefore, it was assessed that an updated assessment of the structures should be undertaken to assess their status for roosting bats. Additionally, emergence/re-entry surveys are recommended. The habitats within both sites contained woodland and hedgerows, offering potential commuting, foraging and roosting habitats for bats may provide potential commuting and foraging habitats for bats. A number of mature trees were also noted which could have potential roosting features for bats.</p> <p><u>Badgers</u></p> <p>The habitats on site were comprised of woodland, grassland and arable land which have potential to support badgers. However, it should be noted that the previous survey identified badgers to be absent from the site.</p> <p><u>Reptiles</u></p> <p>Much of the site was comprised of arable land and agriculturally intensified grassland providing negligible potential for reptiles. The key features were assessed to be the sections of grassland and scrub located at the woodland edges. The site was comprised of common and widespread habitats providing low potential habitats for invertebrates. No detailed surveys will be required.</p> <p><u>SINC Review</u></p> <p>A SINC review undertaken by the Wildlife Trust indicates that the on-site SINC does not appear to have changed significantly since 2011's survey and therefore still qualifies as a SINC. The small section of woodland in the field to the south-east is worth removing from the citation as it is isolated and does not appear to add to the site's value. The woodland varies in quality but appears to offer habitat for dormice and bats and there are numerous woodland indicator species. The grassland is not particularly species-rich but adds to the site as a whole. The site suffers from antisocial behaviour including fly-tipping, frequent drug use and signs of semi-permanent habitation that is detrimental to the biodiversity of the site.</p> <p>The review recommended that dormouse tubes are replaced and monitored and that antisocial activities are reduced where feasible. Although the grassland areas are not very diverse they add to the diversity of the site and some scrub control to stop their loss is recommended though not a priority.</p> <p>Overall</p> <p>PPW identifies SINC's as local non-statutory protected sites of which carry less weight than statutory designations, however it is acknowledged that they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection. As such, the Masterplan relating to allocation PLA2: Land South of Bridgend (Island Farm) has included a number of measures to address previously identified ecological constraints including the retention of the majority of the SINC and protection of the artificial bat roost and hedgerows. Furthermore, the masterplan for Island Farm has indicated the retention of SINC land within the site boundary, with the exception of the access road from the A48. Areas of ecological value are proposed for retention including existing sink holes; which offer value for a range of invertebrates, and an ecological enhancement area located in the south-western field; previously enhanced for ecology in relation to the 2008 sports village application. The masterplan also indicates retention of continuous green areas to ensure a continued network of green and blue infrastructure.</p> <p>Further work and surveys are to be undertaken from an ecological perspective in line with the recommendations of the ecological report. However, there were no 'show-stoppers' found at this stage, with appropriate mitigation measures available to ensure that the development of the site is acceptable and any related impacts can be minimised.</p> <p>NRW support the commitment for the future development of the site to follow a Green Infrastructure led approach so that the mixture of uses will be fully integrated and designed around the SINC.</p>
--	--	--	---

			<p>Overall, the site has an extensive planning history which has demonstrated that the site can be developed in an ecologically sensitive way through careful scheme design and the use of mitigation measures. Policy PLA2 will ensure that the proposed uses through outlined development requirements are fully integrated into the future development of site.</p> <p>Policy PLA2 will also require the enhancement and provision of green infrastructure. The development will be green infrastructure led and will require high quality landscaping and architectural design to capitalise on accessibility to Bridgend Town Centre. A carefully designed green infrastructure network will run through and extend beyond the site to link with Newbridge Fields, thereby providing a continuous 'green lung' that connects the site with both Bridgend Town Centre and Merthyr Mawr. This will complement the improvements to existing and proposed active travel routes that will render walking, cycling and use of public transport viable alternatives to private vehicle use. Linked to this will be the protection and enhancement of the existing biodiversity value of the site, ensuring appropriate provision for, and protection of, existing wildlife in the area. This green infrastructure-led development will therefore provide multi-functional benefits relating to recreation, biodiversity, sustainable drainage and the use of non-car routes to address public health and quality of life issues.</p> <p>Policy PLA2 will also ensure outdoor recreation facilities are provided of which are to be delivered in accordance with Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>With regards to landscape matters, a Landscape Character Assessment for Bridgend County Borough was prepared by LUC and published in 2013. The document provides guidance on landscape character and, following the adoption of the Local Development Plan, supplements the Green Infrastructure, Biodiversity and Landscape Supplementary Planning Guidance. The Assessment categorises undeveloped land into 15 Landscape Character Areas (LCAs) with the site in question being located within the "Merthyr Mawr Farmland, Warren and Coastline" which runs north-eastwards up from the coast to the southwestern fringe of Bridgend. The Assessment emphasises that the majority of the Merthyr Mawr Farmland, Warren and Coastline LCA falls within the Merthyr Mawr Special Landscape Area, recognising designations such as Merthyr Mawr Warren SAC, SSSI and NNR, Newton Fault RIGS, several Scheduled Monuments, Merthyr Mawr village Conservation Area and the Grade II* Registered Park and Garden of Merthyr Mawr House. Much of the landscape is designated as of Outstanding Historic Importance and all of the coastal area lies within the Glamorgan Heritage Coast. The Assessment also identifies key landscape sensitivities to development-led to change, stressing the important of protecting the nationally important archaeological and cultural heritage of the landscape as an integral part of the wider Landscape of Outstanding Historic Importance, including prehistoric and medieval remains, the dunes' ancient buried archaeology and the Grade II* Merthyr Mawr Estate. The Assessment recommends implementing management strategies for their continued survival and visibility in the landscape, including through appropriate land management practices and recreation management. As such, the importance of this landscape, and the need for landscape mitigation measures for any local development proposal, is clearly recognised within the Replacement LDP's evidence base and this will be further emphasised within the supporting text to PLA2(2) for completeness.</p> <p>In particular, the southern boundary of the Land South of Bridgend (Island Farm) proposed allocation is important as it lies adjacent to a historic landscape as identified by the LCA. The Replacement LDP will seek to protect and conserve this landscape's character and features by appropriate development mitigation measures. Policy PLA2 will ensure the design and layout of the site has regard to the surrounding landscape, minimising visual impacts through the inclusion of mitigation measures that provide links with the existing landscape and access features. Appropriate landscaping treatments must be utilised along the southern fringes of the site in order to minimise visual impacts on adjacent uses.</p>
--	--	--	---

			<p>There will, undoubtedly, be an element of landscape change, although, as aforementioned, the existing permissions (P/08/1114/OUT, P/14/354/RES, P/14/823/RES and P/14/824/RES refer) on the site are considered extant. A Landscape and Visual Impact Assessment (LVIA) was undertaken as part of the Environmental Statement submitted alongside the 2008 outline application for the sports village at Island Farm. The LVIA evaluated the significance of landscape and visual impacts by assessing the sensitivity of the existing baseline landscape and visual resources of the application site and wider area and the magnitude of the change that would occur to the site and surroundings during the various phases of the development. The LVIA was prepared on the basis of proposals for a sports village which included buildings of close to 20m in height as well as, in the cases of the proposed stadia elements, a high level of massing. The LVIA concluded that “while there will be permanent residual views of buildings, these will be predominantly negligible, minor or moderate significance following the implementation of the comprehensive mitigation measures at the end of the 15 year assessment period. Views are a subjective matter and have been assessed as being adverse because of the scale of change in the appearance of an undeveloped landscape. It is anticipated that the majority of receptors will embrace these community led proposals and be stimulated by the quality and appearance of this development. The loss of landscape features will be significantly compensated by the scale of proposed planting and through improved landscape management, will give rise to beneficial landscape and ecology effects in the medium and long term future”. A series of mitigation measures were recommended. Broadly, the same means of mitigation are proposed as part of the newly proposed development and will include strong boundary planting, the creation of an undulating roofscape, the use of muted recessive colours, the use of horizontal and vertical bands of colour and texture, and using cut and fill techniques to reduce perceived scale and mass of buildings. It should also be noted that the proposed mixed-use development at Land South of Bridgend (Island Farm) will result in significantly reduced building heights and a reduced feeling of massing when compared to the previously permitted sports village scheme.</p> <p>The site promoter has equally considered the landscape effects in addition to mitigation measures. The site is not subject to any local or national, statutory or non-statutory landscape designations, albeit there are listed buildings and TPOs on the edge of the site (neither are directly affected by the proposed development). LANDMAP analysis reflects that the sites are not subject to any designations. Whilst scoring as “high” and “outstanding” against certain criteria, it also performs as “medium” and “low” for other criteria and overall the level of sensitivity is comparable to similar parcels of land on the urban fringe of Bridgend. Further, the development of the site is not considered to undermine any of the six landscape sensitivities that are identified as typifying the Merthyr Mawr Farmland, Warren and Coastline Landscape Character Area. A detailed, updated LVIA will be required to inform and accompany further masterplanning work (as part of a future planning application). This more detailed assessment will include finer details relating to roofscapes and landscaping.</p> <p>The Replacement LDP is also accompanied by a SA Report (incorporating SEA) to assess the likely sustainability and significant environmental effects of all substantive component within the Plan (strategy, policies, site allocations, etc.) and any identified reasonable alternatives. This builds directly upon previous SA reporting including an SA Scoping Report (2018) and an Interim SA Scoping Report (2019) which accompanied the Replacement LDP Preferred Strategy. The Deposit Plan SA Report demonstrates how the SA, incorporating SEA, process has informed the development of the Deposit Plan, including the incorporation of recommended changes within the document. As a result, the SA Report concludes that there is good coverage of all key sustainability issues in Deposit Plan, with plan components performing well against the SA Framework. It also identifies strong compatibility between the LDP Vision/Objectives and the SA Framework, plus no likely significant adverse effects (taking account of mitigation in all its forms).</p> <p>In accordance with statutory requirements, Planning Policy Wales sets out multiple requirements for development to avoid direct adverse effects on nationally important heritage assets and for the need for any development resulting in adverse effects on the historic environment to be robustly justified. There is also a general presumption in favour of the preservation or enhancement of listed buildings and their settings, along</p>
--	--	--	---

			<p>with a requirement for development not to result in direct adverse effects on Scheduled Monuments, unless there are exceptional circumstances. These issues are grouped under 'Cultural Heritage', which is one of the 14 Sustainability Objectives considered by the SA. The potential for adverse impacts on Cultural Heritage was and is an important consideration in determining the overall sustainability and thus suitability of candidate site allocations. Any sustainability impacts would also depend on the scale of development proposed.</p> <p>For Land South of Bridgend (Island Farm), the SA identified the potential for adverse impacts due to the proximity of the site to scheduled monuments and listed buildings. However, the requirements under SP2 (for each strategic site allocation to be supported by a detailed masterplan) and PLA2 (for the proposed strategic site allocation to implement specific masterplan development principles) represent forms of mitigation to help address the identified likely significant effects. These requirements also enhance the sustainability performance of the strategic site allocation more generally. The SA identifies relevant masterplan development principles included in these spatial development policies to help ensure the avoidance of likely significant adverse effects which could otherwise occur from this development proposal. Additional masterplan development principles are also included within Policy PLA2 to ensure site applies Good Design principles and a Sustainable Placemaking approach to siting, design, construction and operation in accordance with Planning Policy Wales. These principles were informed by SA findings and have been incorporated into the final Deposit Plan, with SA site assessment scoring updated to reflect their inclusion in the Deposit Plan. The tourism and culture asset of Hut 9 will also be preserved and enhanced through improved linkages and active opportunities.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport</p>
--	--	--	---

			<p>measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p>
783	Some concerns as previously mentioned.		Comments noted.

787	No		Comments noted.
789	In theory, all this is positive. However, the proposed huge development at Island Farm would cause huge disruption to current locals with the increased traffic, and dreadful damage to the fauna at Island Farm.	Concerns regarding Strategic Allocation PLA2: Island Farm	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site’s net developable area. The initial Transport Assessment</p>

			<p>has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>It must be noted that the proposed development and masterplan does not direct vehicles towards New Inn Road and the Dipping Bridge. Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to</p>
--	--	--	--

			<p>extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>In relation to nature/biodiversity, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health. For development to be sustainable, it needs to be soundly based on good environmental assessments, and to be well planned and controlled with regard to its environmental impact, in order to conserve and enhance biodiversity.</p> <p>There is clear guidance and legislation with regard to the protection of species and habitats recognised in legislation, Planning Policy Wales (PPW) and TAN5 Nature Conservation and Planning. The most relevant statutory requirements are set out in Section 61 of the Planning and Compulsory Purchase Act 2004, the Conservation of Habitats and Species Regulations 2017, Environment (Wales) Act 2016 Section 6 Biodiversity and Resilience of Ecosystems Duty and Section 7 Priority Habitats and Species, Section 11 of the Countryside Act 1981 and Section 28G of the Wildlife and Countryside Act 1981. Annex 1 of TAN5 lists all the other relevant legislation.</p> <p>To comply with the Environment (Wales) Act 2016 (Section 6 Duty) the LDP Strategy will seek to enhance the biodiversity and resilience of the County Borough's ecosystems through native species landscaping, careful location of development, the creation of green corridors, and open space management. It is important that</p>
--	--	--	--

			<p>biodiversity and resilience considerations are taken into account at an early stage in both development plan preparation and when proposing or considering development proposals. All reasonable steps must be taken to maintain and enhance biodiversity and promote the resilience of ecosystems and these should be balanced with the wider social needs of local communities. Only in exceptional circumstances, where it is in the public interest, will new development be located where it may have an adverse impact on sites designated for their importance for nature conservation. Robust mitigation and compensation will be provided wherever this situation is unavoidable, in line with considered advice from statutory and advisory organisations.</p> <p>The Environment Act (Section 6) sets out a framework for planning authorities to maintain and enhance biodiversity to provide a net benefit for biodiversity through a proactive and resilient approach. Policies SP17 and DNP6 of the LDP set the framework to deliver on this premise, as set out in Policy 9 (NDF). Policy DNP6 (LDP) will be revised to ensure it is based on a net benefit approach to achieve these outcomes.</p> <p>It is acknowledged that Strategic Allocation PLA2: Land South of Bridgend (Island Farm) contains a Site of Importance for Nature Conservation (SINC) (The Island Farm POW Camp) of which covers 14.03 hectares of land within the allocated site. PPW identifies SINC's as local non-statutory protected sites. Paragraph 6.4.20 states that 'Although non-statutory designations carry less weight than statutory designations, they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection in development plans and the development management process.'</p> <p>Existing Consent</p> <p>In relation to Strategic Allocation PLA2: Land South of Bridgend (Island Farm), development has already lawfully commenced on this site. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved 'Green Bridge'. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of 'enabling works' that had been approved under P/14/354/RES and P/14/824/RES. These 'enabling works' are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive;
--	--	--	--

			<ul style="list-style-type: none"> Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a 'commencement of development' triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the 'enabling works' constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council's opinion is that the permissions are extant.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a 'green lung' that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. A final masterplan must be prepared and agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will need to demonstrate how the development will create a well-connected, sustainable mixed-use urban extension to Bridgend, comprising a number of character areas that integrate positively with the existing landscape, SINC, adjacent Grade II* listed Merthyr Mawr House, existing housing clusters, community facilities, Active Travel Networks and public transport facilities. An illustrative masterplan will also be included in the final version of the Replacement LDP to enable all parties to understand how the site will be developed in broad terms, including proposed land uses, access, infrastructure requirements, constraints and areas of protection. This masterplan will clearly identify the location of the SINC in the context of the wider allocation.</p> <p>Ecological mitigation measures already implemented</p> <p>As part of the existing consent, a mitigation strategy was produced in 2009 to offset the impacts of the development. It was proposed that the SINC and south west field would become a wildlife conservation area within the new development. Surveys at the site found dormice <i>Muscardinus avellanarius</i> to be present, both within the woodland and scrub in the SINC and in the hedgerows of the agricultural fields. These areas are also known to be used by bats for foraging and commuting purposes, and the SINC area contains a roost site for lesser horseshoe bats <i>Rhinolophus hipposideros</i> and brown long-eared bats <i>Plecotus auritus</i>.</p> <p>As part of the development process some areas of these habitats were to be lost, and modification to the remaining areas due to the impacts of the development, including noise and light spillage. Part of the mitigation strategy to counter these losses included the creation of new habitats suitable for the relevant species. As such, habitat design was guided by the requirements of the protected species of which had the potential to utilise the site. In addition to dormice and bats, a further condition of the existing consent required the habitat requirements of Great Crested Newts <i>Triturus cristatus</i> to be taking into account.</p>
--	--	--	--

			<p>The habitat design for the consented scheme included:</p> <ul style="list-style-type: none"> • Tree and Scrub Planting: translocation and planting new trees and scrub in the south-west field, providing an alternative for displaced animals, including dormice, bats, and shelter for reptiles and amphibians. • Hedgerow Enhancement: enhancement and translocation of hedgerows from the centre of the site to the eastern site boundary has been undertaken, to create continuous hedge lines which help to buffer the expanded SINC site, and to filter out noise and light from development. Additionally, it provides a continuous flight line for bats and allow dormice to disperse more easily along the hedgerows. • Bat Roosting Building: a purpose-built bat roost building has been constructed within the south-west field, providing a suitable roost site for both lesser horseshoe and brown long-eared bats, which have both been found roosting in the old hut within the SINC. The building was constructed on the lesser horseshoe key flight line to enable them to rapidly locate it, and also be close to good feeding habitats on the Merthyr Mawr and the River Ogmore. • Dormouse Nest Boxes: 35 dormouse nest boxes placed within the field, to provide shelter for dormice that are to be displaced from other areas of the site. Placed within the north-east and south-east hedgerows, at approximately 10m interval. • Pond creation: two new ponds have been created within the south-west field, with the primary aim of providing habitat for Great Crested Newts. • Grassland Creation: rough grassland created around the pond to mitigate loss of existing grassland. <p>Proposed mitigation</p> <p>As part of the proposed development of Strategic Allocation PLA2: Land South of Bridgend (Island Farm), an ecological appraisal of the site has been prepared by Ethos Environmental Planning in order to:</p> <ul style="list-style-type: none"> • To establish baseline ecological conditions and determine the importance of ecological features present within the specified area; • To identify the existing habitats on site; • To identify the potential for protected species; • To identify if any further surveys are required with regards to protected habitats or species; and • To identify any key ecological constraints and make recommendations for design options to avoid significant effects on important ecological features/ resources. <p>General habitat – Existing</p> <p>The site was found to be comprised predominately of arable land in its winter stubble with very few plant species noted. The arable field margins provide good habitat for a range of species and buffer the existing hedgerows. There were numerous hedgerows across the site which ranged from mature hedgerows with trees and hazel coppice, to intensively managed species-poor hedgerows which dissected the arable fields. Two hedgerows had been translocated recently to the eastern boundary and appeared to show new growth.</p> <p>Two ponds which were created as part of the previous applications' ecological mitigation works were noted; however, neither was holding much water. Whilst there was very limited aquatic vegetation in the pond, vegetation in the immediate area included large swathes of tall ruderal and ephemeral/short perennial.</p> <p>Part of the site, in the northern section, was designated as a SINC partially due to the mosaic of grassland, woodland and scrub. This area is proposed for retention within the current masterplan, with the exception of an access road. Part of the site had been subject to clearance to enable works from the previous development proposals. The area cleared was not within the SINC identified on site. Detailed surveys will be undertaken to consider the botanical diversity of this area.</p>
--	--	--	---

			<p>Part of the area was brownfield land and whilst it was not an appropriate time of year for botany surveys, it was apparent that there were varied nutrient levels and areas of disturbed ground which are likely to result in higher botanical diversity.</p> <p>Built structures were also noted. These included 'Hut 9' a former prisoner of war camp from World War 2 located within the woodland in the north of the site and a dedicated bat roost located in the south-west of the site.</p> <p>A number of sink holes were noted across the site. These ranged from those which had apparently been present for a long period of time and had mature trees growing within them, to those very recently emerging and just comprising of small areas of collapsed earth.</p> <p>Natural Resources Wales (NRW) states that consideration will need to be given to protected species (Hazel Dormice, Lesser Horseshoe Bats, Brown Long Eared Bat records on site). Furthermore, NRW states that consideration will need to be given to impacts on the SINC, and habitat – ancient mature hedgerows and woodland.</p> <p>As such the ecological appraisal also considered the following species:</p> <p><u><i>Dormouse</i></u> The site contains hedgerows and woodland of which were assessed to hold high value for dormice. The previous surveys identified the presence of dormice within the SINC located in the north of the site. It was therefore assessed that further surveys would be required to update the status of the site for this species and to inform detailed proposals for the site.</p> <p><u><i>Riparian mammals</i></u> The River Ogmore was present along the eastern edge of the Craig-Y-Parcau, with records of both otter and water vole found south of the site. However, the previous surveys identified no evidence of riparian mammals within the development area. Considering the presence of previous records in the area and suitable habitat directly adjacent to the site, it is recommended surveys are undertaken for these protected species and to inform detailed proposals for the site.</p> <p><u><i>Great crested newt</i></u> The previous surveys assessed the ponds to be unsuitable for great crested newt (GCN) and that GCN were absent from the site. Since then, it is understood that the previously surveyed ponds have been removed and new wildlife ponds created in the south-west of the main site area. The two water bodies identified during the walkover had relatively low water levels and limited aquatic vegetation. The current proposals indicate the retention and protection of the ponds. Nevertheless, they could provide suitable breeding habitat for amphibians and it is recommended that a Habitat Suitability Index of each of the ponds within 500m of the development site to inform detailed planning application.</p> <p><u><i>Birds</i></u> There was a mix of permanent pasture and arable land providing suitable habitat for farmland birds. Also, the hedgerows and their margins within the fields was assessed to provide potential habitat for ground nesting birds. The woodland, hedgerows, scrub and scattered trees were assessed to have high potential for breeding birds. Evidence of barn owl was found in a stable in the south-east of the site. Further surveys for breeding birds have been recommended within section 5 to inform detailed proposals for the site.</p> <p><u><i>Bats</i></u> The previous surveys identified roosting lesser horseshoe and brown long-eared bats within Hut 9 in the woodland in the SINC. Since the previous surveys were undertaken, a dedicated bat roost has been created in</p>
--	--	--	---

			<p>the south-west of the main site. Additionally, the built structures within the Craig-Y-Parcau area were in extremely poor structural condition and a wide range of bat roosting features were visible for the external walkover. They were assessed to hold high potential for roosting bats. Therefore, it was assessed that an updated assessment of the structures should be undertaken to assess their status for roosting bats. Additionally, emergence/re-entry surveys are recommended. The habitats within both sites contained woodland and hedgerows, offering potential commuting, foraging and roosting habitats for bats may provide potential commuting and foraging habitats for bats. A number of mature trees were also noted which could have potential roosting features for bats.</p> <p><u><i>Badgers</i></u> The habitats on site were comprised of woodland, grassland and arable land which have potential to support badgers. However, it should be noted that the previous survey identified badgers to be absent from the site.</p> <p><u><i>Reptiles</i></u> Much of the site was comprised of arable land and agriculturally intensified grassland providing negligible potential for reptiles. The key features were assessed to be the sections of grassland and scrub located at the woodland edges. The site was comprised of common and widespread habitats providing low potential habitats for invertebrates. No detailed surveys will be required.</p> <p><u><i>SINC Review</i></u> A SINC review undertaken by the Wildlife Trust indicates that the on-site SINC does not appear to have changed significantly since 2011's survey and therefore still qualifies as a SINC. The small section of woodland in the field to the south-east is worth removing from the citation as it is isolated and does not appear to add to the site's value. The woodland varies in quality but appears to offer habitat for dormice and bats and there are numerous woodland indicator species. The grassland is not particularly species-rich but adds to the site as a whole. The site suffers from antisocial behaviour including fly-tipping, frequent drug use and signs of semi-permanent habitation that is detrimental to the biodiversity of the site.</p> <p>The review recommended that dormouse tubes are replaced and monitored and that antisocial activities are reduced where feasible. Although the grassland areas are not very diverse they add to the diversity of the site and some scrub control to stop their loss is recommended though not a priority.</p> <p><i>Overall</i> PPW identifies SINC's as local non-statutory protected sites of which carry less weight than statutory designations, however it is acknowledged that they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection. As such, the Masterplan relating to allocation PLA2: Land South of Bridgend (Island Farm) has included a number of measures to address previously identified ecological constraints including the retention of the majority of the SINC and protection of the artificial bat roost and hedgerows. Furthermore, the masterplan for Island Farm has indicated the retention of SINC land within the site boundary, with the exception of the access road from the A48. Areas of ecological value are proposed for retention including existing sink holes; which offer value for a range of invertebrates, and an ecological enhancement area located in the south-western field; previously enhanced for ecology in relation to the 2008 sports village application. The masterplan also indicates retention of continuous green areas to ensure a continued network of green and blue infrastructure.</p> <p>Further work and surveys are to be undertaken from an ecological perspective in line with the recommendations of the ecological report. However, there were no 'show-stoppers' found at this stage, with appropriate mitigation measures available to ensure that the development of the site is acceptable and any related impacts can be minimised.</p>
--	--	--	---

			<p>NRW support the commitment for the future development of the site to follow a Green Infrastructure led approach so that the mixture of uses will be fully integrated and designed around the SINC.</p> <p>Overall, the site has an extensive planning history which has demonstrated that the site can be developed in an ecologically sensitive way through careful scheme design and the use of mitigation measures. Policy PLA2 will ensure that the proposed uses through outlined development requirements are fully integrated into the future development of site.</p>
801	See previous comments		Comments noted.
820	There is very little useable space south of Bridgend. There is already heavy traffic and more traffic on the A48 will render it unusable.	Concerns regarding development south of Bridgend / A48	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit</p>

			<p>Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site’s net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site’s location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments</p>
--	--	--	--

			<p>and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p>
--	--	--	---

			<p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p>

898	I think your stretching things by saying a world war 2 site to house workers and the prisoners of war and a site of an old peoples home are brown field sites, you're not fooling anyone.	Concerns regarding Strategic Allocation PLA2: Island Farm / brownfield	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables</p>

			<p>sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>Whilst greenfield sites such as PLA2 Island Farm have been allocated for development, additional long-term brownfield Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p>
899	<p>What a disappointment to hear of plans to build houses on land adjacent to Newbridge Fields In the past we've regrettably supported the destruction of our town and the surrounding countryside with the need of housing for the next generation. We will never support the loss of the final barrier between Bridgend and Merthyr Mawr estate this will destroy the last character of the County. You probably already of the anger locally and a few of the reasons are listed below. Green spaces Protection of wildlife Mental Health and the access to open spaces Traffic is horrendous today without adding additional volume We would be interested to hear of your plans in how you're dealing with the already over stretched schools, GPs and traffic volume. Today as elected representees you could campaign to remove the proposed land from the list of local development and look towards rewilding our town centre and County.</p>	<p>Concerns regarding Strategic Allocation PLA2: Island Farm</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In relation to nature/biodiversity, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough’s environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health. For development to be sustainable, it needs to be soundly based on good environmental assessments, and to be well planned and controlled with regard to its environmental impact, in order to conserve and enhance biodiversity.</p> <p>There is clear guidance and legislation with regard to the protection of species and habitats recognised in legislation, Planning Policy Wales (PPW) and TAN5 Nature Conservation and Planning. The most relevant statutory requirements are set out in Section 61 of the Planning and Compulsory Purchase Act 2004, the Conservation of Habitats and Species Regulations 2017, Environment (Wales) Act 2016 Section 6 Biodiversity and Resilience of Ecosystems Duty and Section 7 Priority Habitats and Species, Section 11 of the Countryside Act 1981 and Section 28G of the Wildlife and Countryside Act 1981. Annex 1 of TAN5 lists all the other relevant legislation.</p> <p>To comply with the Environment (Wales) Act 2016 (Section 6 Duty) the LDP Strategy will seek to enhance the biodiversity and resilience of the County Borough’s ecosystems through native species landscaping, careful</p>
--	--	--	---

			<p>location of development, the creation of green corridors, and open space management. It is important that biodiversity and resilience considerations are taken into account at an early stage in both development plan preparation and when proposing or considering development proposals. All reasonable steps must be taken to maintain and enhance biodiversity and promote the resilience of ecosystems and these should be balanced with the wider social needs of local communities. Only in exceptional circumstances, where it is in the public interest, will new development be located where it may have an adverse impact on sites designated for their importance for nature conservation. Robust mitigation and compensation will be provided wherever this situation is unavoidable, in line with considered advice from statutory and advisory organisations.</p> <p>The Environment Act (Section 6) sets out a framework for planning authorities to maintain and enhance biodiversity to provide a net benefit for biodiversity through a proactive and resilient approach. Policies SP17 and DNP6 of the LDP set the framework to deliver on this premise, as set out in Policy 9 (NDF). Policy DNP6 (LDP) will be revised to ensure it is based on a net benefit approach to achieve these outcomes.</p> <p>It is acknowledged that Strategic Allocation PLA2: Land South of Bridgend (Island Farm) contains a Site of Importance for Nature Conservation (SINC) (The Island Farm POW Camp) of which covers 14.03 hectares of land within the allocated site. PPW identifies SINC's as local non-statutory protected sites. Paragraph 6.4.20 states that 'Although non-statutory designations carry less weight than statutory designations, they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection in development plans and the development management process.'</p> <p>Existing Consent</p> <p>In relation to Strategic Allocation PLA2: Land South of Bridgend (Island Farm), development has already lawfully commenced on this site. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved 'Green Bridge'. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of 'enabling works' that had been approved under P/14/354/RES and P/14/824/RES. These 'enabling works' are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive;
--	--	--	--

			<ul style="list-style-type: none"> Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a 'commencement of development' triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the 'enabling works' constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council's opinion is that the permissions are extant.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a 'green lung' that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. A final masterplan must be prepared and agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will need to demonstrate how the development will create a well-connected, sustainable mixed-use urban extension to Bridgend, comprising a number of character areas that integrate positively with the existing landscape, SINC, adjacent Grade II* listed Merthyr Mawr House, existing housing clusters, community facilities, Active Travel Networks and public transport facilities. An illustrative masterplan will also be included in the final version of the Replacement LDP to enable all parties to understand how the site will be developed in broad terms, including proposed land uses, access, infrastructure requirements, constraints and areas of protection. This masterplan will clearly identify the location of the SINC in the context of the wider allocation.</p> <p>Ecological mitigation measures already implemented</p> <p>As part of the existing consent, a mitigation strategy was produced in 2009 to offset the impacts of the development. It was proposed that the SINC and south west field would become a wildlife conservation area within the new development. Surveys at the site found dormice <i>Muscardinus avellanarius</i> to be present, both within the woodland and scrub in the SINC and in the hedgerows of the agricultural fields. These areas are also known to be used by bats for foraging and commuting purposes, and the SINC area contains a roost site for lesser horseshoe bats <i>Rhinolophus hipposideros</i> and brown long-eared bats <i>Plecotus auritus</i>.</p> <p>As part of the development process some areas of these habitats were to be lost, and modification to the remaining areas due to the impacts of the development, including noise and light spillage. Part of the mitigation strategy to counter these losses included the creation of new habitats suitable for the relevant species. As such, habitat design was guided by the requirements of the protected species of which had the potential to utilise the site. In addition to dormice and bats, a further condition of the existing consent required the habitat requirements of Great Crested Newts <i>Triturus cristatus</i> to be taking into account.</p>
--	--	--	--

			<p>The habitat design for the consented scheme included:</p> <ul style="list-style-type: none"> • Tree and Scrub Planting: translocation and planting new trees and scrub in the south-west field, providing an alternative for displaced animals, including dormice, bats, and shelter for reptiles and amphibians. • Hedgerow Enhancement: enhancement and translocation of hedgerows from the centre of the site to the eastern site boundary has been undertaken, to create continuous hedge lines which help to buffer the expanded SINC site, and to filter out noise and light from development. Additionally, it provides a continuous flight line for bats and allow dormice to disperse more easily along the hedgerows. • Bat Roosting Building: a purpose-built bat roost building has been constructed within the south-west field, providing a suitable roost site for both lesser horseshoe and brown long-eared bats, which have both been found roosting in the old hut within the SINC. The building was constructed on the lesser horseshoe key flight line to enable them to rapidly locate it, and also be close to good feeding habitats on the Merthyr Mawr and the River Ogmore. • Dormouse Nest Boxes: 35 dormouse nest boxes placed within the field, to provide shelter for dormice that are to be displaced from other areas of the site. Placed within the north-east and south-east hedgerows, at approximately 10m interval. • Pond creation: two new ponds have been created within the south-west field, with the primary aim of providing habitat for Great Crested Newts. • Grassland Creation: rough grassland created around the pond to mitigate loss of existing grassland. <p>Proposed mitigation</p> <p>As part of the proposed development of Strategic Allocation PLA2: Land South of Bridgend (Island Farm), an ecological appraisal of the site has been prepared by Ethos Environmental Planning in order to:</p> <ul style="list-style-type: none"> • To establish baseline ecological conditions and determine the importance of ecological features present within the specified area; • To identify the existing habitats on site; • To identify the potential for protected species; • To identify if any further surveys are required with regards to protected habitats or species; and • To identify any key ecological constraints and make recommendations for design options to avoid significant effects on important ecological features/ resources. <p>General habitat – Existing</p> <p>The site was found to be comprised predominately of arable land in its winter stubble with very few plant species noted. The arable field margins provide good habitat for a range of species and buffer the existing hedgerows. There were numerous hedgerows across the site which ranged from mature hedgerows with trees and hazel coppice, to intensively managed species-poor hedgerows which dissected the arable fields. Two hedgerows had been translocated recently to the eastern boundary and appeared to show new growth.</p> <p>Two ponds which were created as part of the previous applications' ecological mitigation works were noted; however, neither was holding much water. Whilst there was very limited aquatic vegetation in the pond, vegetation in the immediate area included large swathes of tall ruderal and ephemeral/short perennial.</p> <p>Part of the site, in the northern section, was designated as a SINC partially due to the mosaic of grassland, woodland and scrub. This area is proposed for retention within the current masterplan, with the exception of an access road. Part of the site had been subject to clearance to enable works from the previous development proposals. The area cleared was not within the SINC identified on site. Detailed surveys will be undertaken to consider the botanical diversity of this area.</p>
--	--	--	---

			<p>Part of the area was brownfield land and whilst it was not an appropriate time of year for botany surveys, it was apparent that there were varied nutrient levels and areas of disturbed ground which are likely to result in higher botanical diversity.</p> <p>Built structures were also noted. These included 'Hut 9' a former prisoner of war camp from World War 2 located within the woodland in the north of the site and a dedicated bat roost located in the south-west of the site.</p> <p>A number of sink holes were noted across the site. These ranged from those which had apparently been present for a long period of time and had mature trees growing within them, to those very recently emerging and just comprising of small areas of collapsed earth.</p> <p>Natural Resources Wales (NRW) states that consideration will need to be given to protected species (Hazel Dormice, Lesser Horseshoe Bats, Brown Long Eared Bat records on site). Furthermore, NRW states that consideration will need to be given to impacts on the SINC, and habitat – ancient mature hedgerows and woodland.</p> <p>As such the ecological appraisal also considered the following species:</p> <p><u><i>Dormouse</i></u> The site contains hedgerows and woodland of which were assessed to hold high value for dormice. The previous surveys identified the presence of dormice within the SINC located in the north of the site. It was therefore assessed that further surveys would be required to update the status of the site for this species and to inform detailed proposals for the site.</p> <p><u><i>Riparian mammals</i></u> The River Ogmore was present along the eastern edge of the Craig-Y-Parcau, with records of both otter and water vole found south of the site. However, the previous surveys identified no evidence of riparian mammals within the development area. Considering the presence of previous records in the area and suitable habitat directly adjacent to the site, it is recommended surveys are undertaken for these protected species and to inform detailed proposals for the site.</p> <p><u><i>Great crested newt</i></u> The previous surveys assessed the ponds to be unsuitable for great crested newt (GCN) and that GCN were absent from the site. Since then, it is understood that the previously surveyed ponds have been removed and new wildlife ponds created in the south-west of the main site area. The two water bodies identified during the walkover had relatively low water levels and limited aquatic vegetation. The current proposals indicate the retention and protection of the ponds. Nevertheless, they could provide suitable breeding habitat for amphibians and it is recommended that a Habitat Suitability Index of each of the ponds within 500m of the development site to inform detailed planning application.</p> <p><u><i>Birds</i></u> There was a mix of permanent pasture and arable land providing suitable habitat for farmland birds. Also, the hedgerows and their margins within the fields was assessed to provide potential habitat for ground nesting birds. The woodland, hedgerows, scrub and scattered trees were assessed to have high potential for breeding birds. Evidence of barn owl was found in a stable in the south-east of the site. Further surveys for breeding birds have been recommended within section 5 to inform detailed proposals for the site.</p> <p><u><i>Bats</i></u> The previous surveys identified roosting lesser horseshoe and brown long-eared bats within Hut 9 in the woodland in the SINC. Since the previous surveys were undertaken, a dedicated bat roost has been created in</p>
--	--	--	---

			<p>the south-west of the main site. Additionally, the built structures within the Craig-Y-Parcau area were in extremely poor structural condition and a wide range of bat roosting features were visible for the external walkover. They were assessed to hold high potential for roosting bats. Therefore, it was assessed that an updated assessment of the structures should be undertaken to assess their status for roosting bats. Additionally, emergence/re-entry surveys are recommended. The habitats within both sites contained woodland and hedgerows, offering potential commuting, foraging and roosting habitats for bats may provide potential commuting and foraging habitats for bats. A number of mature trees were also noted which could have potential roosting features for bats.</p> <p><u>Badgers</u></p> <p>The habitats on site were comprised of woodland, grassland and arable land which have potential to support badgers. However, it should be noted that the previous survey identified badgers to be absent from the site.</p> <p><u>Reptiles</u></p> <p>Much of the site was comprised of arable land and agriculturally intensified grassland providing negligible potential for reptiles. The key features were assessed to be the sections of grassland and scrub located at the woodland edges. The site was comprised of common and widespread habitats providing low potential habitats for invertebrates. No detailed surveys will be required.</p> <p><u>SINC Review</u></p> <p>A SINC review undertaken by the Wildlife Trust indicates that the on-site SINC does not appear to have changed significantly since 2011's survey and therefore still qualifies as a SINC. The small section of woodland in the field to the south-east is worth removing from the citation as it is isolated and does not appear to add to the site's value. The woodland varies in quality but appears to offer habitat for dormice and bats and there are numerous woodland indicator species. The grassland is not particularly species-rich but adds to the site as a whole. The site suffers from antisocial behaviour including fly-tipping, frequent drug use and signs of semi-permanent habitation that is detrimental to the biodiversity of the site.</p> <p>The review recommended that dormouse tubes are replaced and monitored and that antisocial activities are reduced where feasible. Although the grassland areas are not very diverse they add to the diversity of the site and some scrub control to stop their loss is recommended though not a priority.</p> <p>Overall</p> <p>PPW identifies SINC's as local non-statutory protected sites of which carry less weight than statutory designations, however it is acknowledged that they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection. As such, the Masterplan relating to allocation PLA2: Land South of Bridgend (Island Farm) has included a number of measures to address previously identified ecological constraints including the retention of the majority of the SINC and protection of the artificial bat roost and hedgerows. Furthermore, the masterplan for Island Farm has indicated the retention of SINC land within the site boundary, with the exception of the access road from the A48. Areas of ecological value are proposed for retention including existing sink holes; which offer value for a range of invertebrates, and an ecological enhancement area located in the south-western field; previously enhanced for ecology in relation to the 2008 sports village application. The masterplan also indicates retention of continuous green areas to ensure a continued network of green and blue infrastructure.</p> <p>Further work and surveys are to be undertaken from an ecological perspective in line with the recommendations of the ecological report. However, there were no 'show-stoppers' found at this stage, with appropriate mitigation measures available to ensure that the development of the site is acceptable and any related impacts can be minimised.</p> <p>NRW support the commitment for the future development of the site to follow a Green Infrastructure led approach so that the mixture of uses will be fully integrated and designed around the SINC.</p>
--	--	--	---

			<p>Overall, the site has an extensive planning history which has demonstrated that the site can be developed in an ecologically sensitive way through careful scheme design and the use of mitigation measures. Policy PLA2 will ensure that the proposed uses through outlined development requirements are fully integrated into the future development of site.</p> <p>Policy PLA2 will also ensure outdoor recreation facilities are provided of which are to be delivered in accordance with Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of education, Policy PLA2 will require 1.8 hectares of land to accommodate a minimum one form entry primary school and a financial contribution to nursery and primary school provision as required by the Local Education Authority. The financial contribution (including timing and phasing thereof) must be secured through Section 106 Planning Obligations in accordance with the Education Facilities and Residential Development SPG. The school must be accessible to new and existing residents by all travel modes, enabled by the development.</p> <p>With respect to health facilities, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p>
--	--	--	--

			<p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>It must be noted that the proposed development and masterplan does not direct vehicles towards New Inn Road and the Dipping Bridge. Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised</p>
--	--	--	--

			<p>Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
951	<p>The spatial strategy you propose endangers wildlife on greenfield sites such as SP2 (2) Island farm and COM1 (2) Craig-Y-Parc. These sites are also areas on natural beauty for the local residents.</p>	<p>Concerns regarding Strategic Allocation PLA2: Island Farm and Housing Allocation COM1(2): Craig y Parcau</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate sites PS.1 Island Farm & PS.2 Craig y Parcau were considered appropriate for allocation.</p>

			<p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In relation to nature/biodiversity, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health. For development to be sustainable, it needs to be soundly based on good environmental assessments, and to be well planned and controlled with regard to its environmental impact, in order to conserve and enhance biodiversity.</p> <p>There is clear guidance and legislation with regard to the protection of species and habitats recognised in legislation, Planning Policy Wales (PPW) and TAN5 Nature Conservation and Planning. The most relevant statutory requirements are set out in Section 61 of the Planning and Compulsory Purchase Act 2004, the Conservation of Habitats and Species Regulations 2017, Environment (Wales) Act 2016 Section 6 Biodiversity and Resilience of Ecosystems Duty and Section 7 Priority Habitats and Species, Section 11 of the Countryside Act 1981 and Section 28G of the Wildlife and Countryside Act 1981. Annex 1 of TAN5 lists all the other relevant legislation.</p> <p>To comply with the Environment (Wales) Act 2016 (Section 6 Duty) the LDP Strategy will seek to enhance the biodiversity and resilience of the County Borough's ecosystems through native species landscaping, careful location of development, the creation of green corridors, and open space management. It is important that biodiversity and resilience considerations are taken into account at an early stage in both development plan preparation and when proposing or considering development proposals. All reasonable steps must be taken to maintain and enhance biodiversity and promote the resilience of ecosystems and these should be balanced with the wider social needs of local communities. Only in exceptional circumstances, where it is in the public interest, will new development be located where it may have an adverse impact on sites designated for their importance for nature conservation. Robust mitigation and compensation will be provided wherever this situation is unavoidable, in line with considered advice from statutory and advisory organisations.</p> <p>The Environment Act (Section 6) sets out a framework for planning authorities to maintain and enhance biodiversity to provide a net benefit for biodiversity through a proactive and resilient approach. Policies SP17 and DNP6 of the LDP set the framework to deliver on this premise, as set out in Policy 9 (NDF). Policy DNP6 (LDP) will be revised to ensure it is based on a net benefit approach to achieve these outcomes.</p> <p>It is acknowledged that Strategic Allocation PLA2: Land South of Bridgend (Island Farm) contains a Site of Importance for Nature Conservation (SINC) (The Island Farm POW Camp) of which covers 14.03 hectares of land within the allocated site. PPW identifies SINC's as local non-statutory protected sites. Paragraph 6.4.20 states that 'Although non-statutory designations carry less weight than statutory designations, they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection in development plans and the development management process.'</p>
--	--	--	--

			<p>Existing Consent</p> <p>In relation to Strategic Allocation PLA2: Land South of Bridgend (Island Farm), development has already lawfully commenced on this site. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved ‘Green Bridge’. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of ‘enabling works’ that had been approved under P/14/354/RES and P/14/824/RES. These ‘enabling works’ are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive; • Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a ‘commencement of development’ triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the ‘enabling works’ constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council’s opinion is that the permissions are extant.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a ‘green lung’ that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified</p>
--	--	--	---

			<p>in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. A final masterplan must be prepared and agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will need to demonstrate how the development will create a well-connected, sustainable mixed-use urban extension to Bridgend, comprising a number of character areas that integrate positively with the existing landscape, SINC, adjacent Grade II* listed Merthyr Mawr House, existing housing clusters, community facilities, Active Travel Networks and public transport facilities. An illustrative masterplan will also be included in the final version of the Replacement LDP to enable all parties to understand how the site will be developed in broad terms, including proposed land uses, access, infrastructure requirements, constraints and areas of protection. This masterplan will clearly identify the location of the SINC in the context of the wider allocation.</p> <p>Ecological mitigation measures already implemented</p> <p>As part of the existing consent, a mitigation strategy was produced in 2009 to offset the impacts of the development. It was proposed that the SINC and south west field would become a wildlife conservation area within the new development. Surveys at the site found dormice <i>Muscardinus avellanarius</i> to be present, both within the woodland and scrub in the SINC and in the hedgerows of the agricultural fields. These areas are also known to be used by bats for foraging and commuting purposes, and the SINC area contains a roost site for lesser horseshoe bats <i>Rhinolophus hipposideros</i> and brown long-eared bats <i>Plecotus auritus</i>.</p> <p>As part of the development process some areas of these habitats were to be lost, and modification to the remaining areas due to the impacts of the development, including noise and light spillage. Part of the mitigation strategy to counter these losses included the creation of new habitats suitable for the relevant species. As such, habitat design was guided by the requirements of the protected species of which had the potential to utilise the site. In addition to dormice and bats, a further condition of the existing consent required the habitat requirements of Great Crested Newts <i>Triturus cristatus</i> to be taking into account.</p> <p>The habitat design for the consented scheme included:</p> <ul style="list-style-type: none"> • Tree and Scrub Planting: translocation and planting new trees and scrub in the south-west field, providing an alternative for displaced animals, including dormice, bats, and shelter for reptiles and amphibians. • Hedgerow Enhancement: enhancement and translocation of hedgerows from the centre of the site to the eastern site boundary has been undertaken, to create continuous hedge lines which help to buffer the expanded SINC site, and to filter out noise and light from development. Additionally, it provides a continuous flight line for bats and allow dormice to disperse more easily along the hedgerows. • Bat Roosting Building: a purpose-built bat roost building has been constructed within the south-west field, providing a suitable roost site for both lesser horseshoe and brown long-eared bats, which have both been found roosting in the old hut within the SINC. The building was constructed on the lesser horseshoe key flight line to enable them to rapidly locate it, and also be close to good feeding habitats on the Merthyr Mawr and the River Ogmore. • Dormouse Nest Boxes: 35 dormouse nest boxes placed within the field, to provide shelter for dormice that are to be displaced from other areas of the site. Placed within the north-east and south-east hedgerows, at approximately 10m interval. • Pond creation: two new ponds have been created within the south-west field, with the primary aim of providing habitat for Great Crested Newts. • Grassland Creation: rough grassland created around the pond to mitigate loss of existing grassland.
--	--	--	--

			<p>Proposed mitigation</p> <p>As part of the proposed development of Strategic Allocation PLA2: Land South of Bridgend (Island Farm), an ecological appraisal of the site has been prepared by Ethos Environmental Planning in order to:</p> <ul style="list-style-type: none"> • To establish baseline ecological conditions and determine the importance of ecological features present within the specified area; • To identify the existing habitats on site; • To identify the potential for protected species; • To identify if any further surveys are required with regards to protected habitats or species; and • To identify any key ecological constraints and make recommendations for design options to avoid significant effects on important ecological features/ resources. <p>General habitat – Existing</p> <p>The site was found to be comprised predominately of arable land in its winter stubble with very few plant species noted. The arable field margins provide good habitat for a range of species and buffer the existing hedgerows. There were numerous hedgerows across the site which ranged from mature hedgerows with trees and hazel coppice, to intensively managed species-poor hedgerows which dissected the arable fields. Two hedgerows had been translocated recently to the eastern boundary and appeared to show new growth.</p> <p>Two ponds which were created as part of the previous applications’ ecological mitigation works were noted; however, neither was holding much water. Whilst there was very limited aquatic vegetation in the pond, vegetation in the immediate area included large swathes of tall ruderal and ephemeral/short perennial.</p> <p>Part of the site, in the northern section, was designated as a SINC partially due to the mosaic of grassland, woodland and scrub. This area is proposed for retention within the current masterplan, with the exception of an access road. Part of the site had been subject to clearance to enable works from the previous development proposals. The area cleared was not within the SINC identified on site. Detailed surveys will be undertaken to consider the botanical diversity of this area.</p> <p>Part of the area was brownfield land and whilst it was not an appropriate time of year for botany surveys, it was apparent that there were varied nutrient levels and areas of disturbed ground which are likely to result in higher botanical diversity.</p> <p>Built structures were also noted. These included ‘Hut 9’ a former prisoner of war camp from World War 2 located within the woodland in the north of the site and a dedicated bat roost located in the south-west of the site.</p> <p>A number of sink holes were noted across the site. These ranged from those which had apparently been present for a long period of time and had mature trees growing within them, to those very recently emerging and just comprising of small areas of collapsed earth.</p> <p>Natural Resources Wales (NRW) states that consideration will need to be given to protected species (Hazel Dormice, Lesser Horseshoe Bats, Brown Long Eared Bat records on site). Furthermore, NRW states that consideration will need to be given to impacts on the SINC, and habitat – ancient mature hedgerows and woodland.</p> <p>As such the ecological appraisal also considered the following species:</p> <p><u>Dormouse</u></p> <p>The site contains hedgerows and woodland of which were assessed to hold high value for dormice. The previous surveys identified the presence of dormice within the SINC located in the north of the site. It was therefore</p>
--	--	--	---

assessed that further surveys would be required to update the status of the site for this species and to inform detailed proposals for the site.

Riparian mammals

The River Ogmores was present along the eastern edge of the Craig-Y-Parcau, with records of both otter and water vole found south of the site. However, the previous surveys identified no evidence of riparian mammals within the development area. Considering the presence of previous records in the area and suitable habitat directly adjacent to the site, it is recommended surveys are undertaken for these protected species and to inform detailed proposals for the site.

Great crested newt

The previous surveys assessed the ponds to be unsuitable for great crested newt (GCN) and that GCN were absent from the site. Since then, it is understood that the previously surveyed ponds have been removed and new wildlife ponds created in the south-west of the main site area. The two water bodies identified during the walkover had relatively low water levels and limited aquatic vegetation. The current proposals indicate the retention and protection of the ponds. Nevertheless, they could provide suitable breeding habitat for amphibians and it is recommended that a Habitat Suitability Index of each of the ponds within 500m of the development site to inform detailed planning application.

Birds

There was a mix of permanent pasture and arable land providing suitable habitat for farmland birds. Also, the hedgerows and their margins within the fields was assessed to provide potential habitat for ground nesting birds. The woodland, hedgerows, scrub and scattered trees were assessed to have high potential for breeding birds. Evidence of barn owl was found in a stable in the south-east of the site. Further surveys for breeding birds have been recommended within section 5 to inform detailed proposals for the site.

Bats

The previous surveys identified roosting lesser horseshoe and brown long-eared bats within Hut 9 in the woodland in the SINC. Since the previous surveys were undertaken, a dedicated bat roost has been created in the south-west of the main site. Additionally, the built structures within the Craig-Y-Parcau area were in extremely poor structural condition and a wide range of bat roosting features were visible for the external walkover. They were assessed to hold high potential for roosting bats. Therefore, it was assessed that an updated assessment of the structures should be undertaken to assess their status for roosting bats. Additionally, emergence/re-entry surveys are recommended. The habitats within both sites contained woodland and hedgerows, offering potential commuting, foraging and roosting habitats for bats may provide potential commuting and foraging habitats for bats. A number of mature trees were also noted which could have potential roosting features for bats.

Badgers

The habitats on site were comprised of woodland, grassland and arable land which have potential to support badgers. However, it should be noted that the previous survey identified badgers to be absent from the site.

Reptiles

Much of the site was comprised of arable land and agriculturally intensified grassland providing negligible potential for reptiles. The key features were assessed to be the sections of grassland and scrub located at the woodland edges. The site was comprised of common and widespread habitats providing low potential habitats for invertebrates. No detailed surveys will be required.

SINC Review

A SINC review undertaken by the Wildlife Trust indicates that the on-site SINC does not appear to have changed significantly since 2011's survey and therefore still qualifies as a SINC. The small section of woodland in the

			<p>field to the south-east is worth removing from the citation as it is isolated and does not appear to add to the site's value. The woodland varies in quality but appears to offer habitat for dormice and bats and there are numerous woodland indicator species. The grassland is not particularly species-rich but adds to the site as a whole. The site suffers from antisocial behaviour including fly-tipping, frequent drug use and signs of semi-permanent habitation that is detrimental to the biodiversity of the site.</p> <p>The review recommended that dormouse tubes are replaced and monitored and that antisocial activities are reduced where feasible. Although the grassland areas are not very diverse they add to the diversity of the site and some scrub control to stop their loss is recommended though not a priority.</p> <p>Overall</p> <p>PPW identifies SINC's as local non-statutory protected sites of which carry less weight than statutory designations, however it is acknowledged that they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection. As such, the Masterplan relating to allocation PLA2: Land South of Bridgend (Island Farm) has included a number of measures to address previously identified ecological constraints including the retention of the majority of the SINC and protection of the artificial bat roost and hedgerows. Furthermore, the masterplan for Island Farm has indicated the retention of SINC land within the site boundary, with the exception of the access road from the A48. Areas of ecological value are proposed for retention including existing sink holes; which offer value for a range of invertebrates, and an ecological enhancement area located in the south-western field; previously enhanced for ecology in relation to the 2008 sports village application. The masterplan also indicates retention of continuous green areas to ensure a continued network of green and blue infrastructure.</p> <p>Further work and surveys are to be undertaken from an ecological perspective in line with the recommendations of the ecological report. However, there were no 'show-stoppers' found at this stage, with appropriate mitigation measures available to ensure that the development of the site is acceptable and any related impacts can be minimised.</p> <p>NRW support the commitment for the future development of the site to follow a Green Infrastructure led approach so that the mixture of uses will be fully integrated and designed around the SINC.</p> <p>Overall, the site has an extensive planning history which has demonstrated that the site can be developed in an ecologically sensitive way through careful scheme design and the use of mitigation measures. Policy PLA2 will ensure that the proposed uses through outlined development requirements are fully integrated into the future development of site.</p> <p>With regards to landscape matters, a Landscape Character Assessment for Bridgend County Borough was prepared by LUC and published in 2013. The document provides guidance on landscape character and, following the adoption of the Local Development Plan, supplements the Green Infrastructure, Biodiversity and Landscape Supplementary Planning Guidance. The Assessment categorises undeveloped land into 15 Landscape Character Areas (LCAs) with the site in question being located within the "Merthyr Mawr Farmland, Warren and Coastline" which runs north-eastwards up from the coast to the southwestern fringe of Bridgend. The Assessment emphasises that the majority of the Merthyr Mawr Farmland, Warren and Coastline LCA falls within the Merthyr Mawr Special Landscape Area, recognising designations such as Merthyr Mawr Warren SAC, SSSI and NNR, Newton Fault RIGS, several Scheduled Monuments, Merthyr Mawr village Conservation Area and the Grade II* Registered Park and Garden of Merthyr Mawr House. Much of the landscape is designated as of Outstanding Historic Importance and all of the coastal area lies within the Glamorgan Heritage Coast. The Assessment also identifies key landscape sensitivities to development-led to change, stressing the important of protecting the nationally important archaeological and cultural heritage of the landscape as an integral part of the wider Landscape of Outstanding Historic Importance, including prehistoric and medieval remains, the dunes' ancient buried archaeology and the Grade II* Merthyr Mawr Estate. The Assessment recommends implementing</p>
--	--	--	---

			<p>management strategies for their continued survival and visibility in the landscape, including through appropriate land management practices and recreation management. As such, the importance of this landscape, and the need for landscape mitigation measures for any local development proposal, is clearly recognised within the Replacement LDP's evidence base and this will be further emphasised within the supporting text to PLA2(2) for completeness.</p> <p>In particular, the southern boundary of the Land South of Bridgend (Island Farm) proposed allocation is important as it lies adjacent to a historic landscape as identified by the LCA. The Replacement LDP will seek to protect and conserve this landscape's character and features by appropriate development mitigation measures. Policy PLA2 will ensure the design and layout of the site has regard to the surrounding landscape, minimising visual impacts through the inclusion of mitigation measures that provide links with the existing landscape and access features. Appropriate landscaping treatments must be utilised along the southern fringes of the site in order to minimise visual impacts on adjacent uses.</p> <p>There will, undoubtedly, be an element of landscape change, although, as aforementioned, the existing permissions (P/08/1114/OUT, P/14/354/RES, P/14/823/RES and P/14/824/RES refer) on the site are considered extant. A Landscape and Visual Impact Assessment (LVIA) was undertaken as part of the Environmental Statement submitted alongside the 2008 outline application for the sports village at Island Farm. The LVIA evaluated the significance of landscape and visual impacts by assessing the sensitivity of the existing baseline landscape and visual resources of the application site and wider area and the magnitude of the change that would occur to the site and surroundings during the various phases of the development. The LVIA was prepared on the basis of proposals for a sports village which included buildings of close to 20m in height as well as, in the cases of the proposed stadia elements, a high level of massing. The LVIA concluded that "while there will be permanent residual views of buildings, these will be predominantly negligible, minor or moderate significance following the implementation of the comprehensive mitigation measures at the end of the 15 year assessment period. Views are a subjective matter and have been assessed as being adverse because of the scale of change in the appearance of an undeveloped landscape. It is anticipated that the majority of receptors will embrace these community led proposals and be stimulated by the quality and appearance of this development. The loss of landscape features will be significantly compensated by the scale of proposed planting and through improved landscape management, will give rise to beneficial landscape and ecology effects in the medium and long term future". A series of mitigation measures were recommended. Broadly, the same means of mitigation are proposed as part of the newly proposed development and will include strong boundary planting, the creation of an undulating roofscape, the use of muted recessive colours, the use of horizontal and vertical bands of colour and texture, and using cut and fill techniques to reduce perceived scale and mass of buildings. It should also be noted that the proposed mixed-use development at Land South of Bridgend (Island Farm) will result in significantly reduced building heights and a reduced feeling of massing when compared to the previously permitted sports village scheme.</p> <p>The site promoter has equally considered the landscape effects in addition to mitigation measures. The site is not subject to any local or national, statutory or non-statutory landscape designations, albeit there are listed buildings and TPOs on the edge of the site (neither are directly affected by the proposed development). LANDMAP analysis reflects that the sites are not subject to any designations. Whilst scoring as "high" and "outstanding" against certain criteria, it also performs as "medium" and "low" for other criteria and overall the level of sensitivity is comparable to similar parcels of land on the urban fringe of Bridgend. Further, the development of the site is not considered to undermine any of the six landscape sensitivities that are identified as typifying the Merthyr Mawr Farmland, Warren and Coastline Landscape Character Area. A detailed, updated LVIA will be required to inform and accompany further masterplanning work (as part of a future planning application). This more detailed assessment will include finer details relating to roofscapes and landscaping.</p>
--	--	--	---

			<p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
955	Keep merthyr mawr for its nature content	Protect Merthyr Mawr	<p>Comments noted. The land surrounding Merthyr Mawr is recognised within the Replacement LDP and is very much protected by various designations and policies (see Appendix 25 – Special Landscape Designations and Appendix 26 – Landscape Character Assessment). As highlighted by Policy SP17 the historic landscape of Merthyr Mawr Warren is a National Nature Reserve. These are protected under the Wildlife and Countryside Act 1981, as amended by the Countryside and Rights of Way (CROW) Act 2000, the Natural Environment and Rural Communities (NERC) Act 2006 and the Environment (Wales) Act 2016. Policy SP17 specifically seeks to protect statutorily designated sites of national importance and any development proposal which affects such sites will be subject to special scrutiny to establish any potential or indirect effects. The onus will be firmly placed on any potential developer and/or owner to clearly demonstrate the case for the site's development, and why development should not be located elsewhere on a site of less significance to nature conservation. Sensitive design in conjunction with appropriate planning conditions and/or planning obligations/agreements will be pursued by the local planning authority with a view to overcoming potential adverse impacts on the environmental resource, and to ensure protection and enhancement of a site's nature conservation interest.</p> <p>Merthyr Mawr Warren is also designated as a Special Landscape Area (See Policy DNP4 and Appendix 25 – Special Landscape Designations), in recognition of the surrounding character and quality of the landscape. Policy DNP4 protects such designations from inappropriate development. In order to be acceptable, wherever possible, development within a SLA should retain and enhance the positive attributes of its landscape and seek to remove or mitigate any negative influences. In order to achieve this, the design, scale and location of development should respect the special landscape context. In particular, design should reflect the building traditions of the locality in its form, materials and details and aim to assimilate the development into the wider landscape.</p> <p>Merthyr Mawr Village is also designated as a Conservation Area in recognition of the area's special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance. In considering development proposals, the Council will seek to resist new development or the demolition of existing buildings unless it would preserve or enhance the character and appearance of the conservation area. (See Policy DNP11).</p>
975	These are lies. The proposed developments are in direct conflict with this strategy and abuse the word periphery. The people who drew up this plan should be ashamed of themselves	Concerns relating to the proposed developments / plan	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of allocated Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p>
976	I object to the houses being built on green spaces especially on Island Farm and between Bryntirion & Laleston	Objection to proposed Strategic Housing Allocations PLA2 and PLA3	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such candidates sites PS.1 Island Farm & 308.C1 Land West of Bridgend were considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>Strategic Allocation PLA3 Land West of Bridgend will deliver residential units, including affordable dwellings, in addition to a new one and a half entry Primary School, recreation facilities, public open space, plus appropriate community facilities.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with their proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
983	No		Comments noted.
987	My principal comment relating to "sustainable growth areas" is that the definition of "under-utilised sites" is open to misinterpretation. Island farm and the land immediately surrounding this area is not under-utilised; it is just not available for development. The land more socially valuable if it is not developed	Comments relating to the definition of sustainable growth areas	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan

			<p>requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site PS.1 Island Farm was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>Whilst greenfield sites such as PLA2 Island Farm have been allocated for development, additional long-term Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p>
999	N/A	N/A	N/A
100 1	Island Farm Development The current adopted LDP identifies Island Farm as a Strategic Employment Site and I	Concerns regarding Strategic	Comments noted. In terms of the existing LDP employment allocation on Island Farm, the 2019 Economic Evidence Base Study (EEBS) (See Appendix 14), indicates that whilst there is planning permission for a stadium

<p>understand that there is a valid planning permission on the site to deliver such development. Given that this site is good quality agricultural land (Grades 2 and 3a), the adopted LDP presumably had to demonstrate over-riding need for employment land in this location. What has changed to demonstrate that the site is no longer needed for Strategic Employment? If the site is not needed for Strategic Employment it should be released to safeguard the agricultural land. Why is Island Farm now suitable for a Sustainable Growth Area (PLA2) - which is largely residential rather than employment? The evidence demonstrating over-riding need for such residential development in this area - which could be delivered elsewhere - is very limited. Good quality agricultural land will be lost to development without sufficient justification. There is very little detail - and potentially contradictory policy - between PLA2 and interactions with Bridgend town centre. E.g. Transport policies PLA8 and PLA9 to improve the A48 for vehicles are very likely to worsen the poor access for pedestrians and cyclists and will not result in the expressed green lung between Merthyr Mawr and Newbridge Fields. PLA2 along with the other housing proposals in this area of Bridgend will lead to an unacceptable increase in traffic volumes on the main roads and the minor road network in the area.</p>	<p>Allocation PLA2: Island Farm</p>	<p>plus other sports / leisure uses and 221,000 sq m office, and some of the leisure element is coming forward, there has been no known interest in expanding the Science Park through any form of B1 use.</p> <p>As identified by Background 15: The Best of Most Versatile Agricultural Land, Island Farm consists of nearly 44ha of BMV agricultural land as identified by Version 2 of the Predictive ALC Map. An earlier Agricultural Land Classification survey was also prepared in August 2009 as part of the outline application for the sports village at the Island Farm site. This survey found that the site is a mix of Grade 2 (6.5ha) and Grade 3a (19.5ha). The survey also found that the ability for the site to be productively farmed was limited by the stoniness of the soil and the large number of hedgerows. It was concluded that declining revenue from cereal production and the site forming part of a larger farmstead meant that the ceasing of cultivation would have limited economic impact.</p> <p>However, and moreover, development has already lawfully commenced on this site and re-allocation within the Replacement LDP would therefore not result in the loss of any additional BMV agricultural land. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Ref: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved 'Green Bridge'. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of 'enabling works' that had been approved under P/14/354/RES and P/14/824/RES. These 'enabling works' are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive; • Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a 'commencement of development' triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the 'enabling works' constituted a material operation and a lawful commencement of reserved matters</p>
---	---	---

			<p>consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council's opinion is that the permissions are extant. Hence, re-allocation of this site as a mixed use scheme (including residential) within the Replacement LDP would not result in the loss of any additional BMV agricultural land.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a 'green lung' that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
--	--	--	---

			<p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>It must be noted that the proposed development and masterplan does not direct vehicles towards New Inn Road and the Dipping Bridge. Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to</p>
--	--	--	--

			enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.
1018	I oppose to the development proposed at Craig y parcu and island farm. The infrastructure is not in place to support so many houses with pressure on access to Broadlands off the A48 roundabout, Ewenny Roundabout and the stretch of road between the two. This has had a number of fatal accidents on. The welsh government grant money to improve road safety might have claw back conditions as a result? The pressure on this road at peak times would be awful. Also there would be a loss of green spaces and woodland which is an area of specific interest	Objection regarding Strategic Allocation PLA2: Island Farm and Housing Allocation COM1(2): Craig y Parcau	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate sites PS.1 Island Farm & PS.2 Craig y Parcau were considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p>

			<p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of traffic, the proposed allocations (PLA2: Land South of Bridgend (Island Farm) / COM1(2): Craig y Parcau) are supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p>
--	--	--	--

			<p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>In relation to nature/biodiversity, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health. For development to be sustainable, it needs to be soundly based on good environmental assessments, and to be well planned and controlled with regard to its environmental impact, in order to conserve and enhance biodiversity.</p> <p>There is clear guidance and legislation with regard to the protection of species and habitats recognised in legislation, Planning Policy Wales (PPW) and TAN5 Nature Conservation and Planning. The most relevant statutory requirements are set out in Section 61 of the Planning and Compulsory Purchase Act 2004, the</p>
--	--	--	---

			<p>Conservation of Habitats and Species Regulations 2017, Environment (Wales) Act 2016 Section 6 Biodiversity and Resilience of Ecosystems Duty and Section 7 Priority Habitats and Species, Section 11 of the Countryside Act 1981 and Section 28G of the Wildlife and Countryside Act 1981. Annex 1 of TAN5 lists all the other relevant legislation.</p> <p>To comply with the Environment (Wales) Act 2016 (Section 6 Duty) the LDP Strategy will seek to enhance the biodiversity and resilience of the County Borough's ecosystems through native species landscaping, careful location of development, the creation of green corridors, and open space management. It is important that biodiversity and resilience considerations are taken into account at an early stage in both development plan preparation and when proposing or considering development proposals. All reasonable steps must be taken to maintain and enhance biodiversity and promote the resilience of ecosystems and these should be balanced with the wider social needs of local communities. Only in exceptional circumstances, where it is in the public interest, will new development be located where it may have an adverse impact on sites designated for their importance for nature conservation. Robust mitigation and compensation will be provided wherever this situation is unavoidable, in line with considered advice from statutory and advisory organisations.</p> <p>The Environment Act (Section 6) sets out a framework for planning authorities to maintain and enhance biodiversity to provide a net benefit for biodiversity through a proactive and resilient approach. Policies SP17 and DNP6 of the LDP set the framework to deliver on this premise, as set out in Policy 9 (NDF). Policy DNP6 (LDP) will be revised to ensure it is based on a net benefit approach to achieve these outcomes.</p> <p>It is acknowledged that Strategic Allocation PLA2: Land South of Bridgend (Island Farm) contains a Site of Importance for Nature Conservation (SINC) (The Island Farm POW Camp) of which covers 14.03 hectares of land within the allocated site. PPW identifies SINC's as local non-statutory protected sites. Paragraph 6.4.20 states that 'Although non-statutory designations carry less weight than statutory designations, they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection in development plans and the development management process.'</p> <p>Existing Consent</p> <p>In relation to Strategic Allocation PLA2: Land South of Bridgend (Island Farm), development has already lawfully commenced on this site. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p> <p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved 'Green Bridge'. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow</p>
--	--	--	--

			<p>a sequence of 'enabling works' that had been approved under P/14/354/RES and P/14/824/RES. These 'enabling works' are described as:</p> <ul style="list-style-type: none"> • The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; • Undertaking earthworks to form a plateau for the Tennis Centre; • Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive; • Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a 'commencement of development' triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the 'enabling works' constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council's opinion is that the permissions are extant.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a 'green lung' that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. A final masterplan must be prepared and agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will need to demonstrate how the development will create a well-connected, sustainable mixed-use urban extension to Bridgend, comprising a number of character areas that integrate positively with the existing landscape, SINC, adjacent Grade II* listed Merthyr Mawr House, existing housing clusters, community facilities, Active Travel Networks and public transport facilities. An illustrative masterplan will also be included in the final version of the Replacement LDP to enable all parties to understand how the site will be developed in broad terms, including proposed land uses, access, infrastructure requirements, constraints and areas of protection. This masterplan will clearly identify the location of the SINC in the context of the wider allocation.</p> <p>Ecological mitigation measures already implemented</p> <p>As part of the existing consent, a mitigation strategy was produced in 2009 to offset the impacts of the development. It was proposed that the SINC and south west field would become a wildlife conservation area within the new development. Surveys at the site found dormice <i>Muscardinus avellanarius</i> to be present, both within the woodland and scrub in the SINC and in the hedgerows of the agricultural fields. These areas are also known to be used by bats for foraging and commuting purposes, and the SINC area contains a roost site for lesser horseshoe bats <i>Rhinolophus hipposideros</i> and brown long-eared bats <i>Plecotus auritus</i>.</p>
--	--	--	---

			<p>As part of the development process some areas of these habitats were to be lost, and modification to the remaining areas due to the impacts of the development, including noise and light spillage. Part of the mitigation strategy to counter these losses included the creation of new habitats suitable for the relevant species. As such, habitat design was guided by the requirements of the protected species of which had the potential to utilise the site. In addition to dormice and bats, a further condition of the existing consent required the habitat requirements of Great Crested Newts <i>Triturus cristatus</i> to be taking into account.</p> <p>The habitat design for the consented scheme included:</p> <ul style="list-style-type: none"> • Tree and Scrub Planting: translocation and planting new trees and scrub in the south-west field, providing an alternative for displaced animals, including dormice, bats, and shelter for reptiles and amphibians. • Hedgerow Enhancement: enhancement and translocation of hedgerows from the centre of the site to the eastern site boundary has been undertaken, to create continuous hedge lines which help to buffer the expanded SINC site, and to filter out noise and light from development. Additionally, it provides a continuous flight line for bats and allow dormice to disperse more easily along the hedgerows. • Bat Roosting Building: a purpose-built bat roost building has been constructed within the south-west field, providing a suitable roost site for both lesser horseshoe and brown long-eared bats, which have both been found roosting in the old hut within the SINC. The building was constructed on the lesser horseshoe key flight line to enable them to rapidly locate it, and also be close to good feeding habitats on the Merthyr Mawr and the River Ogmore. • Dormouse Nest Boxes: 35 dormouse nest boxes placed within the field, to provide shelter for dormice that are to be displaced from other areas of the site. Placed within the north-east and south-east hedgerows, at approximately 10m interval. • Pond creation: two new ponds have been created within the south-west field, with the primary aim of providing habitat for Great Crested Newts. • Grassland Creation: rough grassland created around the pond to mitigate loss of existing grassland. <p>Proposed mitigation</p> <p>As part of the proposed development of Strategic Allocation PLA2: Land South of Bridgend (Island Farm), an ecological appraisal of the site has been prepared by Ethos Environmental Planning in order to:</p> <ul style="list-style-type: none"> • To establish baseline ecological conditions and determine the importance of ecological features present within the specified area; • To identify the existing habitats on site; • To identify the potential for protected species; • To identify if any further surveys are required with regards to protected habitats or species; and • To identify any key ecological constraints and make recommendations for design options to avoid significant effects on important ecological features/ resources. <p>General habitat – Existing</p> <p>The site was found to be comprised predominately of arable land in its winter stubble with very few plant species noted. The arable field margins provide good habitat for a range of species and buffer the existing hedgerows. There were numerous hedgerows across the site which ranged from mature hedgerows with trees and hazel coppice, to intensively managed species-poor hedgerows which dissected the arable fields. Two hedgerows had been translocated recently to the eastern boundary and appeared to show new growth.</p> <p>Two ponds which were created as part of the previous applications' ecological mitigation works were noted; however, neither was holding much water. Whilst there was very limited aquatic vegetation in the pond, vegetation in the immediate area included large swathes of tall ruderal and ephemeral/short perennial.</p>
--	--	--	---

			<p>Part of the site, in the northern section, was designated as a SINC partially due to the mosaic of grassland, woodland and scrub. This area is proposed for retention within the current masterplan, with the exception of an access road. Part of the site had been subject to clearance to enable works from the previous development proposals. The area cleared was not within the SINC identified on site. Detailed surveys will be undertaken to consider the botanical diversity of this area.</p> <p>Part of the area was brownfield land and whilst it was not an appropriate time of year for botany surveys, it was apparent that there were varied nutrient levels and areas of disturbed ground which are likely to result in higher botanical diversity.</p> <p>Built structures were also noted. These included 'Hut 9' a former prisoner of war camp from World War 2 located within the woodland in the north of the site and a dedicated bat roost located in the south-west of the site.</p> <p>A number of sink holes were noted across the site. These ranged from those which had apparently been present for a long period of time and had mature trees growing within them, to those very recently emerging and just comprising of small areas of collapsed earth.</p> <p>Natural Resources Wales (NRW) states that consideration will need to be given to protected species (Hazel Dormice, Lesser Horseshoe Bats, Brown Long Eared Bat records on site). Furthermore, NRW states that consideration will need to be given to impacts on the SINC, and habitat – ancient mature hedgerows and woodland.</p> <p>As such the ecological appraisal also considered the following species:</p> <p><u>Dormouse</u> The site contains hedgerows and woodland of which were assessed to hold high value for dormice. The previous surveys identified the presence of dormice within the SINC located in the north of the site. It was therefore assessed that further surveys would be required to update the status of the site for this species and to inform detailed proposals for the site.</p> <p><u>Riparian mammals</u> The River Ogmore was present along the eastern edge of the Craig-Y-Parcau, with records of both otter and water vole found south of the site. However, the previous surveys identified no evidence of riparian mammals within the development area. Considering the presence of previous records in the area and suitable habitat directly adjacent to the site, it is recommended surveys are undertaken for these protected species and to inform detailed proposals for the site.</p> <p><u>Great crested newt</u> The previous surveys assessed the ponds to be unsuitable for great crested newt (GCN) and that GCN were absent from the site. Since then, it is understood that the previously surveyed ponds have been removed and new wildlife ponds created in the south-west of the main site area. The two water bodies identified during the walkover had relatively low water levels and limited aquatic vegetation. The current proposals indicate the retention and protection of the ponds. Nevertheless, they could provide suitable breeding habitat for amphibians and it is recommended that a Habitat Suitability Index of each of the ponds within 500m of the development site to inform detailed planning application.</p> <p><u>Birds</u> There was a mix of permanent pasture and arable land providing suitable habitat for farmland birds. Also, the hedgerows and their margins within the fields was assessed to provide potential habitat for ground nesting birds. The woodland, hedgerows, scrub and scattered trees were assessed to have high potential for breeding birds.</p>
--	--	--	---

Evidence of barn owl was found in a stable in the south-east of the site. Further surveys for breeding birds have been recommended within section 5 to inform detailed proposals for the site.

Bats

The previous surveys identified roosting lesser horseshoe and brown long-eared bats within Hut 9 in the woodland in the SINC. Since the previous surveys were undertaken, a dedicated bat roost has been created in the south-west of the main site. Additionally, the built structures within the Craig-Y-Parcau area were in extremely poor structural condition and a wide range of bat roosting features were visible for the external walkover. They were assessed to hold high potential for roosting bats. Therefore, it was assessed that an updated assessment of the structures should be undertaken to assess their status for roosting bats. Additionally, emergence/re-entry surveys are recommended. The habitats within both sites contained woodland and hedgerows, offering potential commuting, foraging and roosting habitats for bats may provide potential commuting and foraging habitats for bats. A number of mature trees were also noted which could have potential roosting features for bats.

Badgers

The habitats on site were comprised of woodland, grassland and arable land which have potential to support badgers. However, it should be noted that the previous survey identified badgers to be absent from the site.

Reptiles

Much of the site was comprised of arable land and agriculturally intensified grassland providing negligible potential for reptiles. The key features were assessed to be the sections of grassland and scrub located at the woodland edges. The site was comprised of common and widespread habitats providing low potential habitats for invertebrates. No detailed surveys will be required.

SINC Review

A SINC review undertaken by the Wildlife Trust indicates that the on-site SINC does not appear to have changed significantly since 2011's survey and therefore still qualifies as a SINC. The small section of woodland in the field to the south-east is worth removing from the citation as it is isolated and does not appear to add to the site's value. The woodland varies in quality but appears to offer habitat for dormice and bats and there are numerous woodland indicator species. The grassland is not particularly species-rich but adds to the site as a whole. The site suffers from antisocial behaviour including fly-tipping, frequent drug use and signs of semi-permanent habitation that is detrimental to the biodiversity of the site.

The review recommended that dormouse tubes are replaced and monitored and that antisocial activities are reduced where feasible. Although the grassland areas are not very diverse they add to the diversity of the site and some scrub control to stop their loss is recommended though not a priority.

Overall

PPW identifies SINC's as local non-statutory protected sites of which carry less weight than statutory designations, however it is acknowledged that they can make a vital contribution to delivering an ecological network for biodiversity and resilient ecosystems, and they should be given adequate protection. As such, the Masterplan relating to allocation PLA2: Land South of Bridgend (Island Farm) has included a number of measures to address previously identified ecological constraints including the retention of the majority of the SINC and protection of the artificial bat roost and hedgerows. Furthermore, the masterplan for Island Farm has indicated the retention of SINC land within the site boundary, with the exception of the access road from the A48. Areas of ecological value are proposed for retention including existing sink holes; which offer value for a range of invertebrates, and an ecological enhancement area located in the south-western field; previously enhanced for ecology in relation to the 2008 sports village application. The masterplan also indicates retention of continuous green areas to ensure a continued network of green and blue infrastructure.

			<p>Further work and surveys are to be undertaken from an ecological perspective in line with the recommendations of the ecological report. However, there were no 'show-stoppers' found at this stage, with appropriate mitigation measures available to ensure that the development of the site is acceptable and any related impacts can be minimised.</p> <p>NRW support the commitment for the future development of the site to follow a Green Infrastructure led approach so that the mixture of uses will be fully integrated and designed around the SINC.</p> <p>Overall, the site has an extensive planning history which has demonstrated that the site can be developed in an ecologically sensitive way through careful scheme design and the use of mitigation measures. Policy PLA2 will ensure that the proposed uses through outlined development requirements are fully integrated into the future development of site.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
103 1	Not sure how Bridgend developmental plans will benefit in context of the valleys, they also need their own infrastructure of better roads/walks and tourist spots for access to Rhondda tunnel and zip development	Concerns regarding lack of infrastructure relating to the valleys	<p>The Strategy recognises the need to deliver wider regenerative benefits to Valleys communities at a scale which acknowledges their infrastructure capacity, topography and geographical constraints. Therefore, Maesteg and the Llynfi Valley is allocated as a Regeneration Growth Area, reflecting the fact that it demonstrates the largest capacity to accommodate regeneration-led growth within the Valleys communities. There are individual sites within this area that already have the benefit of planning permission or are the subject of development briefs or master planning exercises to facilitate their delivery and regeneration. A substantial number of these sites are also brownfield or are under-utilised, whilst also being aligned to transport hubs, thereby demonstrating high credentials in terms of sustainable development and placemaking. However, it is acknowledged that some will require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to facilitate delivery.</p> <p>The Ogmore and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p> <p>The Strategy equally recognises the role that Place Plans can have in assisting with identifying small, local development sites that reflect local distinctiveness and address local, specific community scale issues. Place Plans are to cover a community area and their preparation should ideally, although not exclusively, be led by Town and Community Councils and/or related steering groups. This will allow local groups to take the initiative and help promote (i.e. via development briefs) small, locally distinctive developments at a scale commensurate with the respective settlement and in accordance with the Replacement LDP.</p> <p>Furthermore, Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including settlements within the valleys, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
103 7	See first box		Comments noted.

105 2	No		Comments noted.
106 5	Infrastructure to be done first before ANY other contracts awarded	Infrastructure needed before development	Comments noted. In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
107 7	The proposed development alongside the A48 to the south will be cut off from the rest of the town by the A48 and the gridlock we sometimes see at 5 pm will be a daily occurrence	Concerns regarding Strategic Allocation PLA2: Island Farm and Housing Allocation COM1(2): Craig y Parcau	<p>Comments noted. The proposed allocations (PLA2:Land South of Bridgend (Island Farm) / COM1(2): Craig y Parcau) are supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p>

			<p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p>
108 3	<p>The housing built south of the A48 will be cut off from the rest of Bridgend. It will not be integrated. How does the council propose to deal with the transport issues which will be created by this housing? There is no public transport from Island Farm, cars will increase by perhaps up to 1500 in the area in a place where New Inn Road is already a rat run off the A48 and can barely cope with the existing traffic. The impact of these houses on the infrastructure of the area will be huge - GP surgeries already full, roads exceptionally busy, schools will not</p>	<p>Concerns regarding Strategic Allocation PLA2: Island Farm and Housing Allocation COM1(2): Craig y Parcau</p>	<p>Comments noted. As part of the proposed allocation of Land South of Bridgend (Island Farm), development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA2 – Page 67). The provision of new residential units, including affordable dwellings, will be incorporated alongside a new one entry primary school with co-located nursery, the re-location of Heronsbridge Special School, leisure facilities, recreation facilities, public open space, plus appropriate community facilities, employment and commercial uses.</p> <p>In terms of traffic, the proposed allocations (PLA2:Land South of Bridgend (Island Farm) / COM1(2): Craig y Parcau) are supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2</p>

<p>be able to cope and the green land on the edge of Bridgend used for exercise is being swallowed up by housing. I do not see any to quote your words 'positive impacts and benefits of growth' of building 1000 houses on green fields swallowing up countryside. Who exactly is this benefiting? We do not have a town centre that is fit for anyone, it is rundown and depressing.</p>		<p>prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. 			<p>link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm and Craig y Parcau proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm and Craig y Parcau proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm and Craig y Parcau sites include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm and Craig y Parcau proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with their proposed range of land uses will likely produce a wide range of significant beneficial effects.</p> <p>In terms of the town centre, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate</p>
--	--	--	---

			<p>a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>Furthermore the Council has recently outlined a vision for Bridgend Town Centre through the publication of the Bridgend Town Centre Masterplan. The vision brings together enterprise, employment, education, in-town living, shopping, culture, tourism and well-being within a historic setting. The masterplan will be used as a planning tool to improve the town centre and will be used to secure future funding to deliver identified projects. It forms the starting point for the decision making process which will follow. No decisions will be made without full engagement and there will be extensive consultation.</p> <p>Bridgend town centre consists of a variety of uses, which has formed the basis of eight development zones, within which 23 relevant projects have been identified, plus a number of site wide projects.</p> <p>The development zones include, The Railway Station Area; Brackla, Nolton and Oldcastle; The Retail Core; Café and Cultural Quarter; The Northern Gateway; Riverside; Newcastle; and Sunnyside.</p> <p>The regeneration projects identified in the Bridgend Town Centre Masterplan will be implemented in various phases over the next 10 years. An action plan has been developed to assist with formulating a project timeline, prioritising and planning projects and furthermore, identifying what resources or inputs are needed to deliver individual projects.</p> <p>The successful delivery of the masterplan will be dependent on an active partnership approach between key stakeholders from the public, private and third sectors. A strategic approach to project delivery will be taken, with BCBC acting as a key facilitator to bring together key project enablers to deliver projects that form part of the overall vision for the regeneration of the Bridgend town centre.</p> <p>Funding applications will be made to number of funding bodies to deliver projects, some of which include:</p> <ul style="list-style-type: none"> • UK Government • Welsh Government • Cardiff Capital Region • Private Investment • And various other funders
111 6	The roads around Bridgend (A48 in particular) are already far too busy. It's almost impossible to join the A48 from Merthyr Mawr Road. People have been killed on the A48 with current traffic levels. The area cannot take any more houses / traffic / sewage / loss of green space etc	Concerns regarding traffic on A48 / infrastructure	Comments noted. In terms of traffic, the proposed allocations (PLA2:Land South of Bridgend (Island Farm) / COM1(2): Craig y Parcau) are supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore

			<p>considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
122 4	No		Comments noted.
138 5	Proposed site: SP2(2)/PLA2 Land South of Bridgend (Island Farm) Proposal for 847 houses etc and Com 1(2) Craig-Y-Parcau, Proposal for 110 houses Settlement Boundary - Both these sites are outside of the settlement boundary of Bridgend as defined by the A48.	Strategic Allocation PLA2: Island Farm and Housing Allocation COM1(2): Craig y Parcau are located outside the settlement boundary	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate sites PS.1 Island Farm & PS.2 Craig y Parcau were considered appropriate for allocation.</p>
570	Again, Lack of infrastructure, no regard to public health and wellbeing, lack of green spaces, damage to ecology and without thought to future generations.	Concerns relating to lack of infrastructure and green spaces, health and well being, damage to ecology and future generations.	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses,</p>

			<p>existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. Sites will be required to deliver affordable housing, education provision, recreation facilities, public open space, active travel provision plus appropriate community facilities.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of green spaces and ecology, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the</p>
--	--	--	--

			<p>Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of well being, the Replacement LDP has been prepared in line with the Well-Being of Future Generations Act of which places a duty on public bodies to carry out sustainable development. The LDP Vision has been developed to take into account the 7 Well-being Goals and Bridgend's Local Well-being Plan with the specific characteristics and key issues affecting the County Borough. Background Paper 10 (See Appendix 50) demonstrates that the Replacement LDP assists in the delivery of the 7 Well-being Goals.</p> <p>The Replacement LDP has also been prepared in line with Bridgend Public Service Board Well-being Plan objectives. The Bridgend Well-being Plan outlines the things that Bridgend Public Service Board will work together on over the next five years; our wellbeing objectives and steps, and how we want Bridgend to look in 10 years' time. Background Paper 9 (See Appendix 49) demonstrates that the Replacement LDP assists in the delivery of the local well-being plan.</p>
120 6	<p>While developing brownfield sites has its merits, it must be borne in mind that hundreds of houses may put significantly more pressure on existing infrastructure than a sparsely attended commercial yard. When considering such development, the question of how, or even whether, the infrastructure can be developed to support it should be the primary concern, not an inconvenient afterthought.</p>	<p>Concerns in relation to pressure on existing infrastructure due to brownfield sites.</p>	<p>Commented noted. As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision.</p> <p>As documented within the SA Report and Spatial Strategy Options Background Paper, the majority of existing, viable, brownfield regeneration sites have recently been delivered under the existing LDP or are committed and expected to come forward within the next few years. However, remaining viable opportunities on previously developed land are exhausted, therefore some greenfield sites are required in a sustainable manner through complementary allocations on the edge of existing settlements. Identification of appropriate Sustainable Urban Extensions has been undertaken in accordance with the Site Search Sequence and other requirements set out in Planning Policy Wales, as documented in supporting evidence to the Plan. This includes the Candidate Site Assessment, Spatial Strategy Options Background Paper, Housing Trajectory Background Paper and Minimising the Loss of BMV Agricultural Land Background Paper. The rationale for the proposed allocations within the Deposit Plan is clearly outlined in the Candidate Site Assessment. Without exception, all proposed sites are supported by a large body of technical and viability evidence to demonstrate their deliverability.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and</p>

			<p>discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of</p>
--	--	--	--

			<p>allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
111 9	<p>The Ogmere valley and schools would greatly benefit from additional land additions to encourage more use of outdoors. Activities such as developing 'forest schools' could be implemented.</p>	<p>Suggestion for additional land for outdoor activities.</p>	<p>Comment noted. The Ogmere and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability-based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the</p>

			Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.
127 1	For the Garw and Ogmore the word 'capitalize' is not invigorating me with confidence.	Concern in relation to use of vocabulary.	Comment noted. The Ogmore and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.
562	No	No changes proposed	Comments noted.
585	Can not see how the expansion of Porthcawl is going to benefit the community.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>

			<p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p>
589	<p>Growth is necessary but should be done with a good mix and without using all the space for revenue generating housing. A good balance of mixed use is required to enhance the area and bring those not living there to also use the area</p>	<p>Mix of uses required</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver</p>

			<p>a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p>
594	Porthcawl has enough houses and not enough leisure facilities so I object to housing	Objection relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of</p>

			<p>which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Furthermore, Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
596	More housing more tax revenues	More housing more tax revenues	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active</p>

			<p>travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p>
665	<p>Regeneration growth areas. To the best of my knowledge the meaning of regeneration is the enhancement of an area for the benefit of future generations. Can anyone explain why the building of a supermarket and five storey apartments blocks on salt lake car park in porthcawl will give pleasure to future generations. On a sunny day porthcawl is inundated with families wanting to enjoy our beaches. Concreting over our main car park will prevent future generations enjoying our town. Quite often all porthcawls car parks are full to capacity and car owners often have to illegally park on grass verges. Porthcawl will become a no go area if this crazy plan comes to fruition. Surely the mega millions of pounds that the council will acquire when they sell the land at Sandy bay would pay for the resurfacing of salt lake car park.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs. As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will</p>

			<p>be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans. However, it is important to note that the proposed foodstore will be subject to a future planning application.</p> <p>The Council have also commissioned consultants to undertake a Landscape/Seascape and Visual Appraisal of the proposed regeneration. The appraisal assesses the proposed land use, storey height and density parameters. The assessment concludes that the development would not have an adverse impact on the Landscape/Seascape of Porthcawl, subject to appropriate design responses being incorporated at detailed design stage. The assessment recognises that the development offers to impose a dramatic and positive change across an extensive area, replacing areas of dereliction with new or enhanced accessible open spaces and high-quality buildings and facilities. Further detailed assessments and considerations will be undertaken, in order to influence the design of the development, including a detailed landscape and visual assessment that will assist in identifying detailed mitigation of adverse effects.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>Furthermore, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p>
675	the regeneration growth area of Porthcawl will not benefit the community as it should concentrate on attracting visitors to the town, not filling prime tourist sites with housing.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
694	no	No changes proposed	Comments noted.
695	Provide well paid Jobs first then homes. You are putting the cart before the horse. Why not come clean and say that there are not enough houses instead of dressing it up with the economy. How will houses provide long term employment?	Concerns regarding employment	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.

			<p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
701	houses already being built around Porthcawl causing overcrowding without the facilities of surgery or traffic build up being taken into consideration.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades
702	Major transport issues in Porthcawl as the majority of bus routes have ceased. Only mode of transport is by car. If one doesn't drive or are elderly this is a major problem as if one is not able to walk into the town the only option is a taxi	Concerns relating to transport in Porthcawl	<p>Comments noted. Whilst it is beyond the scope of the LDP to control the operation of bus services, a new 'bus terminus' may be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p>
706	No	No changes proposed	Comments noted.

710	The regeneration of Porthcawl should not concentrate on building new residences without supporting infrastructure which is perceived to be the policy of BCBC. Regeneration should concentrate on providing better amenities to attract visitors and a younger residential age bracket .	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades <p>In terms of leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
713	No	No changes proposed	Comments noted.
714	I see little strategy if I'm honest	Lack of strategy	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise</p>

			<p>developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>
715	Ensure any development is in keeping with the surroundings	Ensure development is in keeping with surroundings	<p>Comments noted. Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p>
718	Regeneration areas of Porthcawl - has to have an enhanced plan for the swelling of the population during the summer months and the traffic gridlock that comes with a sunny day. The proposals for so many more houses has to have infrastructure and enhanced wellbeing, play, sustainable growing solutions. The spatial strategy for the whole of the borough will have an impact on Porthcawl. The nature reserve at Cefn Cribwr and the old quarry site may be an opportunity for diversion.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of well-being and play, Policy PLA1 requires 3.51 hectares of public open space comprising of Local Areas for Play (LAPs), Local Equipped Areas for Play (LEAPs) and Neighbourhood Equipped Areas for Play (NEAPs) to be incorporated within these areas of open space.</p> <p>Policy PLA1 will also ensure that green infrastructure is incorporated as an intrinsic element of future detailed proposals across the regeneration area. There are a number of potential options for green infrastructure design that could be incorporated as part of future development within the regeneration area including the following:</p> <ul style="list-style-type: none"> • Create an extensive viable network of green corridors and natural habitat throughout development which connects larger or more expansive open spaces for both people and wildlife designed around existing site assets;

			<ul style="list-style-type: none"> • Provide pleasant, safe and linear routes for active travel such as walking and cycling for utility, recreation and health promotion; • Ensure where possible streets and roads are tree-lined or contain soft landscaping appropriate to local character, habitats and species within the area; • Utilise SUDs to provide additional multi use green space and enhance connectivity between habitats for enhanced for biodiversity; • Include bat boxes, bricks or lofts and bird boxes on all housing, to reflect the species within the area; • Harvest, store and re-use rainwater in low carbon systems; • Create natural green spaces and wild or free play areas in the urban setting; • Create a network of streets, open spaces and parks, with safe and legible routes linking them to homes and schools; • Enhance the transport system and help reduce effects of air pollution through the provision of verges of priority habitat, hedgerow, wildflower rich or rough grassland; • Provide public access to green infrastructure assets where appropriate; and • Incorporate insect attracting plants, hedgerows, log piles, loggaries and other places of shelter for wildlife refuge/hibernation within structural landscaping and open spaces. <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>Furthermore, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p> <p>In terms of transport infrastructure, Policy PLA1 ensures that development of the site will require a new roundabout and link road to enable access to the Sandy Bay development parcels. Highway improvements will also be required to ensure that the principal point of vehicular access for a foodstore is off the Portway roundabout. Off-site highway improvements will also be required of which they must has regard to the requirements arising from the Transport Assessment and as identified in the Transport Measures Priority Schedule.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. They key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout;
--	--	--	---

			<ul style="list-style-type: none"> • Active travel improvements; • Education provision; and • Utility connections and upgrades
518	The spatial strategy should not over develop any areas, in particular the Porthcawl Waterfront so that there is a balance between regeneration and space	Porthcawl Waterfront should not be overdeveloped	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
724	You cannot have it both ways Porthcawl is a fairly affluent town and desirable to live in with this comes high house prices and youngsters trying to get on the property ladder cannot afford them. The amount of job opportunity's talked about are not here	Concerns relating to employment in Porthcawl	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most</p>

	<p>in Porthcawl and never will be you have to have a permanent job to get a mortgage and the majority of the workforce are seasonal. The jobs are not here to create the society you have imagined the only way you could do this is by making Porthcawl a less desirable place to live..</p>		<p>appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EESB) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of employment in Porthcawl, the imbalance and shortage of employment land is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors.</p>
726	No	No changes proposed	Comments noted.
767	<p>A leisure centre would be health and education benefits. The land should not be used for a school or housing. It is a prime location to be developed to benefit our community and attract people to visit to create more jobs. There are plenty of other places to build housing. Look at aberavon and take inspiration.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
772	<p>Providing infrastructure is the most important part and IMO the part that is nearly always least achieved. New health centre in Porthcawl cannot cope with demand of current residents and seasonal influx of holidaymakers. Adding 1115 houses is completely unsustainable</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of health facilities, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements;

			<ul style="list-style-type: none"> • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades
775	I note the 30% target for affordable housing in Porthcawl. Given the lack of affordable properties for rent or purchase in Porthcawl, I urge the council not to accept waivers or any other deferment option on affordable homes.	Ensure 30% affordable housing target in Porthcawl	Comments noted. Policy PLA1 will ensure that development of Porthcawl Waterfront incorporates an appropriate mix of dwelling sizes and types to meet local housing needs, including 30% affordable housing (335 units) to be integrated throughout the development in sustainable clusters of no more than ten units as per the Council's requirements.
781	In my opinion, the Borough is plundering space throughout the area. I notice that it says brownfield initially, so greens pace after that? I do not believe that the plan is encouraging growth of new or existing businesses, as new enterprises would be put off by the lack of access and parking in the town. Present businesses are already struggling. Transport is lacking too. Getting here is not easy on public Transport.	Brownfield before greenfield development / plan not encouraging growth of new or existing buinsesses / transport lacking in Porthcawl	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

			<p>In terms of Porthcawl Town Centre, the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>In terms of access, whilst it is beyond the scope of the LDP to control public transport services/operations, a new 'bus terminus' may be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p>
791	I would like to know are their going to be houses built for the local people the people who have been on the council housing register will I get a council flat ?	Are houses built going to be for local people	<p>Policy PLA1-5 will ensure that development an appropriate mix of dwelling sizes and types to meet local housing needs, including affordable housing to be integrated throughout the development in sustainable clusters of no more than ten units as per the Council's requirements. Policy COM3 outlines the affordable contributions that will be sought on residential developments with capacity for 10 or more dwellings for the different housing market areas within the County Borough.</p> <p>It is beyond the scope of the LDP to control the occupants of social housing.</p>
794	I disagree that Porthcawl need additional housing on the Seafront for regeneration growth. There already have been numerous housing developments within Porthcawl, whilst I welcome any development projects for the schools and even the limited offering of public services that have been planned, I feel that the housing provision is already growing in Porthcawl without the need for additional	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

	housing on the Seafront. The Seafront needs better facilities for the community and tourism - not additional housing.		<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
803	No	No changes proposed	Comments noted.
881	The last sentence is probably the most interesting. 'Greatest positive impacts and benefits of growth' are correct, because development will produce income which over time will represent a fairly high figure towards BCBC annual budget. Will Porthcawl benefit from the development, as a tourist resort with 'visitors' the answer has to be no as visitors are not being encouraged to travel to Porthcawl. Drive in, drive around and leave because nowhere to park in holiday periods when the current car parks are full. There is one surgery in Porthcawl, will this be expanded? Primary education will have to be increase if the intention is to attract a younger generation - especially with 30% affordable housing to	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. <p>offset the restrictions caused by current high property values. What social facilities are planned? The requirement for the current population of 15,000 are extremely limited.</p>		<p>settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>Furthermore, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working</p>
--	--	---

			<p>relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>In terms of education, Policy PLA1 will require 1.8 hectares of land to accommodate a minimum one form entry Welsh medium primary school, the expansion of the existing Newton Primary School (with co-located nursery facility) and a financial contribution to nursery and primary school provision as required by the Local Education Authority. The financial contribution (including timing and phasing thereof) must be secured through Section 106 Planning Obligations in accordance with the Education Facilities and Residential Development SPG.</p> <p>With regards to social/leisure facilities, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
884	housing developments appear to be the priority before the infrastructure is in place	Infrastructure should be considered before housing	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p>

			<p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
894	What about the 1937 health and physical training act which is for leisure camping and caravan sites not residential, has this been dissolved in parliament? The LDP has shown green spaces in the plan far smaller than is required within the Green Cities recommendation.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
928	I cannot see how having over priced houses on a plot of land that sustains wildlife now is sustainable growth, greed for greeds sake	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision. Such requirements will also ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of wildlife and habitats, a Phase 1 Habitat Survey has been undertaken, of which robustly determines what ecology constraints may exist within the site. The findings indicate that the proposed development would not have any adverse impact. Whilst further surveys will be undertaken, the proposed development of the site is not unacceptably constrained by biodiversity and nature conservation issues.</p>
972	No	No changes proposed	Comments noted.
978	Yes no one has explained how Porthcawl will benefit .look at Aberavon that is what is required on our sea front .Again no one will listen or take action. Perhaps a change of decision makers would help. And let's have a vote. Do you accept this proposal yes/No	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>As such, the Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan</p>

			<p>requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and</p>
--	--	--	---

			<p>better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p> <p>The site will be delivered in accordance with the Placemaking Strategy developed by the Council. The site will complement the recent successful implementation of the Harbour refurbishment, the listed Jennings Building and the proposed leisure proposals at Cosy Corner.</p>
982	Can't disagree on the sentiment. Just shame that you have decided to put it all in one space in Porthcawl ie: on the seafront	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery. The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus</p>

			<p>on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
985	None	No changes proposed	Comments noted.
989	Whilst I agree Porthcawl needs more affordable homes I do not agree with the location in a key tourism area. This will impact on the use of the site as a leisure facility which is much needed. Retail, outdoor splash area and play areas for families is a better use of space and regeneration. Sandy bay has been neglected for decades and this would make a more suitable space for housing.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated</p>

			<p>development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure facilities, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
992	Leisure facilities are needed for residents to use in winter time too for adults but particularly for teenagers .	Leisure facilities are required	Comments noted. With regards to leisure facilities, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction.
993	No	No changes proposed	Comments noted.
998	In relation to Sandy bay evidence has shown that it should never be built on due to conditions set down in 1946 which were that the land was purchased for £39,000 by the rate payers for public walks, leisure exercise and camping. Evidence available . The infrastructure and parking requirements cannot sustain larger populations alongside the influx of tourists. Park and ride is not a feasible option as there are too many complexities of family life to make this a realistic option for a family day out at the beach for example. It will impact negatively on the use of other facilities within Porthcawl such as shopping, use of fairground etc. The natural places that exist, ie Sandy bay	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

<p>contain rare plants and creatures (Photographic evidence can be provided). Building on this area would not meet SOBJ4. Neither would building north of Newton Nottage Road, and although a logical place to build it would impact on the feeding grounds of over wintering Egrets and Curlews at high tides. Again I reiterate that the infrastructure would not sustain extra housing, being built in Porthcawl at all, as it would result in more traffic and more pollution. The projected works at Sandy Bay are purely to contain the sand and not defence from the sea. This is environmental vandalism no better than the dumping of concrete rubble post war. It is my understanding that this has been grant funded. In my opinion such work is not necessary as a sea defence but has been manipulated within the grant application because there is a need of sand control to allow development of the area. It is evidenced within a video of 1965, (available upon request), an interview with a councillor stated that the sand was reaching the top of the caravans, but in written statement in 2004 by an ecological expert, it said that there was insufficient sand to sustain the dunes which was a contradiction. I can provide factual information about the removal regularly of sand off the road way, for example in one instant during 2020 of 600 tonnes which was higher than three metres higher than the original foreshore.</p>		<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of Sandy Bay, there are considered to be no restrictive covenants in place restricting the future land uses of the site. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance</p> <p>In terms of car parking, it’s acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new ‘bus terminus’ may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre.</p>
---	--	--

			<p>The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p> <p>In terms of wildlife and habitats, a Phase 1 Habitat Survey has been undertaken, of which robustly determines what ecology constraints may exist within the site. The findings indicate that the proposed development would not have any adverse impact. Whilst further surveys will be undertaken, the proposed development of the site is not unacceptably constrained by biodiversity and nature conservation issues.</p> <p>Coastal defence work is expected to be brought forward in order to protect existing properties irrespective of the regeneration area being developed in addition to maximising the available developable area within the regeneration area and allow additional opportunities for an enhanced seafront. Works to the Western Breakwater, Eastern Promenade and Rhych Point, in addition to the monitoring and management of the Relic Dunes, are to be delivered as part of the initial phase of works which will be subject to Welsh Government funding.</p> <p>In terms of additional coastal defence works to maximise developable area, a terraced revetment across the Coney Beach frontage, ending to the west of Mackworth Road represents the preferred option for the regeneration area. Such a revetment will provide flood and erosion protection for the development area whilst also allowing for improved connectivity between the frontage and the adjoining beach.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades <p>The Council is the freehold owner of most of the land to be used in the development. Much of the land is unoccupied and derelict. The local authority has entered into an Agreement with the owner of another substantial areas of land to be used in the development. The Agreement requires the joint marketing and disposal of all of the larger area of land to be used for the development to either a single or to multiple developers. The Council therefore aims to work jointly with those developers to improve the quality of life of those living, working or otherwise involved in the community life of their area.</p> <p>The former Sandy Bay Caravan Park which forms the majority of the land owned by the Council in the area intended for development was acquired by the Council for the purposes of public walks, being purposes set out in section 164 of the Public Health Act 1875, and section 4 of the Physical Training and Recreation Act 1937. The acquisition took place following the confirmation of the Porthcawl Urban (Newton) Recreation Ground Confirmation Order 1948 which authorised compulsory purchase acquisition of the land for those purposes. The land is accordingly held pursuant to a statutory trust imposed by section 10 of the Open Spaces Act 1906 to allow, and with a view to, the enjoyment thereof by the public as an open space within the meaning of the 1906 Act.</p>
--	--	--	--

			<p>The Council wishes to transfer the land from its current use to a use for planning purposes. This process is known as land appropriation. Under Section 246 of the Town and Country Planning Act 1990 planning purposes means reference to any purposes for which land can be acquired under (in part) Section 226 and Section 227 of the Town and Country Planning Act.</p> <p>The Council has a general power to appropriate land under the provisions of Section 122 of the Local Government Act 1972. Under this section a Council may appropriate land owned by the Council which is no longer required for the purpose for which it is held for any other purpose for which the Council is authorised by statute to acquire land. The Council is authorised to acquire land under Sections 226 (using compulsory powers of acquisition) and 227 (by agreement) of the Town and Country Planning Act 1990.</p> <p>In reaching a decision to appropriate land the Council must decide that the land is no longer required for the purpose for which it is currently held and in making that decision the Council must consider the public need within the area for the existing use. This report gives a detailed outline of the development proposals for the area including the Council's land. The Council's land is required for purposes of development, re development and improvement.</p> <p>Further detail can be found on Meeting of Cabinet Agenda item 692 (Tuesday, 20th July, 2021, 14:30) - https://democratic.bridgend.gov.uk/ieListDocuments.aspx?CId=141&Mid=4098&Ver=4&LLL=0</p>
1000	USE OF SPACE REMAINS TO BE ADEQUATELY DISCUSSED	Use of space needs to be adequately discussed	Comments noted. Insufficient information has been provided in order to offer an appropriate response.
1002	The key words here are benefit to the community. I feel that building housing on Salt Lake car park will not benefit the community. It will merely put pressures on infrastructure and other car parks during very busy days in Porthcawl. There is no benefit from extra housing in this area.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
<p>100 8</p>	<p>Areas of Porthcawl for example Sandy Bay are not, as far as I am aware, owned by Bridgend County Borough Council and I do not understand how planning for a large number of houses in this area is possible. Redevelopment of the Sandy Bay site is needed but NOT with 1115 houses.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

			<p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of landownership, there is currently an Owners Agreement in place between the major landowners of the site including Bridgend County Borough Council and the Evans Families.</p> <p>The Council have commissioned consultants to undertake a Landscape/Seascape and Visual Appraisal of the proposed regeneration. The appraisal assesses the proposed land use, storey height and density parameters. The assessment concludes that the development would not have an adverse impact on the Landscape/Seascape of Porthcawl, subject to appropriate design responses being incorporated at detailed design stage. The assessment recognises that the development offers to impose a dramatic and positive change across an extensive area, replacing areas of dereliction with new or enhanced accessible open spaces and high-quality buildings and facilities. Further detailed assessments and considerations will be undertaken, in order to influence the design of the development, including a detailed landscape and visual assessment that will assist in identifying detailed mitigation of adverse effects.</p>
101 1	Spaces such as Salt Lake and Sandy Bay, Porthcawl, require leisure facilities, not more housing	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix</p>

			<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
104 4	Necessary infrastructure for Porthcawl should not be solely by providing accommodation, this will be a detrimental factor for residents and there are little or no guidelines as to what leisure facilities will be included	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>

			<p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades
1048	Again, growth is being focused on the wrong areas and in the wrong form. Larger scale individual projects on essential land for leisure and tourism, such as Salt Lake and Sandy Bay in Porthcawl or Island Farm in Bridgend, fish long term failure of the LDP in favour of short term wins around housing growth	Growth focussed in wrong areas	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

105 4	The improvements to the sea defences and open areas are necessary and laudable the improvements to Hillsborough Place car park are long, long over due but to build anything but open leisure facilities on the salt lake is ridiculous if not criminal. This area should be developed as a low impact wet weather multifunctional leisure area for swimming (when the tide is out) travelling stadium site for circuses fairs markets and interactive sports area for the enhancement of the visitor experience.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
105 6	I refer to PLA3(8) the Porthcawl Waterfront regeneration. People visit Porthcawl for it's natural beauty and open space. The building of houses on the waterfront will NOT attract visitors, they will go to other resorts. Parking is already an issue in Porthcawl, especially on fine weekends and bank holidays. When people visit the beach with the equipment and leisure items they need for the day they need to be able to park their vehicles relatively close to the beach. Park and ride is NOT the answer! Visitors will NOT come here if they have to use park and ride. This has not been thought through.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy</p>

			<p>PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
105 8	Again there is no benefit on the people of Porthcawl on this development just lining BCBC pockets on extra council tax. We pay more than people in Windsor.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led</p>

			<p>growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
106 2	<p>No mention of development of cultural facilities i.e. The Grand Pavilion....investment here can help drive economic regeneration - more jobs, better visitor attractor, more secondary spend in the town/borough/region Any housing development needs to be proportionate in Porthcawl and not spoil its natural resources i.e. seafrontage, views, open space. Balance of social, affordable and private housing should be appropriate to ensure that the council yield from development in prime locations is maximised. Housing should be about quality not quantity, have to be really careful about not over developing the seafront locations. Look at alternative areas west of Nottage or East of Danygraig.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. Whilst it is beyond the scope of the LDP to provide cultural facilities, Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>The Council have commissioned consultants to undertake a Landscape/Seascape and Visual Appraisal of the proposed regeneration. The appraisal assesses the proposed land use, storey height and density parameters. The assessment concludes that the development would not have an adverse impact on the Landscape/Seascape of Porthcawl, subject to appropriate design responses being incorporated at detailed design stage. The assessment recognises that the development offers to impose a dramatic and positive change across an extensive area, replacing areas of dereliction with new or enhanced accessible open spaces and high-quality buildings and facilities. Further detailed assessments and considerations will be undertaken, in order to influence the design of the development, including a detailed landscape and visual assessment that will assist in identifying detailed mitigation of adverse effects.</p> <p>Policy PLA1 (See Deposit Plan – Page 63) will require development of Porthcawl Waterfront to incorporate an appropriate mix of dwelling sizes and types to meet local housing needs, including 30% affordable housing units to be integrated throughout the development.</p>
475	<p>I think regeneration, particularly of the Porthcawl seafront, should not include so many residential properties. That area should be used for the purpose of health and well being for locals and visitors alike, as it was supposed to be.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. 	<p>countryside and the beautiful beaches rolled into one.</p>	<p>should be developed</p>	<p>appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP’s Vision and Objectives for the County Borough.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
<p>112 5</p>	<p>Every area that sees development of housing need green infrastructure, education, social facilities, transport etc with no compromise</p>	<p>Every development should be supported by infrastructure</p>	<p>Comments noted. In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>

112 8	I agree with the above strategies to meet the needs of these communities.	No changes proposed	Support noted.
114 1	<p>With the proposed 1000+ dwellings this will doubtless increased the flow of traffic in and out of Porthcawl. Currently there are only three routes in and out of Porthcawl, and only two to get to the sea front, both of which go through major residential areas. What assessment of the increase flow of traffic, has been made on the impact that it will have on the quality of life for existing residents? What plans are there to provide adequate parking spaces for each of the proposed new dwellings? If it is proposed to increase the number of younger, working residents in Porthcawl, they will need to commute. Current public transport does not meet a hugely increased need and as already stated, I doubt that, with the advent of electric cars, we will give up private ownership of vehicles anytime soon. In terms of preparing Porthcawl for the future, what plans are there to include electric vehicle charging points for each new dwelling? With the proposed number of new dwellings, assuming that they provide affordable residential housing, there will be an increased strain on local services in Porthcawl such as the local schools and Doctors surgery, not to mention the increased strain on the local hospitals due to the influx of new residents across the entire County. It is unlikely that new housing in Porthcawl will provide affordable housing for residents in Bridgend County. Wouldn't it be better fo focus on providing leisure and tourism facilities, to provide jobs and to increase the economy through visitor input.</p>	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical</p>

			<p>development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore, a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Policy PLA1 ensures that development of the site will require a new roundabout and link road to enable access to the Sandy Bay development parcels. Highway improvements will also be required to ensure that the principal point of vehicular access for a foodstore is off the Portway roundabout. Off-site highway improvements will also</p>
--	--	--	--

			<p>be required of which they must have regard to the requirements arising from the Transport Assessment and as identified in the Transport Measures Priority Schedule.</p> <p>Guidance relating to electric charging points will be subject to a future strategy and Supplementary Planning Guidance. Furthermore, costings of electric charging points have been factored into viability testing.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car park enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p> <p>In terms of affordable housing, Policy PLA1 will require development of Porthcawl Waterfront to incorporate an appropriate mix of dwelling sizes and types to meet local housing needs, including 30% affordable housing units to be integrated throughout the development.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>In terms of other supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades
116 1	I do not understand	Plan is unclear	The Plan has to be prepared in the context of national legislation and guidance and has to be informed by an evidence base comprising of background papers and other technical documents. The written statement has

			<p>been written with the aim of being understandable and not too technical or jargonistic but its content must reflect the fact that it is a land use plan. The Plan has been accompanied by an easy read summary leaflet, and the opportunity for telephone calls on an appointment basis where Officers were on hand to help talk interested persons through the Plan, its policies and proposals and how to comment. All Local Development Plan documents were available in main libraries throughout the County Borough in addition to the Civic Offices via appointment. Guides on how to comment and register were available online. Additionally, the phone lines were manned between the hours of 9am-5pm weekdays to provide assistance. The Local Development Plan has to be written in a particular style to meet the guidance set out in the LDP regulations manual.</p>
117 7	<p>you are not regenerating porthcawl your plans are going to make it a worse place to live not better but then as the decision makers do not live here or will not be affected by them why should they care</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>

			<p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>The Council have commissioned consultants to undertake a Landscape/Seascape and Visual Appraisal of the proposed regeneration. The appraisal assesses the proposed land use, storey height and density parameters. The assessment concludes that the development would not have an adverse impact on the Landscape/Seascape of Porthcawl, subject to appropriate design responses being incorporated at detailed design stage. The assessment recognises that the development offers to impose a dramatic and positive change across an extensive area, replacing areas of dereliction with new or enhanced accessible open spaces and high-quality buildings and facilities. Further detailed assessments and considerations will be undertaken, in order to influence the design of the development, including a detailed landscape and visual assessment that will assist in identifying detailed mitigation of adverse effects.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and • Utility connections and upgrades <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
125 5	housing needs to planned carefully	Housing needs to planned carefully	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
1260	Address the infrastructure before creating more housing.	Infrastructure needs to support housing	Comments noted. An Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
1263	I agree that areas of Porthcawl require Regeneration but I'm unsure the position of current plans to put a supermarket on the seafront necessarily meet that brief wisely.	Concerns relating to Strategic Allocation PLA1: Porthcawl	Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping.

	There are other areas of Porthcawl which are being conveniently forgotten.	Waterfront / supermarket	<p>This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings' as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to "place-making", taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans. However, it is important to note that the proposed foodstore will be subject to a future planning application.</p>
1266	Regeneration of porthcawl needs to provide adequate parking for residents	Concerns regarding Porthcawl and parking	<p>Comments noted. In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
1268	Our primary schools are already over subscribed. They are not fit for purpose. One extra school isn't enough. The land at the old st.John's school would have been perfect for another school. The children deserve large, safe playing fields on their grounds. All the drainage systems and pipe work in the town are extremely old, they simply can't take more & more & more houses. You can't keep building houses without creating enough leisure space and recreation. There is a huge gap where pre-teen and teenage kids are left with nothing here. It's just going to create bigger problems in the future. If there isn't enough	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as</p>

<p>here for them, the drug issues will escalate and crime will escalate. We don't want or need masses of houses we need leisure facilities and we need inviting smaller areas for retail or small businesses.</p>		<p>Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of retail and commercial space, mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements; • Education provision; and
---	--	---

			<ul style="list-style-type: none"> • Utility connections and upgrades
149 8	<p>The only spatial strategy planned for Porthcawl it appears is housing, a supermarket and a school. This will not 'capitalise on the towns role as a premier seaside destination' but reduce its attractiveness to visitors. They will go to Aberavon and Barry, which have actual seaside leisure facilities.</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>

149 9	Just because an area is 'brownfield', doesn't mean that it should all be developed. Brownfield sites can harbour a wealth of fauna and flora which has been undisturbed for many years. A brownfield area which has lain unused for many years can be a valuable recreational resource. Also just because the Council owns areas of land which have potential for development, doesn't mean that all the land has to be covered in houses for example.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
150 1	No explanation is this of how spatial strategy will be realised - with reference to	Concerns relating to Strategic	Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence

	<p>Porthcawl. What is the strategy for schools? doctors? road provision, parking, leisure? A mention of 4 extra junior school classrooms and a 1 form Welsh junior school is the only nod to any forward provision of needs of additional residents. BCBC is not currently fulfilling needs of existing community! Transport hub from Pule is nonsense.</p>	<p>Allocation PLA1: Porthcawl Waterfront</p>	<p>based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. The key enabling infrastructure required to facilitate the proposed development includes the following key requirements:</p> <ul style="list-style-type: none"> • Coastal defence improvements; • New public open space; • Drainage infrastructure; • New road and roundabout; • Active travel improvements;
--	---	--	--

			<ul style="list-style-type: none"> • Education provision; and • Utility connections and upgrades <p>In terms of road provision, Policy PLA1 ensures that development of the site will require a new roundabout and link road to enable access to the Sandy Bay development parcels. Highway improvements will also be required to ensure that the principal point of vehicular access for a foodstore is off the Portway roundabout. Off-site highway improvements will also be required of which they must have regard to the requirements arising from the Transport Assessment and as identified in the Transport Measures Priority Schedule.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car park enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p>
150 2	I cannot comprehend where in Porthcawl this 'regeneration growth' will appear. Porthcawl is, by and large, a commuter town. Businesses in the town are holiday based. What are you regenerating except increased income, through rates, to be spent elsewhere	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
1507	Looks to me that council see that increased housing is the only way that regeneration can take place in Porthcawl. This is wrong. It will obviously bring more council tax etc but overcrowd Porthcawl and see the end of tourism. Very bad view of BCBC councillors.	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p>
438	100% Green technologies is key. solar farms can reduce cost of power and can also generate Zero Carbon Cypto currency to invest into local services.	100% Green technologies are key	<p>Comments noted. A Renewable Energy Assessment (REA) (See Appendix 17) identifies the contribution that the County Borough is potentially able to make towards meeting the national renewable energy targets through various forms of technology (See Table 20, page 160). The REA has been informed by The Welsh Government's Practice Guidance: Planning for Renewable and Low Carbon Energy – A Toolkit for Planners, September 2015.</p> <p>The Assessment estimates the current and future energy demands of the County Borough, along with the progress in meeting these demands from local low carbon energy generation assets. Against this backdrop, land within the County Borough boundary has been subject to a resource assessment to identify the potential for renewable and low carbon energy project deployment from a resource perspective.</p> <p>Strategic Development Sites that have been integrated into the LDP have been considered with regard to meeting their potential energy demand from renewable sources. In order to reduce future energy demand, strict policies that look to maximise the energy efficiency of new development have been introduced as well as integrating energy generation into wider development proposals, and ensuring that low carbon heating systems are installed.</p> <p>Strategic Policy 13 (and supporting development management policies) will assist the County Borough transition to a low carbon, decentralised energy system that works for its individuals, communities and businesses by encouraging renewable and low and zero carbon energy projects.</p> <p>The Council has an aspiration for all new homes to be net zero carbon. Policy ENT10 will ensure that new major development is accompanied by an 'Energy Masterplan that demonstrates that the most sustainable heating and cooling systems have been selected. This must include consideration of the proposed system as a whole, including the impact of its component materials on greenhouse gas emissions. They must also demonstrate that heating systems have been selected in accordance with the sequential approach set out by Policy ENT2.</p>

			Development proposals must also demonstrate that sustainable design standards are integral to the proposal through construction and operation, ensuring that they are considered at the beginning of the design process. Policy ENT11 requires new major development to be accompanied by an 'Energy Masterplan' that demonstrates that the principles set out by the policy have been incorporated.
439	There is sufficient social housing in the Kenfig hill, Pyle and Cornelly sites, we need more privately owned homes. Plus get the social housing already in place done up to improve the look of the community,	Sufficient social housing already exists in Kenfig Hill, Pyle and Cornelly – more open market housing required	<p>Comments noted. Whilst it is beyond the scope of the LDP to improve existing social housing, the Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>While additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p> <p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>As set out by Deposit Plan Policy PLA5 (Page 78), Land East of Pyle is allocated for a comprehensive, residential led mixed-use development. The site will deliver circa 2,000 homes (15% / 300 of which will be affordable housing units), incorporating 2 two form entry primary schools, leisure and recreation facilities, public open space, plus appropriate community facilities and commercial uses.</p>
441	See previous comment.	No changes proposed	Comment noted.
442	Social housing is always promised but not enough is delivered,with the majority of dwellings being for private sale to out of towners who can afford them.its about time the priority was changed,with the majority of dwelling being made available at low prices to local people.in my opinion the proposed further regeneration of bridgend town centre is a waste of money,as the existing refurb is showing no sign of success.not enough people want to shop in towns any more as is evident nationwide.they go to supermarkets and shop online.instead why not regenerate it into a residential and recreational area	Concerns regarding social housing / town centre	<p>Whilst the Council cannot ultimately control the occupants of new homes, new housing developments must incorporate an appropriate mix of house types, sizes and tenures to cater for the range of locally identified housing needs. The Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>While additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p>

			<p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p> <p>In terms of the town centre, the Council have undertaken a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>
444	We need more fields for the growing village because you've built houses on the school fields	Concerns regarding greenfield development	<p>Comments noted. As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites</p>

			retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance
446	The proposal for housing between Laleston and Bryntirion will increase traffic through the High Street which separates the two sides of Laleston. The Village will suffer again that amount of housing produces at least that number of cars if not more, many of which will be heading towards the A48 for motorway access through the High Street. Village residents are not being considered, the village will lose its identity.	Concerns regarding Strategic Allocation PLA3: Land West of Bridgend	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA3 – Page 71). The provision of new residential dwellings, including affordable units, will be incorporated alongside a new one and a half form entry Primary School, recreation facilities, public open space, plus appropriate community facilities all set within distinct character areas.</p>

			<p>The site promoter has commissioned EDP to undertake a Landscape and Visual Appraisal (LVA). The purpose of the appraisal was firstly to inform the design evolution of the scheme which enabled an integrated approach to potential landscape and visual opportunities and constraints.</p> <p>The LVA outlines that there are adverse and beneficial landscape effects resulting from development of this site. However, the embedded mitigation and the approach to design is considered to minimise adverse effects over time as the proposed landscape establishes and overall the predicted effects are not considered unacceptable from a landscape and visual perspective in the context of the delivery of a strategic housing site.</p> <p>The appraisal included a review of national and local policy, landscape character and visual amenity. The appraisal included assessment of the National Landscape Character Assessment (NLCA), LANDMAP, and Landscape Character Assessment for Bridgend County Borough (LCABC) (2013) in addition to an on-site assessment. The appraisal confirms that the site relates well both in landscape and visual terms to the existing landscape and settlement, and that the site represents a logical extension to Bryntirion provided a considered design is sensitive to the site's existing characteristics. The design appraised responds sensitively to assets on site such as the Bridgend Circular Walk, the byway, the hedgerow network and vegetated site boundaries. As such the proposals put forward at this stage are considered to be a thoughtful and easily assimilated future development of this site.</p> <p>Mitigation measures include:</p> <ul style="list-style-type: none">• The Laleston Meadows SINC would be brought into regular long-term management. This would protect the visual amenity and landscape character of this northern part of the site. A landscape buffer would set development back from the SINC, and dwellings would front onto it. The SINC could be used as a mitigation receptor site (in ecological terms) and the grazed fields currently within the SINC could be improved by the proposals as well as maintained in the long term. The SINC offers a great opportunity for informal and natural play on site provided increased public access would not clash with its ecological function;• The site contains very few of the key characteristics listed in the published documents on Laleston SLA. The site has a strong network of hedgerows, some which would be lost and the field pattern replaced by urban form. However, the retained hedgerows and trees would be protected by landscape buffers and some of the character of the SLA within which the site lies would be retained;• Provision of structural landscaping, a mix of native and non-native trees and shrubs proposed throughout the site for biosecurity, diversity of ecosystems and habitat creation as well as the visual amenity of future residents. Areas of open space would be bolstered by considered structural planting to create an aesthetically pleasing urban development which is well integrated with the proposed landscape strategy and the settled landscape character currently experienced in the local area;• Retention of existing landscape features (hedgerows and trees) is a priority of the emerging proposals as it forms a desirable strong green framework that links with the wider green infrastructure to the north, west and south of the site;• Adequate replacement planting of local species in appropriate locations to compensate for any loss of trees and hedgerows, and enhancement planting; and• The location of public open space, public footpaths and the street-alignment has been designed to protect and reflect local character. <p>Through consideration of the findings above, it is anticipated that any notable landscape and visual effects resulting from the addition of the proposed scheme would be localised in extent and contained within a c.400m radius of the site, despite the site's relatively open character.</p>
--	--	--	--

			<p>Overall is it considered that the masterplan framework proposed for the site has been sensitively designed through a landscape and ecology-led approach, with appropriate incorporation of mitigation measures in order to address concerns of the site in relation to landscape and visual matters. As such, the promotion of this site for residential development should be considered an acceptable extension to the existing settlement of Bryntirion which would not cause significant or wide-ranging adverse effects upon its surrounding landscape context.</p> <p>Policy PLA3 will ensure that the design and layout of the site has regard to the landscape in which it sits, considering the interface between the site, Bridgend and Laleston. Visual impacts must be minimised through the inclusion of mitigation measures and provide links with the existing landscape and access features to safeguard landscape character whilst creating a sense of place. The development must also not be to the detriment of the Special Landscape Area and any development proposal must incorporate measures to reduce adverse effects and/or visual intrusion on the wider landscape.</p> <p>The proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The Transport Assessment reflects the number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA3 prescribes the appropriate development requirements in relation to all forms of travel. For the avoidance of any doubt, this number of dwellings does not require the original proposed site boundary to be expanded, rather more efficient use of the existing net developable area. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA3 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
--	--	--	---

			<p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA3 prescribes a number of placemaking principles for Land West of Bridgend, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages along the A473, with Bryntirion Comprehensive School and Bridgend Town Centre (including the bus station and train station). New connections will be provided to accord with the proposed routes within the Council's ATNM: INM-BR-52, INM-BR-55, INM-BR-57, INM-BR-58, INM-BR-127 and 2120.</p> <p>Policy PLA3 will require on-site highway improvements to ensure the principal point of vehicular access is achieved from a new signalised junction with the A473 at the southern boundary; the junction will accommodate a new-shared use crossing to connect the internal cycleway/footway with the existing active route BRC9b on the southern side of the A473.</p> <p>The site promoter's Transport Assessment confirms that the traffic effect of 850 dwellings is forecast to be in the order of 269 and 243two-way movements in the AM and PM peak hours respectively, although this is considered worst case as attitudinal change towards travel progresses. This quantum of trips equates to just over 4vehicles per minute two-way, diluted across the local highway network. The assessment concludes that the development provides opportunities to create a new western edge to Bridgend in a self-sustaining site offering community facilities suitable for day to-day living. In this way, the transport case for mobility provides the options necessary to promote sustainable travel modes before the private vehicle. The design of the environment, the travel planning and the locational advantages, together with the Mobility Strategy means there is a major benefit for existing and new residents, significantly improving travel choice, for commuting, leisure and social journeys and hence social inclusion. Working from home and from a third-place such as a non-site Workhub will be encouraged from the outset, in line with Welsh Government's aspirations.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
447	<p>We are losing a lot of green spaces with over development. Why cant we use some of the dilapidated empty buildings and convert these into apartments/retail spaces. Boarded up houses could be renovated and produce living spaces. Green spaces need to be preserved for the environment and peoples mental health but need caring for too</p>	<p>Concerns regarding loss of green spaces</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised. The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of empty properties, the Council has identified empty homes as a potential source of capacity as set out in an Urban Capacity Study 2020 (See Appendix 29). Its recognised that such sites make an important contribution to the overall housing land supply, as such, have contributed to windfall provision as set out in the Deposit Plan (See Table 7).</p> <p>In terms of open space, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p>
--	--	--	---

			<p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
448	<p>It is essential to maintain areas that are non developed. The borough needs these natural areas that contribute to the beauty of the county and act as a natural buffer between densely populated areas.</p>	<p>It is essential to maintain areas that are not developed</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. 449	not enough forward thinking on the porthcawl regen. Be bold and try and get a park and ride or train line reinstated. Use salt lake as a marina similar to Penarth	Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix</p>

			<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
--	--	--	---

			<p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
396	see earlier comments	No changes proposed	Comments noted.
450	I think until roads improve then the building of housing needs to be reduced - use of empty buildings would be better strategy - use the empty shops and towns - convert into housing.	Roads require improvement before more housing / use empty properties	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. 			<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Additional long-term Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p> <p>In terms of empty properties, the Council has identified empty homes as a potential source of capacity as set out in an Urban Capacity Study 2020 (See Appendix 29). Its recognised that such sites make an important contribution to the overall housing land supply, as such, have contributed to windfall provision as set out in the Deposit Plan (See Table 7).</p>
452	Infrastructure is crumbling under its existing weight	Concerns regarding infrastructure	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>An Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes</p>

			transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
454	Not enough green space being left. More development means that the road infrastructure cannot cope with the increase in traffic that this would bring.	Concerns regarding loss of green space / infrastructure	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space</p>

			<p>within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>Whilst developments are be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
455	Where as there is a need for housing, it's just putting more strain on the area that can just about cope as it is.	Concerns regarding infrastructure	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined</p>

			<p>based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>An Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
456	Completely the wrong area.	Completely the wrong area	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. 459	Keep our country green, and maintain wildlife	Keep our country green, and maintain wildlife	<p>Comments noted. The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
460	The spatial strategy should be to retain existing green belt which are already few and far between. There are brownfield areas which could be used so enabling the council to leave the green belt areas to further promote wildlife and ensure that the existing population still can take exercise via these fields and country lanes which are virtually traffic free with clean air to breathe which can only be good for our health and wellbeing which should be at the forefront of the council's plans	Spatial strategy should be to retain existing green belt / utilise brownfield sites	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of allocation PLA3: Land West of Bridgend, the site promoter commissioned Air Quality Consultants to undertake an Air Quality Assessment to assess the impact of the proposed development and subsequent increased traffic emissions arising from the additional traffic on the Air Quality Management Area (AQMA) of Park Street. Concentrations have been modelled for a number of worst-case receptors, representing existing properties where impacts are expected to be greatest. In addition, the impacts of traffic emissions from local roads on the air quality for future residents on the proposed development have been assessed.</p> <p>The assessment has demonstrated that concentrations of PM10 and PM2.5 will remain below the objectives at all existing receptors in 2022, with or without the proposed development, and that all impacts for these pollutants will be negligible.</p> <p>In the case of annual mean nitrogen dioxide, concentrations will remain below the objective at all but one existing receptor (representative of 6-8 homes) in 2022, with or without the proposed development. However, it is now considered unlikely that any new homes within the development will be occupied before 2024, by which time it would be reasonable to expect concentrations at these 8 homes to be below the objective. The assessment has demonstrated that the impacts in terms of annual mean nitrogen dioxide concentrations of the full development</p>
--	-----------------------------------	---

			<p>traffic being on the roads in 2022 will be negligible everywhere other than at this one receptor, where the impact under this scenario would be moderate adverse. However, bearing in mind that no new homes will be occupied before 2024, and the development is unlikely to be complete and thus generating its full traffic volumes until the 2030s, this scenario is unrealistically worst-case. Applying professional judgement, it is considered most likely that the actual impact of the development at these 8 homes will also be negligible in all years from the first occupation in 2024.</p> <p>The effects of local traffic on the air quality for future residents living in the proposed development have been shown to be acceptable at the worst-case locations assessed, with concentrations being well below the air quality objectives. As such, the overall operational air quality effects of the development are judged to be 'not significant</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
463	<p>This would be a disgraceful use of this greenfield land. The recent pandemic had demonstrated how important such land is - for many it was the only place to escape their homes during the lockdowns. Please do not allow one of the last fee pieces of natural beauty around Laleston to be lost.</p>	<p>Concerns regarding Strategic Allocation PLA3: Land West of Bridgend</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, any development will be required (See Deposit Policy PLA3 – Page 71) to provide 4.1 hectares of retained green infrastructure and new areas of public open space as well as exploring the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland. Furthermore, the proposed allocation will be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p>
464	I understand the desires noted here, however, just because there is a green area available, it does not mean we have to build on it.	Concerns regarding greenfield development	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a</p>

			<p>sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Additional long-term Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p> <p>In terms of empty properties, the Council has identified empty homes as a potential source of capacity as set out in an Urban Capacity Study 2020 (See Appendix 29). Its recognised that such sites make an important contribution to the overall housing land supply, as such, have contributed to windfall provision as set out in the Deposit Plan (See Table 7).</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
467	“Benefits the most” is a flawed strategy. It has been abandoned by the UK Govt because only the SEast was attracting all the money. Wales needs a “levelling up” strategy	Wales needs a “levelling up” strategy	Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).
468	Yes. The proposed gypsy traveller site in bryncethin. I think this is going to have a significant affect on my newly build house resulting in the deflation in the cost of our home that we have worked hard for.	Concerns regarding proposed Gypsy, Traveller and Showpeople allocation SP7(2) Land adjacent to Bryncethin Depot	The Council has a statutory duty to carry out an assessment of the accommodation needs of Gypsies and Travellers under Part 3 of the Housing (Wales) Act 2014 and to meet any identified need for additional pitches under section 56 of the Mobile Homes (Wales) Act 2013. PPW also clarifies that “where a Gypsy and Traveller Accommodation Assessment (GTAA) identifies an unmet need, a planning authority should allocate sufficient sites in their development plan to ensure that the identified pitch requirements for residential and/or transit use can be met” (para 4.2.35). When the GTAA was completed, the total estimated pitch provision needed for Gypsies and Travellers was 7 pitches up until 2033. Since then, one family has met their accommodation needs on an existing authorised site, leaving a remaining need for six pitches over the Plan period. This need stems from two families (i.e., three pitches per family). One of these families has recently received planning consent to intensify their existing site and meet their accommodation needs (planning application P/21/677/FUL refers). This leaves a remaining need for 3 pitches, which the Council considers can be appropriately accommodated by the original proposed allocation at Court Colman (SP7(1)), which is already in the family’s ownership. As such, the other proposed allocation at Bryncethin (SP7(2)) is no longer considered necessary and has been removed from the Replacement LDP. Refer to the Gypsy and Traveller Site Options Background Paper.

469	<p>Sorry please say exactly what you intend doing in this strategy How can you improve a road system that grinds to a halt at peak times. My daughter is unable to get a local dentist and she already lives here. You will over burden a structure that is already collapsing</p>	<p>Concerns regarding infrastructure</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>The Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the</p>
-----	--	--	---

			Council cannot ultimately control provision of healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations with the Deposit Plan progress.
472	Social activities are desperately needed in our village	Social activities are desperately needed in our village	<p>Comments noted. The LDP recognises that local social and community facilities are important to the health and well-being of local communities (See Strategic Policy 9: Community and Community Infrastructure and supporting development management policies). Their existence is often key in creating viable and sustainable local communities, especially if such facilities are in easy walking and cycling distance for local residents.</p> <p>The LDP has a key role in providing, protecting and enhancing such facilities. The Strategy therefore acknowledges that good access to social and community facilities is fundamental to address social inequalities within and between different communities in the County Borough, providing the opportunity for people to lead healthy, safe, and well balanced lives. Where a need is identified, the LDP seeks to ensure that facilities are delivered in an appropriate manner at appropriate locations.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p>
473	New infrastructure does not serve the valleys. An example of this would be the Wellness Village. My elderly parents living in the valley struggle to commute to town with limited public transport. Gp surgeries are incredibly overstretched already. Regenerate the valleys....there is little evidence that this has/will happen.	Concerns regarding infrastructure in the valleys	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The Llynfi Valley demonstrates the most significant scope for growth across the three Valleys. As outlined by the Settlement Assessment Study, Maesteg retains its role as a main settlement of which has the potential capacity and infrastructure to accommodate future growth. Whilst the Spatial Strategy recognises several constraints associated with a number of large regeneration sites in the Maesteg and the surrounding parts of the Llynfi Valley, 'hotspots' on the edge of the Regeneration Growth Area of Maesteg and the Llynfi Valley, particularly in the south present viable opportunities to accommodate sustainable development.</p> <p>The Ogmore and Garw Valleys are identified as Local Settlements. Therefore, whilst these areas will not be earmarked to accommodate significant growth, the Replacement LDP seeks to create sustainable communities linked to wider opportunities in a manner that protects their high quality environment. It is recognised that alternative forms of development would help deliver smaller-scale growth, such as (but not limited to) co-operative housing, self-build and custom build opportunities alongside other forms of development. Such community investment opportunities will enable development of a scale and nature that is tailored to community needs, whilst diversifying and strengthening the local economies, connecting communities to wider opportunities and protecting the high quality environments.</p>
474	There would be no infrastructure for the amount of traffic	There would be no infrastructure for the amount of traffic	<p>Comments noted. In terms of road infrastructure, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
475	The proposed development between Bryntirion and Laleston should be on a brownfield site, not ancient woodland, rights of way and open spaces.	Concerns regarding Strategic Allocation PLA3: Land West of Bridgend	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl,</p>

			<p>Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, any development will be required (See Deposit Policy PLA3 – Page 71) to provide 4.1 hectares of retained green infrastructure and new areas of public open space as well as exploring the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland. Requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland). Furthermore, the proposed allocation will be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p>
477	Brownfield site development should be a priority over destroying greenfield sites.	Brownfield development should be the priority	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's</p>

			<p>success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Additional long-term Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p>
482	<p>There are a multitude of brownfield sites within Bridgend that could be regenerated with this benefiting the town centre through revitalisation.</p>	<p>There are a multitude of brownfield sites within Bridgend that could be regenerated</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. 486	I like the look of these plans, but I believe public transport needs to be improved across these areas in order to secure a greener future.	Public transport needs to be improved across these areas in order to secure a greener future.	<p>Comments noted. The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend’s historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
489	Concentrate on the properties already been built not building wafer thin homes that are being wacked up by these big developers. We don't need these house's. We need to put money into the schools already here. Surgeries ect already here so they can cope	Houses not required / concerns regarding surgeries	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan</p>

	with the population already here not increasing the pressure on them.		<p>requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>The Council have also been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations with the Deposit Plan progress.</p>
492	Give up as much green space as you can, homes are more important than overgrown fields that attract anti social behaviour come night fall	No changes proposed	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period

			<p>have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance</p>
493	again won't happen	No changes proposed	Comments noted.
497	No to more housing. Can't get in and out of pencoed without traffic now	Objection to more housing	Objection noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan

			<p>requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Whilst developments are in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
499	<p>Exactly how many houses do you intend to squeeze on to the small area of coastline, considering you also intend to house an Aldi and bus terminal there? How much green space will be left? How will the environmental credentials of the developer factor in your decision?</p>	<p>Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. As set out by Policy PLA1 (See Page 63), Porthcawl Waterfront is an underutilised brownfield site occupying a prominent seafront position. The regeneration site is allocated for a residential-led, mixed use scheme that will deliver up to 1,115 dwellings with associated facilities, including tourism, open space, leisure, retail, a bus terminus and community provision. Policy PLA1 details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. Delivery of the site will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p>

			<p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p> <p>Site specific plans have not been finalised as of yet, however a high level masterplan envisages development is envisaged to be higher (and therefore denser) closer to the seafront (particularly toward the west) with lower/less dense development toward the middle, northern and eastern peripheries of the site. Proposed density has and will continue to be informed by a Landscape/Seascape and Visual Impact Assessment. Further assessments will be undertaken to inform such matters to ensure that development is of appropriate scale to local setting.</p> <p>In terms of the environment, a Phase 1 Habitat Survey has been undertaken, of which robustly determines what ecology constraints may exist within the site. The findings indicate that the proposed development would not have any adverse impact. Whilst further surveys will be undertaken, the proposed development of the site is not unacceptably constrained by biodiversity and nature conservation issues.</p>
502	I believe that there is no better way to benefit communities than to provide an attraction with a range of inclusive recreation facilities, environments to relax in and areas to dine/enjoy refreshments all within easy walking distance of one another and closely linked to the towns high street. No hassle of	Benefit communities by providing development close to facilities and services	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement

<p>driving from A-B just all you need in one manageable area!</p>			<p>to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals. Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p>
---	--	--	---

			In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance
505	The plans for Porthcawl don't benefit the residents of Porthcawl. We need leisure facilities and open space, not a supermarket in and housing.	Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As set out by Policy PLA1 (See Page 63), Porthcawl Waterfront is an underutilised brownfield site occupying a prominent seafront position. The regeneration site is allocated for a residential-led, mixed use scheme that will deliver up to 1,115 dwellings with associated facilities, including tourism, open space, leisure, retail, a bus terminus and community provision. Policy PLA1 details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. Delivery of the site will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
507	I agree that porthcawl needs development however as a tourist resort this should be the priority. Having residential houses on salt lake i feel is a mistake. I agree with		Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP

<p>supermarket and better transport links including the need for regular bus service but I feel housing should not be in this area and it should be used for recreation</p>		<p>period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake</p>
---	--	--

			<p>will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p> <p>The Consultation provided the opportunity for members of the public to inform the Replacement LDP. Further consultation will take place on the Placemaking Strategy being prepared for Porthcawl, of which will allow for further public engagement and representations to be made in relation to the proposals intended for the regeneration site. Further information relating to the consultation will be made available on the Council's website once details have been finalised.</p>
508	No Aldi on salt lake. Encourage local culture and independent organisations	Objection to proposed foodstore on Salt Lake	<p>Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings' as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to "place-making", taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside</p>

			<p>all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p>
510	This is urbanisation - We need open spaces for an enhanced environment.	We need open spaces for an enhanced environment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p>

			<p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
512	Through over building you are already removing the spatiality between towns .. and this is not positive and reduces opportunities for more green areas and social and leisure	Concerns regarding spatial strategy	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p>

			<p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. The strategy prioritises the development of land within or on the</p>

			<p>periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>
514	<p>There needs to be a better plan for the traffic problems in Porthcawl. Development of Traffic calming measures and sustainable travel . Visitor numbers are increasing but there needs to be a strategy for managing the volume and speed of the traffic.</p>	<p>Concerns regarding traffic in Porthcawl</p>	<p>Comments noted. The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Policy PLA1 (See Page 63) of the Deposit Plan details the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. The development will also be required to provide off-</p>

			<p>site highway improvements with regard to the requirements arising from the Transport Assessment and as identified in the Transport Measures Priority Schedule.</p> <p>The allocation of the site in the existing LDP is supported by evidence found in the following documents:</p> <ul style="list-style-type: none"> • Porthcawl Regeneration Transport and Access Strategy 2007; and • Porthcawl Waterfront Visitor Parking Strategy 2007. <p>To support the allocation of the site in the Replacement LDP, Jacobs UK Ltd reviewed the above documents to determine whether the transport impacts of the current proposals are likely to be comparable in scale to those allocated in the existing LDP and updated the findings where it was considered necessary. The comparative assessment included an analysis of future trip generation predicted in 2007, with actual traffic flow counts undertaken in 2019. It also assumed a maximum quantum of development consisting of 1500 dwellings, which significantly exceeds the 1,115 residential units identified in the Deposit LDP Consultation Document. Despite this robust analysis, which overestimates the number of trips generated by the proposals, the TA concludes that there does not appear to be an increase in trips which would materially impact on the highway.</p> <p>Furthermore 0.12 hectares of land is safeguarded to deliver a public transport terminus. The Council has undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p>
515	<p>When you take the land away, the green land, when do we get it back? We give less than 10% of the land taken to build and I feel that councils see the land as never ending. People have moved to these counties because of the semi-rural location, because of how lush and green it is. Where exactly do you plan for all of these houses to go? Maybe people shouldn't be able to keep buying so many houses and letting them privately. What is an under-utilised site?</p>	<p>Concerns regarding greenfield development</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables</p>

			<p>sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Additional long-term Regeneration (under-utilised) Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
517	Regeneration growth areas I'm all in for	No changes proposed	Support noted.
518	There is a need for considerable investment in the green economy including cycle networks across Porthcawl. Supporting the commitment to increasing the number of Welsh speakers should be included in any	There is a need for considerable investment in the green economy including cycle	Comments noted. The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search

	<p>housing plans- more houses = increased need for Welsh medium education across the county</p>	<p>networks across Porthcawl / increased need for Welsh medium education</p>	<p>sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>Please refer to Bridgend's Integrated Network Maps (INMs) (https://www.bridgend.gov.uk/residents/roads-transport-and-parking/active-travel-routes/) of which details plans for a network of Active Travel routes and facilities over the next 15 years. Delivery of INM's proposals depend on funding. Also, the INM's proposals are indicative, and may change as schemes develop.</p> <p>Policy PLA1 (See Page 63), Porthcawl Waterfront details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. One such requirement includes on-site and off-site measures to provide good quality, attractive, legible, safe and accessible pedestrian and cycle linkages in accordance with Active Travel design. Improved linkages must be provided along the waterfront, to connect with the Eastern Promenade, Porthcawl Town Centre and Porthcawl Comprehensive School. Connections must be made to the existing active travel route 4084 and new routes should be provided to accord with the proposed routes within the Council's ATNM: INM-POR-01, INM-POR-12, INM-POR-13, INM-POR-14, INM-POR-15, INM-POR-17, INM-POR-18, INM-POR-22, INM-POR-23, INM-POR-24, INM-POR-25, INM-POR-26 and INM-POR-28.</p> <p>In terms of the Welsh Language, the Porthcawl Waterfront allocation safeguards 1.8 hectares of land to accommodate a minimum one form entry Welsh medium primary school, the expansion of the existing Newton Primary School (with co-located nursery facility) and a financial contribution to nursery and primary school provision as required by the Local Education Authority.</p> <p>One important element of Sustainable Placemaking involves taking steps to safeguard and grow the use of the Welsh Language. Local level data does not identify any particular settlement with a notable concentration of Welsh speakers and therefore a specific Welsh language policy is not deemed necessary as part of the Plan. However, consideration of and appropriate provision for facilitates to support the Welsh Language has been factored into different thematic policies relating to tourism (SP16 – See Page 177), conservation (SP18 – See Page 208) and social and community infrastructure (SP9 – See Page 121).</p>
519	<p>No. Nobody wants an Aldi in porthcawl. Please revoke any plans</p>	<p>Objection to proposed foodstore in Porthcawl</p>	<p>Objection noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning</p>

			<p>development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as ‘gateway buildings’ as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p>
521	the pyle cornelkt Kenfig hill area would lose its identity	The pyle, cornelly / Kenfig hill area would lose its identity	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix</p>

			<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Following detailed assessment, Land East of Pyle was considered to be an appropriate site for allocation in the Deposit Plan. Policy PLA5 (See Page 78) details the site-specific requirements including masterplan development principles and development requirements. Such requirements will ensure the design and layout of the site has regard to the landscape in which it sits, considering the interface between the site and the broader grouped settlement of Pyle, Kenfig Hill and North Cornelly. Visual impacts will be required to be minimised through the inclusion of mitigation measures that provide links with the existing landscape and access features to safeguard landscape character whilst creating a sense of place.</p>
522	Timescales on when the work will commence	No changes proposed	<p>The Delivery Agreement provides the timetable for producing the revised LDP. This provides a clear indication of when each of the different stages of plan preparation will take place. Definitive dates are provided up to the deposit stage and indicative dates for later stages. Adoption of the revised LDP is indicatively set for Spring 2022 (Apr – May). Following adoption of the revised LDP, planning applications including those for proposed allocations are expected to be submitted, of which will be subject to the usual planning process.</p>
524	Where are they going to Put the new roads?? Our roads are already overloaded and in a poor condition.	Concerns regarding road infrastructure	<p>Comments noted. The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>

526	<p>Whilst the designated area has been in need of something for many years, an Aldi store is not in keeping with the local area. Instead this area could be put to better use offering smaller, cost-effective units for independent business to grow. They can be built with sustainability and the environment in mind and blend into the surroundings. this will encourage sustainable industry and investment in the area</p>	<p>Concerns regarding proposed food store in Porthcawl</p>	<p>Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as ‘gateway buildings’ as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p>

527	consider the history and the continued utility of the existing inhabitants. Demand more from builders	Consider history and utility of existing inhabitants. Demand more from builders	<p>Comments noted. The Strategy recognises the importance of the Historic Environment and its's fundamental role in distinctive and natural placemaking through the planning system. The historic environment will be protected, conserved and, where appropriate, promoted and enhanced. The impact of any development proposal on the significance and heritage values of individual historic assets, their setting and their contribution to local distinctiveness and character will be required to be fully considered by applicants through the preparation of a heritage impact assessment and statement as part of the planning process, as outlined by Strategic Policy 18 (See Page 208). Development Management Policy (DNP11 – See Page 210) seeks to ensure that, where a development proposal affects a listed building or its setting, special regard must be had to the desirability of preserving the building, or its setting, or any features of special architectural or historic interest which it possesses.</p> <p>Furthermore, all development will be required to contribute to creating high quality, attractive, sustainable places that support active and healthy lives and enhance the community in which they are located, whilst having full regard to the natural, historic and built environment as set out by Strategic Policy 3: Good Design and Sustainable Place Making. Sustainable Placemaking is fundamental to the successful delivery of the Replacement LDP. Additionally Policies PLA1-PLA5 detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
528	I feel that as a resident of Bryncethin for over 50 years our village is already becoming overcrowded with what we call undesirables because members of councils and various other do-gooders think that by putting these 'underprivileged' people amongst law-abiding people who actually pay taxes and council tax and give something back to society will help them. It only causes misery for us. It is well known that gypsy and travellers will cause mayhem amongst a community that up till now is peaceful. To say that only 1 unit will be put on the site is complete rubbish as overnight it will be completely over-run when word gets about that bridgend council has allowed a site to be opened. Please think of the elderly and vulnerable people who are	Concerns relating to Gypsy, Traveller and Showpeople allocation SP7(2) Land adjacent to Bryncethin Depot	<p>The Council has a statutory duty to carry out an assessment of the accommodation needs of Gypsies and Travellers under Part 3 of the Housing (Wales) Act 2014 and to meet any identified need for additional pitches under section 56 of the Mobile Homes (Wales) Act 2013. PPW also clarifies that “where a Gypsy and Traveller Accommodation Assessment (GTAA) identifies an unmet need, a planning authority should allocate sufficient sites in their development plan to ensure that the identified pitch requirements for residential and/or transit use can be met” (para 4.2.35). When the GTAA was completed, the total estimated pitch provision needed for Gypsies and Travellers was 7 pitches up until 2033. Since then, one family has met their accommodation needs on an existing authorised site, leaving a remaining need for six pitches over the Plan period. This need stems from two families (i.e., three pitches per family). One of these families has recently received planning consent to intensify their existing site and meet their accommodation needs (planning application P/21/677/FUL refers). This leaves a remaining need for 3 pitches, which the Council considers can be appropriately accommodated by the original proposed allocation at Court Colman (SP7(1)), which is already in the family's ownership. As such, the other proposed allocation at Bryncethin (SP7(2)) is no longer considered necessary and has been removed from the Replacement LDP. Refer to the Gypsy and Traveller Site Options Background Paper.</p>

	living near where the site has been proposed. Thank you.		
529	Regeneration of Porthcawl; Aldi is not a 'regeneration' catalyst. Whilst the community do not have anything against an Aldi it is lightyears away from what this area needs to inject life and culture into what is a dead area ready for some ambitious plans which will bring with it jobs, attractions, 'regeneration' and pride in our amazing seaside town.	Concerns regarding proposed foodstore in Porthcawl	<p>Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings' as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to "place-making", taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans. However, it is important to note that the proposed foodstore will be subject to a future planning application.</p>
530	No more houses, cars and people	Objection to proposed housing developments	<p>Objection noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including</p>

			<p>some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of road infrastructure, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
532	Response related to Porthcawl	Response related to Porthcawl	A lack of information has been provided in order to offer a response.
533	Porthcawl is a leisure & pleasure destination, BCBC are right to recognise this value and LDP has to protect . Development of the waterfront has to maximise leisure & retail use. This LDP should be identifying specific / zoned areas to protect the waterfront as a destination for visitors. Housing should not be permitted within 100 metres of the sea wall, as used by many insurance companies. Any	Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open</p>

<p>development within PLA1 must not exceed the height of the nearest similar building. As the areas with PLA1 are on land used for carparking the LDP must demonstrate how / where each new dwelling will accommodate residents vehicles (say 2544) plus the need to accommodate ~1500 vehicles during peak demand (approx capacity of Salt Lake / Hillsboro place). Bus terminus location is key to ensure visitors can easily access existing & new leisure & retail outlets. It would seem that siting a terminus at the north end of PLA1 would funnel visitors away from John St.</p>		<p>space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper. An area north of the marina will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/ commercial, year round, wet-weather attraction.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>The coastal setting of this site makes it particularly important to consider the impacts of climate change on tidal flood risk as the majority of the site is susceptible to tidal flooding. The draft of the forthcoming revised TAN15 acknowledges that there are some large urban communities already located in areas at risk of flooding and investment in flood defence infrastructure will be required to keep such existing populations safe. Following dialogue with Welsh Government, Coastal Risk Management Programme funding was secured for major flood defence works at Porthcawl. Phase 1 (Eastern Promenade) is designed to protect the Salt Lake area and existing development to the north. Phase 2 (Coney Beach) encompasses flood and coastal erosion measures along the Coney Beach frontage to safeguard and enhance the existing flood protection to the frontage provided by the existing ad-hoc revetment. Implementation of these works will better protect the existing community from flooding</p>
--	--	--

			<p>and the effects of flooding. However, they also have significant potential to achieve wider social, economic and environmental benefits to contribute towards the statutory well-being goals of the Well-being of Future Generations (Wales) Act 2015. The greatest overall value can be achieved by combining these investments in flood defence infrastructure with other investment in active travel infrastructure, public realm improvements and regeneration-led development.</p> <p>The existing flood defences combined with completion of the new flood defence works has rendered the site a Defended Zone and will provide a coincidental opportunity to realise wider regeneration and placemaking benefits for the area through the delivery of Porthcawl Waterfront. On this basis, it is considered that the Porthcawl Waterfront site can be developed in full compliance with the requirements of the future revised TAN15. The defences are expected to provide a high standard of protection; significantly reducing the risk of flooding in areas within Zone 3 and respective areas in Zone 2. Nevertheless, all development in the area will necessarily be accompanied by a Flood Consequence Assessment to ensure the new development incorporates resilience to remain dry and safe as per the tolerable conditions set out in the future revised TAN15. The Replacement LDP's housing trajectory has factored in appropriate timescales for the completion of coastal flood defence works before forecasting dwelling completions. This presents a practical example of how to deliver a high priority brownfield regeneration scheme in a Defended Zone in the context of the forthcoming revised TAN15.</p> <p>The Council have also commissioned consultants to undertake a Landscape/Seascape and Visual Appraisal of the proposed regeneration. The appraisal assesses the proposed land use, storey height and density parameters. The assessment concludes that the development would not have an adverse impact on the Landscape/Seascape of Porthcawl, subject to appropriate design responses being incorporated at detailed design stage. The assessment recognises that the development offers to impose a dramatic and positive change across an extensive area, replacing areas of dereliction with new or enhanced accessible open spaces and high-quality buildings and facilities. Further detailed assessments and considerations will be undertaken, in order to influence the design of the development, including a detailed landscape and visual assessment that will assist in identifying detailed mitigation of adverse effects</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>Nevertheless, car parking as part of the plans for the proposed regeneration area will continue to be provided at the Hillsboro car park to the west of the regeneration area. Some visitor parking could be introduced as part of the enhancement of the Eastern Promenade. Additionally, the proposed regeneration will open up a number of opportunities for improving public transport. A new 'bus terminus' may also be located along the Portway where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The desired routes between the Eastern Promenade and Dock Street / John Street are important pedestrian links between the town and the regeneration area. Access and clarity of the routes will be required to be transparent without the need for extensive or other signage. Therefore, it is considered essential that it is designed in an integrated way with the area so that the linkage is viewed as being seamless.</p>
493	too indefinite	Too indefinite	<p>A lack of information has been provided in order to offer a response. However, in terms of deliverability, high-level viability testing has been carried out (see Appendix 32: Plan-Wide Viability Assessment (2021)), to give certainty that the Replacement LDP and its policies can be delivered in principle, taking into account affordable housing targets, infrastructure and other policy requirements. This high-level viability appraisal is further bolstered</p>

			<p>by site-specific appraisals for those sites key to delivering the Replacement LDP (i.e. strategic sites). The Council has maintained continuous dialogue with respective site promoters to demonstrate that these sites can be delivered through analysis of more specific costs, constraints and site requirements. Unlike this broad assessment, therefore, the site-specific strategic policies (PLA1-5). This dual-faceted approach is paramount to ensure Council's aspirations for delivering high-quality new communities are both realistic and deliverable.</p>
378	<p>This strategy seems to lack an understanding of the difference between regeneration and urbanisation.</p>	<p>Strategy seems to lack an understanding of the difference between regeneration and urbanisation</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>

			<p>Additional long-term brownfield Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p>
535	do not cut down any more healthy trees	Do not cut down healthy trees	<p>Comments noted. In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>The Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p>
538	Looking at the Barnes Avenue development "Morgans Meadows" this has had little or no improvements to the transport network, green infrastructure has been destroyed (Trees under a TPO have been cut down) now Health or Education facilities have been provided, so what guarantees will be put in place on other development sites?	Concerns regarding infrastructure	<p>Comments noted. In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>The Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>Furthermore, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>

			<p>In terms of road infrastructure, whilst developments are encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP’s Vision and Objectives for the County Borough.</p>
540	Absolute stupidity	Concerns regarding strategy	Comments noted. Considered non-material without rationale.
541	The proposed growth area in Pencoed is not under-utilised. It is valuable green space that is crucial to people’s mental health. It is what makes Pencoed a nice place to live, if you take it away you will not attract people to the area to live. Plus the infrastructure is not in place to build a large development in Pencoed. Please, please consider what you are doing because you are going to ruin the area. I would like to see your evidence that brown field sites have been considered over agricultural land	Concerns regarding Strategic Allocation PLA4: Land East of Pencoed	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>As part of the proposed allocation of Land East of Pencoed, Policy PLA4 sets out the site-specific requirements including masterplan development principles and development requirements. The site will deliver circa 770 homes (20% affordable housing), incorporating a new 1.5 form entry primary school, recreation facilities, public open space, active travel provision plus appropriate community facilities and commercial uses. Requirements will also ensure that the site retains and provides suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
543	<p>I feel that there has not been proper thought given to the space between Laleston and Bryntirion (PLA3) - myself and other residents of Bryntirion do not want 850 houses built here. We do not have enough resources for the people who already live here. It would also be detrimental to the environment to build on all of the green space in this area.</p>	<p>Concerns regarding Strategic Allocation PLA3: Land West of Bridgend</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA3 – Page 71). The provision of new residential dwellings, including affordable units, will be incorporated alongside a new one and a half form entry Primary School, recreation facilities, public open space, plus appropriate community facilities all set within distinct character areas. Policy PLA3 will ensure such development provides 4.1 hectares of retained green infrastructure and new areas of public open space as well as exploring the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland. Furthermore, the proposed allocation will be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
544	<p>Again, the strategy has outlined the importance of health, education and transport facilities needed, but seems to put emphasis first on building as much housing possible first. Why? the importance needs to be on providing the facilities for the already pressured areas, with a housing development growing at a slower rate, to allow the time needed for the facilities to be established properly. The example of Coity is a demonstration of the pressures that BCB are facing, whereby the school was finished and opened, and almost completely filled before the housing estate was finished from people who were waiting months/years for a place for their child.</p>	<p>Concerns regarding infrastructure</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). However, given the existing LDP's success in delivering</p>

			<p>development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision. As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision.</p> <p>As [AP1] documented within the SA Report and Spatial Strategy Options Background Paper, the majority of existing, viable, brownfield regeneration sites have recently been delivered under the existing LDP or are committed and expected to come forward within the next few years. However, remaining viable opportunities on previously developed land are exhausted, therefore some greenfield sites are required in a sustainable manner through complementary allocations on the edge of existing settlements. Identification of appropriate Sustainable Urban Extensions has been undertaken in accordance with the Site Search Sequence and other requirements set out in Planning Policy Wales, as documented in supporting evidence to the Plan. This includes the Candidate Site Assessment, Spatial Strategy Options Background Paper, Housing Trajectory Background Paper and Minimising the Loss of BMV Agricultural Land Background Paper. The rationale for the proposed allocations within the Deposit Plan is clearly outlined in the Candidate Site Assessment. Without exception, all proposed sites are supported by a large body of technical and viability evidence to demonstrate their deliverability.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pen-coed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of</p>
--	--	--	---

			<p>justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
638	<p>It is important to create a strategy that allows for future housing requirements, like this spatial strategy does. I think there is a need to develop and invest in properties that already exist for housing, and not necessarily to just develop new housing. A spatial strategy should include views on how to make the best use of spaces that already exist for these purposes.</p>	<p>Comments relating to the LDP development strategy.</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p>

			<p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>
639	No	No changes proposed	Comments noted
438	Internet nationalised nationwide.	Comments relating to the provision of nationalised internet within the borough.	Comments noted. This would be beyond the scope of the Local Development Plan. Although, the LDP supports the NDF 2040 outcomes which address the provision of world-class digital infrastructure. Better digital communication will enable economic and social progress and ensure Wales can lead and keep pace with the latest global technological advancements. In this regard, the LDP will incorporate Policy 13 (Supporting Digital Communications) of the NDF 2040, which stipulates that Planning authorities must engage with digital infrastructure providers to identify the future needs of their area and set out policies in Strategic and Local Development Plans to help deliver this. New developments should include the provision of Gigabit capable broadband infrastructure from the outset.
640	<p>Parking will be a major consideration, it's not inspirational but necessary. I would hope that prime real estate is not necessarily used for this but existing sites are used to be improved where necessary. The town is desperate for health and leisure facilities. We are a coastal town and can reinvent our entire economy if we become an environmentally friendly, leisure orientated town. Residents are sick and tired of the plastic, rubbish and the type of people that visit us currently. We need to relaunch our look and feel, lose the chips, cans of beer and disposable BBQ mentality and make the town and surrounding sea fronts areas aspirational and inspiring. If Porthcawl was in Cornwall or Devon, it would be an incredible seaside destination rather than a tired, rundown seaside town that still attracts generations of uneducated people who come here to sit and eat chips on the beach and leave their litter behind. We need better transport, green areas - futuristic, greener technologies and leisure is key to making it work. Healthier populations are more productive. We have a real opportunity. I hope local initiatives like the pump track, swimming facilities like a lido or some lanes, outdoor climbing, gyms and play areas are taken seriously and given consideration. It would be a criminal not to. Pls</p>	Concerns relating to traffic congestion and infrastructure.	<p>Comments noted. As set out by Policy PLA1 (See Page 63), Porthcawl Waterfront is an underutilised brownfield site occupying a prominent seafront position. The regeneration site is allocated for a residential-led, mixed use scheme that will deliver up to 1,115 dwellings with associated facilities, including tourism, open space, leisure, retail, a bus terminus and community provision. Policy PLA1 details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. Delivery of the site will prove fundamental in achieving the Replacement LDP's Vision and Objectives for the County Borough.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>Additionally, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p> <p>Site specific plans have not been finalised as of yet, however a high level masterplan envisages development is envisaged to be higher (and therefore denser) closer to the seafront (particularly toward the west) with lower/less dense development toward the middle, northern and eastern peripheries of the site. Proposed density has and will continue to be informed by a Landscape/Seascape and Visual Impact Assessment. Further assessments will be undertaken to inform such matters to ensure that development is of appropriate scale to local setting.</p>

	think outside the box, travel, research what's out there. This is an opportunity not to be squandered.		In terms of the environment, a Phase 1 Habitat Survey has been undertaken, of which robustly determines what ecology constraints may exist within the site. The findings indicate that the proposed development would not have any adverse impact. Whilst further surveys will be undertaken, the proposed development of the site is not unacceptably constrained by biodiversity and nature conservation issues.
641	Laleston and Bryntirion should not in any way be considered as priority areas for regeneration under the spatial strategy. It is not credible that a robust scoring system for regeneration would place Laleston/Bryntirion above other areas in the borough.	Concerns relating to PLA3.	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site 308.C1 Bridgend (West of) was considered appropriate for allocation.</p>

		<p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA3 – Page 71). The provision of new residential dwellings, including affordable units, will be incorporated alongside a new one and a half form entry Primary School, recreation facilities, public open space, plus appropriate community facilities all set within distinct character areas.</p> <p>Policy PLA3 will ensure development positively integrate the remains of Llangewydd Church and Churchyard Scheduled Ancient Monument in a manner that preserves and enhances the remains as part of the wider site. Development must also incorporate the Laleston Trail within the central part of the site, providing access to the Bridgend Circular Walk and realigned Public Right of Way. Furthermore, the enclosed byway with the existing hedgerow corridor will be retained as the Y Berth cross link. In terms of active travel, Policy PLA3 requires on-site and off-site measures to provide good quality, attractive, legible, safe and accessible pedestrian and cycle linkages in accordance with Active Travel design. Improved linkages must be provided along the A473, with Bryntirion Comprehensive School and Bridgend Town Centre (including the bus station and train station). New connections will be provided to accord with the proposed routes within the Council's ATNM: INM-BR-52, INM-BR-55, INM-BR-57, INM-BR-58, INM-BR-127 and 2120.</p> <p>The Replacement LDP is accompanied by a SA Report (incorporating SEA) to assess the likely sustainability and significant environmental effects of all substantive component within the Plan (strategy, policies, site allocations, etc.) and any identified reasonable alternatives. This builds directly upon previous SA reporting including an SA Scoping Report (2018) and an Interim SA Scoping Report (2019) which accompanied the Replacement LDP Preferred Strategy. The Deposit Plan SA Report demonstrates how the SA, incorporating SEA, process has informed the development of the Deposit Plan, including the incorporation of recommended changes within the document. As a result, the SA Report concludes that there is good coverage of all key sustainability issues in Deposit Plan, with plan components performing well against the SA Framework. It also identifies strong compatibility between the LDP Vision/Objectives and the SA Framework, plus no likely significant adverse effects (taking account of mitigation in all its forms).</p> <p>In accordance with statutory requirements, Planning Policy Wales sets out multiple requirements for development to avoid direct adverse effects on nationally important heritage assets and for the need for any development resulting in adverse effects on the historic environment to be robustly justified. There is also a general presumption in favour of the preservation or enhancement of listed buildings and their settings, along with a requirement for development not to result in direct adverse effects on Scheduled Monuments, unless there are exceptional circumstances. These issues are grouped under 'Cultural Heritage', which is one of the 14 Sustainability Objectives considered by the SA. The potential for adverse impacts on Cultural Heritage was and is an important consideration in determining the overall sustainability and thus suitability of candidate site allocations. Any sustainability impacts would also depend on the scale of development proposed.</p> <p>All Stage 2 Candidate Site Sites were considered to ascertain whether they had the potential to cause an adverse impact upon the historic environment. To facilitate this assessment, the Council consulted with the Glamorgan-Gwent Archaeological Trust (GGAT) early on in the process for their views on the likely range of impacts on the historic environment along with recommendations for mitigation. Any identified impacts were required to be mitigated by site promoters.</p> <p>For Land West of Bridgend the SA identified the potential for adverse impacts due to the proximity of the site to scheduled monuments and important archaeological sites. However, the requirements under SP2 (for each strategic site allocation to be supported by a detailed masterplan) and PLA3 (for the proposed strategic site allocation to implement specific masterplan development principles) represent forms of mitigation to help address the identified likely significant effects. These requirements also enhance the sustainability performance of the strategic site allocation more generally. The SA identifies relevant masterplan development principles included</p>
--	--	--

		<p>in these spatial development policies to help ensure the avoidance of likely significant adverse effects which could otherwise occur from this development proposal. Additional masterplan development principles are also included within Policy PLA3 to ensure site applies Good Design principles and a Sustainable Placemaking approach to siting, design, construction and operation in accordance with Planning Policy Wales. These principles were informed by SA findings and have been incorporated into the final Deposit Plan, with SA site assessment scoring updated to reflect their inclusion in the Deposit Plan.</p> <p>Further to this, the site promoter commissioned EDP to undertake an Archaeological and Heritage Assessment. The assessment establishes that the site does not contain any World Heritage Sites, Scheduled Ancient Monuments, listed buildings, registered historic parks and gardens or historic landscapes, where there would be a presumption in favour of their physical preservation in-situ and against development. In terms of archaeological remains, the site is identified as having moderate to high potential to contain remains from the medieval period, particularly in its northern extremity, which is adjacent to the site of the former Llangewydd Church. However, the land is a SINC and will not be developed. Policy PLA3 will require development to positively integrate with the remains of Llangewydd Church and Churchyard Scheduled Ancient Monument in a manner that preserves and enhances the remains as part of the wider site.</p> <p>While there is a small amount of evidence for late prehistoric and Roman activity in the surrounding 1km study area, the potential for archaeology of these periods within the site is deemed low. Post-medieval settlement was focused elsewhere in the locality and any archaeology of this period within the site is most likely to relate to agriculture. Overall, the baseline data indicate that the probability of significant archaeology being present is low. Any further archaeological investigation can reasonably be secured through an appropriately worded planning condition appended to a planning permission.</p> <p>Potential impacts upon the setting of historic assets in the locality have focused on the 1km study area. No significant effects arising from changes to setting have been identified for scheduled monuments, listed buildings and registered parks and gardens. In respect of the Laleston Conservation Area, there will also not be any significant changes to its visual setting. It is acknowledged that development in the southern part of the Site will remove a part of the agricultural landscape around Laleston which forms a buffer from Bryntirion to the east. However, agricultural land will remain on all sides around Laleston, which will retain its character as a discrete settlement, while landscaping measures associated with the development will mitigate any impression of coalescence. This is assessed as an impact of a minor order, with the special interest of the conservation area being retained. Policy PLA3 will require development to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The site promoter also commissioned EDP to undertake a Landscape and Visual Appraisal (LVA). The purpose of the appraisal was firstly to inform the design evolution of the scheme which enabled an integrated approach to potential landscape and visual opportunities and constraints.</p> <p>The LVA outlines that there are adverse and beneficial landscape effects resulting from development of this site. However, the embedded mitigation and the approach to design is considered to minimise adverse effects over time as the proposed landscape establishes and overall the predicted effects are not considered unacceptable from a landscape and visual perspective in the context of the delivery of a strategic housing site.</p> <p>The appraisal included a review of national and local policy, landscape character and visual amenity. The appraisal included assessment of the National Landscape Character Assessment (NLCA), LANDMAP, and Landscape Character Assessment for Bridgend County Borough (LCABC) (2013) in addition to an on-site assessment. The appraisal confirms that the site relates well both in landscape and visual terms to the existing landscape and settlement, and that the site represents a logical extension to Bryntirion provided a considered</p>
--	--	---

		<p>design is sensitive to the site's existing characteristics. The design appraised responds sensitively to assets on site such as the Bridgend Circular Walk, the byway, the hedgerow network and vegetated site boundaries. As such the proposals put forward at this stage are considered to be a thoughtful and easily assimilated future development of this site.</p> <p>Mitigation measures include:</p> <ul style="list-style-type: none">• The Laleston Meadows SINC would be brought into regular long-term management. This would protect the visual amenity and landscape character of this northern part of the site. A landscape buffer would set development back from the SINC, and dwellings would front onto it. The SINC could be used as a mitigation receptor site (in ecological terms) and the grazed fields currently within the SINC could be improved by the proposals as well as maintained in the long term. The SINC offers a great opportunity for informal and natural play on site provided increased public access would not clash with its ecological function;• The site contains very few of the key characteristics listed in the published documents on Laleston SLA. The site has a strong network of hedgerows, some which would be lost and the field pattern replaced by urban form. However, the retained hedgerows and trees would be protected by landscape buffers and some of the character of the SLA within which the site lies would be retained;• Provision of structural landscaping, a mix of native and non-native trees and shrubs proposed throughout the site for biosecurity, diversity of ecosystems and habitat creation as well as the visual amenity of future residents. Areas of open space would be bolstered by considered structural planting to create an aesthetically pleasing urban development which is well integrated with the proposed landscape strategy and the settled landscape character currently experienced in the local area;• Retention of existing landscape features (hedgerows and trees) is a priority of the emerging proposals as it forms a desirable strong green framework that links with the wider green infrastructure to the north, west and south of the site;• Adequate replacement planting of local species in appropriate locations to compensate for any loss of trees and hedgerows, and enhancement planting; and• The location of public open space, public footpaths and the street-alignment has been designed to protect and reflect local character. <p>Through consideration of the findings above, it is anticipated that any notable landscape and visual effects resulting from the addition of the proposed scheme would be localised in extent and contained within a c.400m radius of the site, despite the site's relatively open character.</p> <p>Overall it is considered that the masterplan framework proposed for the site has been sensitively designed through a landscape and ecology-led approach, with appropriate incorporation of mitigation measures in order to address concerns of the site in relation to landscape and visual matters. As such, the promotion of this site for residential development should be considered an acceptable extension to the existing settlement of Bryntirion which would not cause significant or wide-ranging adverse effects upon its surrounding landscape context.</p> <p>Policy PLA3 will ensure that the design and layout of the site has regard to the landscape in which it sits, considering the interface between the site, Bridgend and Laleston. Visual impacts must be minimised through the inclusion of mitigation measures and provide links with the existing landscape and access features to safeguard landscape character whilst creating a sense of place. The development must also not be to the detriment of the Special Landscape Area and any development proposal must incorporate measures to reduce adverse effects and/or visual intrusion on the wider landscape.</p> <p>In terms of biodiversity/ecology, an ecological desk study and Extended Phase 1 survey has been undertaken by EDP. The desk study has noted that within the Study Site's zone of influence there are a number of statutorily</p>
--	--	---

		<p>and non-statutory designated sites present, most notably Laleston Meadows SINC which overlaps with the site itself.</p> <p>Given the combination of designated sites, it is concluded that any future planning submission will need to consider the potential for direct and indirect impacts to arise upon qualifying features, including the Laleston Meadows SINC. However, it is inherent within the emerging masterplan that the Laleston Meadows SINC and its associated designated features will be retained. Furthermore, such retained features will be further protected from potential harm, damage and disturbance through the sensitive design of built development away from SINC boundaries and inclusion of suitable buffers.</p> <p>The desk study confirms that the inclusion of Laleston Meadows SINC within the Study's Site boundary will provide substantial potential for a balanced provision of areas of informal public open space and wildlife zones. When linked with proposed POS and play areas across the developable site this will provide a significant benefit to both visual and recreational amenity, conservation and biodiversity enhancement. In respect of the latter, the SINC provides a potential space to accommodate ecological mitigation and biodiversity enhancements and thus offset ecological impacts that may arise during the development of adjacent land.</p> <p>An Extended Phase 1 survey was undertaken in February 2020, supplemented by further roosting bat works in March 2020. The Phase 1 survey concluded that the site is dominated by agriculturally improved grassland of limited botanical interest and thus of low inherent ecological value. Habitats of greatest ecological importance include the native hedgerows delineating the northern boundary and internal field boundaries in addition to woodland habitat and marshy grassland associated with Laleston Meadows SINC. The roosting bats surveys identified several trees with low to high potential to support a bat roost whilst onsite ponds have been considered for their potential to support great crested newt.</p> <p>The results of the desk study and Extended Phase 1 survey have influenced the masterplan which has sought to locate development across those habitats of predominantly limited ecological value whilst retaining boundary habitats as far as possible. Where retained, such features have been accommodated within proposed informal green space and sustainable transport links, which ultimately enhances connectivity throughout the Site and contributes to the wider green infrastructure resource.</p> <p>Where avoidance is not possible, however, and will result in the loss of internal field boundaries (albeit predominantly species-poor or defunct), the site is considered to be of sufficient size and extent to enable future development proposals to flexibly avoid and/or mitigate for any significant ecological constraints and compensate where necessary. This will be in addition to the sensitive positioning of built development away from retained boundary features to minimise damage.</p> <p>The report also highlights further detailed habitat and species surveys which are recommended to inform a planning application and ensure proposed mitigation is appropriate and proportional. These include a Dormouse survey, which was raised in comments received from NRW. Policy PLA3 will require the development to retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland) and Laleston Meadows SINC, which includes the green space bordering the northern and north-western boundaries of the site. PLA3 will also require the developer to submit and agree ecological management plans including proposals for mitigation, enhancement and maintenance for retained habitats and protected species (including for bats and dormouse) and provide appropriate compensatory and replacement habitat.</p> <p>Policy PLA3 will require development to incorporate the Laleston Trail within the central part of the site, providing access to the Bridgend Circular Walk and realigned Public Right of Way. Additionally, PLA3 requires Green</p>
--	--	---

			<p>Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>With regards to education and comprehensive school provision, a contribution will be taken in accordance with the Education Facilities and Residential Development SPG and a decision will be made by the Local Education Authority as to how the sum will be utilised.</p> <p>In terms of sewerage, Dwr Cymru Welsh Water have confirmed that reinforcement works are required on both the clean and foul network to accommodate the site as a whole and a Hydraulic Modelling Assessment will be required to inform such works. They have also confirmed that there are no insurmountable obstacles to the delivery of the site.</p> <p>With respect of drainage, the site promoter has prepared a high-level drainage strategic of which confirms that the site is located with DAM Zone A, which is used within Technical Advice Note 15 to indicate that there is considered to be little to no risk of fluvial or tidal flooding at such a location. This reflected in comments received from NRW, and in the Strategic Flood Consequence Assessment (SCFA which informs the LDP and flags the site as green in its RAG assessment. As such, all proposed land uses are permitted without need for a flood consequence assessment. The SFCA does highlight that a small proportion of the site (4.9%) has a low risk of flooding due to surface water, which corresponds with topographic depressions running from north to south. There are two areas most at risk of surface water flooding. The first corresponds with a path of surface water flowing down into the north western corner of the site. This area of the site is currently comprised of woodland which is to be retained as part of the proposals. It is therefore considered that this area of surface water flood risk will have little influence on development proposals. The second area is a key surface water flow route that runs through the centre of the site towards the A473 where a small area of high surface water flood risk is shown. The surface water flow routes in this part of the site will be retained where possible and incorporated within the surface water drainage strategy through the use of SUDs and green corridors.</p> <p>In terms of the impacts on primary healthcare provision, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>The site promoter commissioned Air Quality Consultants to undertake an Air Quality Assessment to assess the impact of the proposed development and subsequent increased traffic emissions arising from the additional traffic on the Air Quality Management Area (AQMA) of Park Street. Concentrations have been modelled for a number of worst-case receptors, representing existing properties where impacts are expected to be greatest. In addition, the impacts of traffic emissions from local roads on the air quality for future residents on the proposed development have been assessed.</p>
--	--	--	---

			<p>The assessment has demonstrated that concentrations of PM10 and PM2.5 will remain below the objectives at all existing receptors in 2022, with or without the proposed development, and that all impacts for these pollutants will be negligible.</p> <p>In the case of annual mean nitrogen dioxide, concentrations will remain below the objective at all but one existing receptor (representative of 6-8 homes) in 2022, with or without the proposed development. However, it is now considered unlikely that any new homes within the development will be occupied before 2024, by which time it would be reasonable to expect concentrations at these 8 homes to be below the objective. The assessment has demonstrated that the impacts in terms of annual mean nitrogen dioxide concentrations of the full development traffic being on the roads in 2022 will be negligible everywhere other than at this one receptor, where the impact under this scenario would be moderate adverse. However, bearing in mind that no new homes will be occupied before 2024, and the development is unlikely to be complete and thus generating its full traffic volumes until the 2030s, this scenario is unrealistically worst-case. Applying professional judgement, it is considered most likely that the actual impact of the development at these 8 homes will also be negligible in all years from the first occupation in 2024.</p> <p>The effects of local traffic on the air quality for future residents living in the proposed development have been shown to be acceptable at the worst-case locations assessed, with concentrations being well below the air quality objectives. As such, the overall operational air quality effects of the development are judged to be 'not significant</p> <p>The proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The Transport Assessment reflects the number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA3 prescribes the appropriate development requirements in relation to all forms of travel. For the avoidance of any doubt, this number of dwellings does not require the original proposed site boundary to be expanded, rather more efficient use of the existing net developable area. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA3 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel</p>
--	--	--	--

			<p>demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA3 prescribes a number of placemaking principles for Land West of Bridgend, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages along the A473, with Bryntirion Comprehensive School and Bridgend Town Centre (including the bus station and train station). New connections will be provided to accord with the proposed routes within the Council's ATNM: INM-BR-52, INM-BR-55, INM-BR-57, INM-BR-58, INM-BR-127 and 2120.</p> <p>Policy PLA3 will require on-site highway improvements to ensure the principal point of vehicular access is achieved from a new signalised junction with the A473 at the southern boundary; the junction will accommodate a new-shared use crossing to connect the internal cycleway/footway with the existing active route BRC9b on the southern side of the A473.</p> <p>The site promoter's Transport Assessment confirms that the traffic effect of 850 dwellings is forecast to be in the order of 269 and 243two-way movements in the AM and PM peak hours respectively, although this is considered worst case as attitudinal change towards travel progresses. This quantum of trips equates to just over 4vehicles per minute two-way, diluted across the local highway network. The assessment concludes that the development provides opportunities to create a new western edge to Bridgend in a self-sustaining site offering community facilities suitable for day to-day living. In this way, the transport case for mobility provides the options necessary to promote sustainable travel modes before the private vehicle. The design of the environment, the travel planning and the locational advantages, together with the Mobility Strategy means there is a major benefit for existing and new residents, significantly improving travel choice, for commuting, leisure and social journeys and hence social inclusion. Working from home and from a third-place such as a non-site Workhub will be encouraged from the outset, in line with Welsh Government's aspirations.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
643	Bridgend is already oversubscribed with massive housing estates in Broadlands, Brackla, Litchard and Coity. Where are the	Concerns relating to over-development,	Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to

	<p>supporting doctors, dentists, care homes in these conversations? Just one surgery in Brackla which covers Bridgend and Laleston patients, and 1 dentist in Broadlands, which is well oversubscribed and appointments very difficult to get for existing patients. Bridgend will look as if it joins up seamlessly to Pyle - where will the jobs come from?</p>	<p>employment and a lack of infrastructure.</p>	<p>contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p>
644	<p>We do not need more industrial/business parks. More affordable housing is needed. Please please please we need better cycle routes like Holland. I would love to see a safe cycle route all the way from Pyle train station to Porthcawl. Families could get the train to Pyle and cycle to Porthcawl. Park & Ride would be good too, to decrease the car</p>	<p>Comments relating to housing provision, cycling routes and traffic.</p>	<p>Comments noted. As set out by Policy PLA1 (See Page 63), Porthcawl Waterfront is an underutilised brownfield site occupying a prominent seafront position. The regeneration site is allocated for a residential-led, mixed use scheme that will deliver up to 1,115 dwellings with associated facilities, including tourism, open space, leisure, retail, a bus terminus and community provision. Policy PLA1 details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. Such requirements include on-site and off-site measures to provide good quality, attractive, legible, safe and accessible pedestrian and cycle linkages in accordance with Active Travel design. Improved linkages must be provided along the waterfront, to connect with the Eastern Promenade, Porthcawl Town Centre</p>

	<p>traffic in Porthcawl. Community spaces for pop up, unique, local businesses</p>		<p>and Porthcawl Comprehensive School. New routes should also be provided to accord with the proposed routes within the Council's Active Travel Network Maps (See Appendix 29). Development will also be required to provide a new roundabout and link road to enable access to the Sandy Bay development parcels; an emergency access through Dock Street and Sandy Lane; off-site highway improvements with regard to the requirements arising from the Transport Assessment and as identified in the Transport Measures Priority Schedule.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>The Council has undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans. The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan.</p> <p>Additionally, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
645	doubtful		Comments noted
646	<p>Whilst obviously more housing will be needed and can't be fulfilled by reducing the number of empty properties in the county, Bridgend is chocking. Long queues on the roads, insufficient public transport, insufficient provision of schools, medical facilities, ... all have to be addressed urgently. The authorisation of yet another fast food outlet and enlarged shop in the A48 by-pass area near MacDonalds does not inspire confidence in the planning authorities. The residents of Picton Gardens for example already have sever problems. The road out of the retail area onto the A48 by-pass is totally inadequate. The second lane immediately before the roundabout is completely useless and with the building work in progress clearly this problem will not be addressed.</p>	<p>Concerns relating to traffic and road infrastructure.</p>	<p>Comments noted. The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and</p>

			<p>enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p> <p>In terms of infrastructure, Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
647	Green field sites should not be considered as viable options for expansion.	Concerns relating to loss of greenfield.	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including</p>

			<p>some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision.</p> <p>As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision.</p> <p>As [AP1] documented within the SA Report and Spatial Strategy Options Background Paper, the majority of existing, viable, brownfield regeneration sites have recently been delivered under the existing LDP or are committed and expected to come forward within the next few years. However, remaining viable opportunities on previously developed land are exhausted, therefore some greenfield sites are required in a sustainable manner through complementary allocations on the edge of existing settlements. Identification of appropriate Sustainable Urban Extensions has been undertaken in accordance with the Site Search Sequence and other requirements set out in Planning Policy Wales, as documented in supporting evidence to the Plan. This includes the Candidate Site Assessment, Spatial Strategy Options Background Paper, Housing Trajectory Background Paper and Minimising the Loss of BMV Agricultural Land Background Paper. The rationale for the proposed allocations within the Deposit Plan is clearly outlined in the Candidate Site Assessment. Without exception, all proposed sites are supported by a large body of technical and viability evidence to demonstrate their deliverability.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. Sites will be required to deliver affordable housing, education provision, recreation facilities, public open space, active travel provision plus appropriate community facilities.</p>

			<p>development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. Sites will be required to deliver affordable housing, education provision, recreation facilities, public open space, active travel provision plus appropriate community facilities.</p>
651	There are already 4 primary schools feeding into Bryntirion Comprehensive School. Would the school be able to accommodate the influx of extra pupils from this developments not to mention the pre-existing primary schools in the area?	Concerns relating to school's capacity.	<p>Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements including a series of masterplan development principles and development requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process.</p> <p>Such development must accord with a list of principles and requirements, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. The Council will require the preparation of a masterplan of which will need to be agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will be facilitated through the provision of affordable housing, on-site education provision, public open space, appropriate design, layout and densities in addition to active travel provision.</p> <p>As part of the proposed allocation of Land West of Bridgend, any development will be required (See Deposit Policy PLA3 – Page 71) to provide 2.3 hectares of land to accommodate a 1.5 form entry primary school with co-located nursery facility and a financial contribution to nursery, primary, secondary and post-16 education provision as required by the Local Education Authority. Development of this scale is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p>
547	This strategy needs to be balanced with ensuring there is adequate educational facilities at the time of the build and not an after thought. It is not acceptable for children to be taught in temporary classrooms now which is happening in some of the areas identified. The traffic within these areas and the carbon footprint impact is a big co concern.	No changes – concern over provision of education facilities / infrastructure	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure. The timing of delivery of the infrastructure identified within the</p>

			<p>IDP will be secured by means of planning agreements/obligations to ensure that all residents have good access to a range of services and facilities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore, a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>The Council has set ambitious renewable energy deployment targets to maximise the use of local resources available within the County Borough. In order to reduce future energy demand, strict policies have been introduced that seek to maximise the energy efficiency of new development, integrate energy generation into wider development proposals, and ensure that low carbon heating systems are installed.</p>
555	More investment in local infrastructure and jobs is needed as schools in the area are already oversubscribed, also more well paid jobs are needed	No changes – concerns over job creation and infrastructure delivery	In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
567	Echoing my comments on the strategic objectives, any development needs to consider impact of increased use of travel corridors. Infrastructure improvements to travel networks cannot be limited to improving roads already in place but when considering developments in the valley areas, transport network improvements must provide alternative routes. Residents already living alongside the main arterial roads have seen a significant increase in traffic density due to residential and industrial developments "up river", and increased traffic density is likely the cause of damage to buildings, increased pollution and raises safety concerns. The increase in traffic density coupled with a single main route through the valleys has shown to cause significant problems in case of accident/incident closing the road, showing that there needs to be redundancy in the road network to support the development of any sites further up the valleys.	Concern over infrastructure delivery, particularly transport connectivity	<p>The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore, Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-</p>

			orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.
569	I agree that Maesteg needs sites regenerated and to provide new work and social opportunities within the area. I do not think current green areas should be removed in order to sustain any new development (eg pont rhyd y cyff). Spend that money on making the roads safer by resurfacing the absolutely abysmal potholes throughout the valley.	Supports regeneration of brownfield sites over greenfield development	The LDP strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements, there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.
582	The regeneration of areas has been great to see.	Supports regeneration strategy	Comments noted
591	Growth is good and very much needed but not at the cost of local amenities which are needed more than housing. Bcbc need to find the correct balance and think of Porthcawl first not puns signs	Concern over impact on existing infrastructure	The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.
592	Houses need to have infrastructure ie more doctors, schools etc. Porthcawl in particular needs more tourist attractions to promote jobs.	Concerns over infrastructure delivery	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
593	No development should be allowed on green field sites or outside the settlement boundary.	Objects to green field development	The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering

			development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.

601	The green by Marlas and Cilgant y lein is constantly used by dog walkers and should be kept in developed when like I keep stating other premises sit empty	Re-use of empty properties over development of green spaces	As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's play space across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.
606	Porthcawl would benefit from the building of a pump track and a splash park along the seafront	No changes – Porthcawl needs leisure facilities	<p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year-round, wet-weather attraction.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. In terms of open space, Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities of which are to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
607	I believe more focus should be on areas 1 and 2. Development on green spaces, areas currently used for farming, nature, should not be developed. The environmental impact could be devastating, increasing traffic, waste, pollution etc in addition to decimating the area's wild species.	More growth should be focussed in Maesteg and Porthcawl, objects to greenfield development	<p>The distribution of growth is evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables</p>

			sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.
609	You seem intent on building on almost every spare patch of green that we have available. NO provision seems to be made for sufficient healthcare and education premises, and the facilities we currently have are totally over stretched with the current population.	Concerned about green field development and provision of infrastructure	<p>Policies PLA1-PLA5 (See Appendix 1, Deposit LDP, Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of GP surgeries, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p>
611	The proposed developments do not appear to have prioritised brownfield sites as indicated above. The majority seem to be proposed on farmland and countryside which is hugely disappointing.	Concerned that Spatial Strategy does not prioritise development of brownfield sites	<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement Policy SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>Additional long-term Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery. The retention of such sites represents a necessary degree of continuity with the first adopted LDP, which is essential to implement the long-term regeneration strategy embodied within the Replacement LDP Vision. However, for the avoidance of doubt, and in accordance with national policy, these Long-Term Regeneration Sites are not</p>

			included as a component of housing supply. The housing land supply will therefore not be dependent on their delivery, in recognition of the fact that they require longer lead-in times and/or more detailed strategic master plans before they can come forward. Whilst Long-Term Regeneration sites will still be allocated in the plan to enable their delivery, they will not be relied upon as contributing to the housing requirement and will also not be included in the windfall allowance. They are essentially 'bonus sites', notwithstanding the fact that these significant brownfield sites are highly conducive to sustainable development and delivery of the full range of placemaking principles outlined in Planning Policy Wales. This is clearly referenced within the Housing Trajectory Background Paper (See Appendix 44). Further justification for the allocation of sites in the Deposit LDP is provided in the Candidate Site Assessment Report (See Appendix 13).
615	The emphasis on housing appears to be centred on Bridgend rather than uniformly distributed throughout the Borough	Too much focus on development in Bridgend	<p>The distribution of growth is evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement Policy SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p>
618	I am against the proposal to place windfarms in the Maesteg area, They are not carbon footprint friendly and have not resulted in lower electricity bills - our bills are increasing every year!! Why are we not investing in geothermal energy and the Bristol Channel barrage to produce all the energy we need in Wales???	Opposed to windfarm development in Maesteg area, queries renewable energy generation	<p>The Council recognises the significant role of renewable energy has to play. The Council has undertaken a Renewable Energy Assessment (See Appendix 17). The Assessment estimates the current and future energy demands of the County Borough, along with the progress in meeting these demands from local low carbon energy generation assets. Against this backdrop, land within the County Borough boundary has been subject to a resource assessment to identify the potential for renewable and low carbon energy project deployment from a resource perspective. A number of technologies have been considered, including, wind energy, ground mounted solar PV, biomass energy, energy from waste, hydropower energy and building integrated solar PV.</p> <p>The Council has set ambitious renewable energy deployment targets to maximise the use of local resources available within the County Borough. In order to reduce future energy demand, strict policies have been introduced that seek to maximise the energy efficiency of new development, integrate energy generation into wider development proposals, and ensure that low carbon heating systems are installed.</p>
622	some of the roads are quite small going into the valleys? some of the payments are too big and you need to make extra room for vehicles to park in these areas giving easier access to the valleys and increased footfall into these areas, so people can spend money there	Transport infrastructure serving the Valleys needs improvement	The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.

			<p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore, a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore, Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>With specific reference to parking requirements, Policy SP5 requires that developments are served by appropriate parking provision, in accordance with the Council's parking guidance, including infrastructure which caters for future technological developments such as electric vehicle charging points, and circulation areas, including adequate road widths to allow access for service vehicles.</p>
657	Invest in the local halo centre, grow the town centre encourage residents to shop in the local bridgend area. Local produce markets more frequently grow the town centre offer	No changes – more investment in Bridgend Town Centre required	<p>Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in customer spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p>
669	Save the Coity graveyard	No changes	Comments noted.

			No candidate site submission was received for the land known as Coity Graveyard. The settlement boundary currently passes through the middle of the site, so part of the land is considered to be in the countryside. The Settlement Boundary Review (See Appendix 38) undertaken to support the preparation of the Replacement LDP does not propose altering the settlement boundary in this location.
692	must be monitored by an outside party	No changes	Comments noted Please refer to Appendix 4 of the Deposit LDP (Appendix 1) for details of how the Replacement LDP will be monitored and reviewed. This follows the statutory requirements of the Planning and Compulsory Purchase Act 2004 and the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005.
696	A load of buzz words, but quite frankly, its completely meaningless	No changes	The Plan has to be prepared in the context of national legislation and guidance and has to be informed by an evidence base comprising of background papers and other technical documents. The written statement has been written with the aim of being understandable and not too technical or jargonistic but its content must reflect the fact that it is a land use plan. The Plan has been accompanied by an easy read summary leaflet, and the opportunity for telephone calls on an appointment basis where Officers were on hand to help talk interested persons through the Plan, its policies and proposals and how to comment. All Local Development Plan documents were available in main libraries throughout the County Borough in addition to the Civic Offices via appointment. Guides on how to comment and register were available online. Additionally, the phone lines were manned between the hours of 9am-5pm weekdays to provide assistance. The Local Development Plan has to be written in a particular style to meet the guidance set out in the LDP regulations manual.
697	Speed of change needs to included	Development timescale required	Comments noted. Please refer to Appendix 44 (Background Paper 4 – Housing Trajectory). This contain the housing trajectory for the Replacement LDP which is the key mechanism to demonstrate how all sites will be delivered in the identified timescales, throughout the whole plan period, to meet the housing requirement.
700	Depends on where house building takes place and fits in with present features.	No changes	Comments noted.
725	There should be a bigger focus on green infrastructure. Houses including solar panels, green rewilded spaces. Wildflowers replanted.	Needs more focus on provision of green infrastructure	The Deposit LDP is supported by a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space (See Appendix 22) within the County Borough which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Active Travel Integrated Network Maps (Appendix 29). As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals. Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.

	XXXXXXXXXXXXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXXXXXXXXXXXX		
735	Need more buses in Bettws other buses r every half hour and other run in the evening ours stops qt 4.30pm	Concern over lack of bus services	Comments noted. The provision of additional bus services is outside the scope of the LDP.
645	I suspect the regeneration of Ogmores Valley will take some doing. It's been too long.	Concerned over deliverability of regeneration of Ogmores Valley	<p>The Spatial Strategy recognises the need to deliver wider regenerative benefits to Valleys communities at a scale which acknowledges their infrastructure capacity, topography and geographical constraints. Therefore, Maesteg and the Llynfi Valley is allocated as a Regeneration Growth Area, reflecting the fact that it demonstrates the largest capacity to accommodate regeneration-led growth within the Valleys communities. There are individual sites within this area that already have the benefit of planning permission or are the subject of development briefs or master planning exercises to facilitate their delivery and regeneration. A substantial number of these sites are also brownfield or are under-utilised, whilst also being aligned to transport hubs, thereby demonstrating high credentials in terms of sustainable development and placemaking. However, it is acknowledged that some will require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to facilitate delivery.</p> <p>The Ogmores and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p>
769	Too high level for comments, public need an appropriate consultation...not this	Concern over public consultation	<p>It is the view of the Council that the overall objectives of the Community Involvement Scheme (CIS) as originally set out in with the approved Delivery Agreement, including the CIS have been met. It is also considered that the LDP has been prepared in accordance with the LDP 'Preparation Requirements' set out in the Development Plans Manual (Edition 3).</p> <p>As part of Stage 4 of the Delivery Agreement, the Council was required to undertake Deposit public consultation for a statutory period of 6 weeks, however the Council made an allowance for 8 weeks in order to maximise public participation. This was to ensure a range of views could be considered as part of a process of building a wide consensus on the Replacement LDP's strategy and policies. A number of consultation methods were used to ensure efficient and effective consultation and participation, in accordance with the CIS. These methods included:</p> <ul style="list-style-type: none"> • A Legal Notice was placed within the Glamorgan Gazette on 3rd June 2021 • The package of consultation documents were made available online via Bridgend County Borough Council's Website. Respondents were able to complete an electronic survey online to make a formal representation. • Printed reference copies were placed within public facing Council buildings, including every library in the County Borough (fixed and mobile), subject to social distancing guidelines. The reference copies were also available to view at the Council's Civic Offices in Angel Street, Bridgend, by appointment only as the offices had not re-opened to the public due to the pandemic. Hard copies of the survey form were also been made available at these locations for members of the public to complete by hand. • Dissemination of hard copies of information to individuals. Members of the public were able request a copy of the survey by post to complete by hand (free of charge). There was a £25 charge for a hard copy of the whole Deposit Plan to cover printing and postage costs for such a large document. • Every individual and organisation on the LDP Consultation Database was notified by letter or email (depending on their preference) to inform them of the availability of the Deposit Consultation. Approximately 500 representors were contacted, provided with details of how to access the package of

			<p>consultation documents and how to respond. As the consultation progressed, additional representors were informed of and added to the database upon request.</p> <ul style="list-style-type: none"> • Planning Aid Wales were commissioned by the Council to run remote engagement events for all Town and Community Councils in Bridgend County Borough. • A comprehensive social media plan was devised. A series of social media posts were released periodically on Facebook, LinkedIn and Twitter. They drew attention to different thematic areas / parts of the County Borough throughout the consultation period. • Planning Officers have presented the consultation remotely to established working groups, including the Bridgend Community Cohesion and Equalities Forum and Youth Forum. • In place of face to face public drop in sessions, representors were able to book one to one telephone appointments with planning officers to discuss any queries/concerns they may have had. They were able to do this by emailing ldp@bridgend.gov.uk or telephoning 01656 643633. • Posters were sent to all Town and Community Councils to display on their notice boards. <p>The Plan has to be prepared in the context of national legislation and guidance and has to be informed by an evidence base comprising of background papers and other technical documents. The written statement has been written with the aim of being understandable and not too technical or jargonistic but its content must reflect the fact that it is a land use plan. The Plan has been accompanied by an easy read summary leaflet, and the opportunity for telephone calls on an appointment basis where Officers were on hand to help talk interested persons through the Plan, its policies and proposals and how to comment. All Local Development Plan documents were available in main libraries throughout the County Borough in addition to the Civic Offices via appointment. Guides on how to comment and register were available online. Additionally, the phone lines were manned between the hours of 9am-5pm weekdays to provide assistance. The Local Development Plan has to be written in a particular style to meet the guidance set out in the LDP regulations manual.</p>
770	<p>Although this sounds good on paper, housing always goes up before infrastructure is in place. Health services are already under considerable strain and there are more cars on the road than ever. I fully support an expansion of public transport and health services but fear it will forever be playing catch up as more people are encouraged to move into already crowded areas such as Porthcawl, which as a tourist attraction has the added burden of accommodating the needs of thousands of transient visitors.</p>	<p>Concern over provision of appropriate infrastructure</p>	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure. The timing of delivery of necessary infrastructure will be agreed and secured through the planning process.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the</p>

			Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.
776	Taking away the character of key seaside resort in no shape or form involves so called spatial strategy.	Concern over impact on character of Porthcawl	Comments noted.
676	Regenerate for the benefit of the existing population without increasing housing and population	Concern over impact on existing residents	<p>The Growth and Spatial Strategy of the Replacement LDP is one that seeks to balance the needs of the existing population of the Borough with the need to facilitate growth to accommodate the needs of future generations. Development will ultimately be directed towards environs conducive to sustainable placemaking that facilitate a balance of environmentally friendly, economically vibrant, and socially inclusive characteristics, aiming to benefit current inhabitants and future generations alike. Sustainable placemaking is therefore an overarching concept that underpins the Replacement LDP, specifically seeking to create places that:</p> <ul style="list-style-type: none"> • Meet the needs of all members of the community; • Promote balanced economic growth that provides access to employment opportunities; • Provide for active travel and integrated Green Infrastructure networks; • Provide appropriate infrastructure and services; • Provide a range of high quality private and affordable housing; and • Are resilient and adaptable to change and support the Councils vision to make Bridgend a decarbonised, digitally connected smart County Borough. <p>Correspondingly, and in order to achieve the Vision and Objectives of the LDP, the Council will follow a Regeneration and Sustainable Growth Strategy. This will provide the framework to help realise the regeneration priorities of the Council, whilst also apportioning sustainable growth towards existing settlements that demonstrate strong employment, service and transportation functions. This dual faceted approach seeks to broadly balance housing, economic development, connectivity, social needs and environmental protection and enhancement to allow the County Borough to prosper, whilst contributing to the success of the Cardiff Capital Region and Swansea Bay Region. This has directly informed and resulted in the formulation of Strategic Policy (SP) 1 below, which outlines how the LDP will make provision to deliver the Regeneration and Sustainable Growth Strategy between 2018- 2033.</p>
792	The development of our spatial strategy does not have to mean building on greenfield land and the strategy must as a priority seek to improve existing infrastructure.	Spatial Strategy should not include green field development and concerned over infrastructure delivery	<p>The distribution of growth is evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be</p>

			<p>facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p>
880	The strategy has fine words but the actual plan places nearly all of the major proposed housing development around greenfield sites to the west and south of Bridgend ignoring the valleys. Sustainable means a reduction in the use of greenfield sites. The plan shows the opposite.	Opposed to green field development	<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p>
901	All ready stated	No changes	Comments noted
954	Build more disabled housing in Bettws	More disabled housing in Bettws	<p>The LDP is one significant means of addressing the shortfall of affordable housing provision, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the Local Housing Market Assessment (LHMA, see Appendix 24) and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p>

			<p>With specific reference to the housing needs of residents with a disability, the LDP will ensure that all affordable will be constructed to Development Quality Requirement Standards in accordance with Welsh Government requirements. Where a bespoke need has been identified, and on appropriate sites, new development will be required to provide for more specialist affordable housing provision including accessible accommodation. However, it would not be appropriate for such provision to be required on every site as this will depend on the location of the site, the type of development, viability considerations and the level of housing need identified for that area.</p>
960	<p>Agree the Valleys area need regeneration and some development to enable a level of business growth/jobs and new - modern housing to attract young people to stay in the area, and also achieve affordable housing options. The case for Sustainable growth areas is not fully made and does not demonstrate sustainable development. Bridgend being particularly at risk of overdevelopment.</p>	<p>Support regeneration of Valleys, spatial strategy is not sustainable</p>	<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>With a sustainable boost to housing supply, the Growth Strategy would also provide a significant means for the Replacement LDP to help address affordability issues across the County Borough. New development would be planned for at a scale significant enough to secure a deliverable level of affordable housing as part of private residential schemes (refer to Plan-Wide Viability Assessment, 2020). This would enable the right types of affordable housing to be secured and made accessible to those in housing need, in accordance with the findings of the Local Housing Market Assessment (LHMA, See Appendix 24). This is especially noteworthy given that the LHMA identified need for 5,134 affordable housing units over the plan period. The Replacement Plan seeks to address affordability by delivering affordable housing to meet identified need, extending housing choice in the Valleys areas, and creating places with a balanced mix of housing that promote sustainable, active travel opportunities. All of these issues can be addressed through the LDP Growth Strategy, thereby maximising scope to deliver socially balanced, mixed tenure communities when balanced against deliverability, sustainability and the need to pursue an equilibrium between dwelling and employment provision.</p>
969	<p>Fine, but how will infrastructure requirements be addressed?</p>	<p>Concerns over infrastructure delivery</p>	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
594	<p>As an NHS worker who lives in the Bridgend borough I can say from experience that the</p>	<p>Concern over infrastructure</p>	<p>In terms of GP surgeries and medical facilities the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure</p>

	princess of Wales hospital is unable to take on more admissions through house building and numbers of people moving into the area, the local medical centres are already over capacity	delivery, particularly health facilities	the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment (see Appendix 13) , the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.
988	Please just don't go crazy with the houses like in Coity.	Concern regarding level of growth	Comments noted
1010	This is in conflict with SOBJ4. Our natural areas and historical landmarks should be protected	Spatial Strategy conflicts with SOBJ4	<p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>Similarly, Policy SP18 of the Deposit LDP affords protection to historical landmarks and ensures that the impact of any development proposal on the significance and heritage values of individual historic assets, their setting and their contribution to local distinctiveness and character must be fully considered through the preparation of a heritage impact assessment and statement at the earliest opportunity as part of the planning process. The most important historic assets often have statutory protection or are included in formal registers which identify them as being of special historic interest. A number of statutorily and non-statutorily recorded heritage assets are located within the County Borough as outlined in SP18. Bridgend County Borough Council strongly value these heritage assets, and any development proposals which affect them, or their settings, must take full account of the relevant but separate legislation and national best practice guidance.</p>
1023	The plans provided don't allay my fears for the future generation of Bridgend.	No changes	Comments noted.
1033	There seems to be a lot of expenditure on Welsh Language Schools, whilst Heronsbridge is bursting at the seams, with children having to wait until they are 5 years old to get a place, that is hardly early intervention, and designating a few classrooms in existing schools as 'units' is not acceptable or sufficient	No changes, concerned over provision of Additional Learning Needs facilities	<p>Comments noted.</p> <p>Whilst outside the scope of the Deposit LDP, the provision of additional learning needs facilities are currently subject to an options appraisal and feasibility study.</p>
1042	all fine as long as infrastructure expansion COMES FIRST. We can't support the homes we have now, we need more schools, surgeries, etc, to cope with the expansion already done before now!!!	Concern over infrastructure provision	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the</p>

			<p>County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure. The timing of delivery of necessary infrastructure will be agreed and secured through the planning process.</p>
104 5	The bias seems to be towards more housing with only a small allowance for leisure and commercial development.	Too much housing at expense of Leisure and Commercial development	<p>The replacement LDP recognises the importance of providing more opportunities and facilities to provide access to exercise and leisure. As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's play facilities across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate. Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough as an integral and significant part of development and wider infrastructure proposals.</p> <p>Policy SP5 requires all development proposals to consider improving and/or expanding corresponding active travel and public transport networks. This will not only prove fundamental in ensuring the increasing attractiveness of active travel as a credible alternative to the private car, thereby encouraging modal shifts away from unsustainable forms of transportation, but will also help to promote physical activity and reducing the impact of transport based emissions.</p> <p>Finally, the Retail policies of the Replacement LDP have been formulated in a way that will encourage a wider array of community and leisure uses, alongside areas of open space, in recognition of the changing role and function of town and commercial centres. Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in customer spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>
104 7	Schools surgeries hospitals will be unable to cope	Concern over infrastructure delivery	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p>

			<p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure. The timing of delivery of necessary infrastructure will be agreed and secured through the planning process.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p>
1067	I totally agree with the plans for more housing within the strategy and see no evidence that the above infrastructure issues have really been addressed.	Support housing growth, concern over infrastructure delivery	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure. The timing of delivery of necessary infrastructure will be agreed and secured through the planning process.</p>
1069	How will you assess which settlements and parts of the county borough will benefit the most etc. This suggests it would be areas of high population and that potentially excludes the Garw valley	Concern that growth will be directed to densely populated areas at expense of Garw Valley	<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are</p>

			<p>limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The Strategy recognises the need to deliver wider regenerative benefits to Valleys communities at a scale which acknowledges their infrastructure capacity, topography and geographical constraints. Therefore, Maesteg and the Llynfi Valley is allocated as a Regeneration Growth Area, reflecting the fact that it demonstrates the largest capacity to accommodate regeneration-led growth within the Valleys communities. There are individual sites within this area that already have the benefit of planning permission or are the subject of development briefs or master planning exercises to facilitate their delivery and regeneration. A substantial number of these sites are also brownfield or are under-utilised, whilst also being aligned to transport hubs, thereby demonstrating high credentials in terms of sustainable development and placemaking. However, it is acknowledged that some will require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to facilitate delivery.</p> <p>The Ogmore and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p>
1070	<p>I am concerned about "on previously developed (brownfield) sites in the first instance" This seems to give Bridgend council room to build on Green sites. I am in complete opposition to this. There has already been mass building and habitat loss in the Bridgend Area and there has been large areas of habitat loss. This is unsustainable and incompatible with the Future Generations Wellbeing Act. The houses that have been built in the last 5-10 years in Bridgend do not appear to have sustainable energy as a requisite.</p>	<p>Opposed to green field development</p>	<p>The distribution of growth is evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The Council has set ambitious renewable energy deployment targets to maximise the use of local resources available within the County Borough. In order to reduce future energy demand, strict policies have been introduced that seek to maximise the energy efficiency of new development, integrate energy generation into wider development proposals, and ensure that low carbon heating systems are installed</p>

113 5	Keep up the good work	No changes	Comments noted.
121 4	<p>Prioritise land for developments that will benefit residents and the environment. These will not be the most profitable but will be the most beneficial. DO NOT fill All open spaces with housing. It's totally inappropriate. Use existing housing - work with landlords/owners to improve and use existing housing as affordable housing for those who need it. New housing developments are out of price range for locals and end up as second homes/holiday homes for the rich. This does not solve the housing crisis, just makes lots of money for developers.</p>	<p>Brownfield land and use of existing properties to be prioritised</p>	<p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP. Likewise, it is beyond the scope of the LDP to control the occupants of social housing.</p> <p>With a sustainable boost to housing supply, the Growth Strategy of the Replacement LDP will provide a significant means of helping to address affordability issues across the County Borough. New development would be planned for at a scale significant enough to secure a deliverable level of affordable housing as part of private residential schemes. This would enable the right types of affordable housing to be secured and made accessible to those in housing need, in accordance with the findings of the LHMA. In addition, this Growth Option would provide significant scope to deliver necessary infrastructure and complement existing centres by linking new homes to jobs and services via sustainable, multi-modal forms of transport. This will prove key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region. This Growth Option is still therefore considered optimal to deliver against the full range of issues the replacement Plan is seeking to address and enable realisation of all four Strategic Objectives. It will enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, minimise out-commuting, support existing settlements and maximise viable affordable housing delivery.</p>
100 6	<p>The proposed plans do not take account of the huge recent investment by WG/NRW in the Llynfi Valley of the Spirit of Llynfi Woodland site. From what the group can see of the plans, the area is incorporated into plans for housing/other at both the Coegnant end and at the washery site. The woodland should be shown as major Green/tourism infrastructure for protection/expansion map 32/33 Com1 (r3), com 11(9).</p> <p>Additionally, national cycle route 885 and the disused railway line from Maesteg to Caerau should also be prominently featured but appear to be absent.</p>	<p>Proposals Map should show:</p> <ul style="list-style-type: none"> • Spirit of Llynfi Woodland site • Disused railway line from Maesteg to Caerau • NCN route 885 	<p>The Coegnant Reclamation (COM1(R1)) and Maesteg Washery sites (COM1(R3)) are both long standing regeneration sites. The area shown on the proposals map incorporates the full extent of these sites and does not differentiate the different parts of the site that could be used for different land uses. Their reallocation as such in the Replacement LDP recognises the fact that preparatory remediation-based enabling works will be necessary to address site constraints stemming from the industrial legacy of the area. More detailed strategic master planning of both sites is likely to be required before they can be delivered. This exercise will, by its nature, necessitate engagement with key stakeholders and local community groups to ensure an appropriate mix of land uses are assessed and form part of any future proposals. Existing uses of the site can be incorporated accordingly. This will ensure that the regeneration of these sites delivers the full range of placemaking principles outlined in Planning Policy Wales.</p> <p>Policy COM11(9) allocates the Former Maesteg Washery area for the provision of Natural and Semi-natural Greenspace. This allocation incorporates the range of activities promoted by the Spirit of Llynfi Woodland. The aim of the policy is to promote nature conservation, biodiversity and better air quality to enhance the quality of life of individuals and communities. Such spaces also have a role in climate protection and in enabling the adaptation of urban areas to the impacts of climate change, for example by contributing to flood management and helping to reduce the effects of urban heat islands. Natural and Semi-Natural Greenspace and Amenity Green Space are less formal in character than Outdoor Recreation Facilities and provide the opportunity for a mixture of activities to be enjoyed by all ages of the community. Such areas are important components of the wider green infrastructure network to protect and enhance biodiversity and ecological resilience, whilst improving well-being outcomes in accordance with DNP8. Policy COM11(9) is shown on the proposals map, so no further designation is considered necessary.</p> <p>Policy PLA10 – Safeguarding of Disused Railway Infrastructure, protects any disused rail line in the County Borough from development that would prevent them from being brought back into use for rail purposes or for use as an active travel route. A number of such routes have been implemented and the Council's Active Travel</p>

			<p>Network Map includes a number of proposals within disused railway line corridors. It is not felt necessary to indicate all such corridors on the proposals map.</p> <p>The Replacement LDP seeks to promote connectivity for all by maximising opportunities for active travel routes, including those contained within Existing Route Maps and future proposals detailed within the Active Travel Network Maps (See Appendix 29 and BCBC website). Well-connected developments will assist in promoting the improvement of health and wellbeing by encouraging people to adopt healthier and active lifestyles, whilst also contributing to the creation of a successful place. The routes and proposals shown on the Active Travel Integrated Network Maps are indicative alignments that may be subject to change as routes are further developed. The development and delivery of the proposals shown on the INM will be dependent upon the availability of funding. It is not felt necessary to indicate all existing cycle routes the proposals map.</p>
1287	<p>I / We hereby object to any further development along the Llynfi Valley and surrounding area and ask for BCBC to consider the potential direct and indirect impact these developments would have on the Tondu and AberKenfig area, which form part of the Valleys Gateway and believe more local consultation is required on these issues.</p> <p>I/We believe any proposed significant residential developments in Maesteg and LLangynwyd would have a significant effect on an area which BCBC has within the LDP already acknowledged, has major capacity issues when looking at the access to the M4 corridor at J36.</p> <p>The LDP states - 'Unspecified improvements to the A4063 between Tondu and Maesteg' - this suggests that BCBC recognises this road is at capacity but has no idea how to resolve it. The extra volume of HGV traffic from WEPA when their expansion is complete, along with further developments along the route, will punish the homeowners in both Tondu and Coytrahen with excessive noise and air pollution.</p> <p>Whilst pleased to see that the LDP acknowledged that there are capacity issues which would constrain further significant residential development, we are concerned the LDP lacks insufficient plans for affordable housing and that the targets set are far too low and that the suggestion that S106 will deliver social and affordable housing is unrealistic.</p>	<p>Objects to development in Llynfi Valley</p> <p>Concerns over: capacity of A4063, affordable housing targets are too low, provision of GP facilities, noise and air pollution, green spaces, allocation of land East of Pyle/level of growth and empty office space in town centres.</p>	<p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>With specific reference to Maesteg, Policy PLA8(10) acknowledges that there are significant constraints along the A4063 between Sarn and Maesteg which generate capacity and safety concerns. Appropriate improvements to address these concerns will continue to be pursued and secured through the use of Highway and Planning Agreements where they relate to the impact of new development. Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Policy PLA8(3) identifies a need to improve the capacity of the Maesteg to Bridgend railway line to encourage more trips to be made by public transport. Background Paper 13 – Rail Commuter Trips and Infrastructure (See Appendix 53) highlights that Transport for Wales have already introduced refurbished trains on this route, greatly increasing passenger capacity. TfW have further plans to introduce brand new trains in December 2022, with particular emphasis on allowing more room for bikes and pushchairs. In addition, feasibility work is already well progressed to explore the potential of increasing service frequency on the line.</p> <p>In terms of affordable housing supply, the Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). The LHMA has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through the setting of viable targets, thresholds and proportions.</p> <p>A Plan-Wide Viability Assessment (2021) (See Appendix 32) was prepared to determine the extent to which the LDP can contribute to the need identified in the LHMA over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of affordable housing, along with other key infrastructure requirements. The findings of the viability assessment are reflected in the affordable housing targets contained in Policy COM3. This process follows guidance set out in</p>

<p>I/We feel a lack of consideration has been given to the provision of medical facilities. At present there is already a 2 -3 week waiting period for a call back from most local surgeries. The electorate will not accept that this is dismissed as out of BCBC authority. We want to see and take confidence that these concerns are being address or are BCBC prepared for the backlash when surgeries reach capacity?</p> <p>More housing means an increase in noise and air pollution, the LDP shows a lack of attention to the impact these developments will have! This leads us to question how this LDP fits with BCBC's promotion of improving the environment and people's health and well-being?</p> <p>I/We consider policies over green spaces and play areas should be strengthened to ensure more of them and better access to walk/cycle routes and more investment in public transport!</p> <p>We must raise concerns about the significant residential development planned near PYLE (estimated 2000+ new homes) and whether they are needed. The growth strategy in the Deposit Consultation document states that with an expected population growth of 500, 505 new homes are required. However, we consider this statement is not evidence based and simply speculative.</p> <p>Sites for housing should be revised in light of the pandemic as the likelihood is that fewer people will be regularly commuting to the town centre offices post pandemic. This will lead to more empty office space and the LDP should focus on converting this to housing and arts/cultural/hospitality to create a vibrant town centre.</p> <p>Targets for affordable housing are far too low – all the evidence suggests relying on S106 is not delivering affordable or social housing.</p>		<p>the Welsh Government's Development Plans Manual and should ensure that the provision of affordable housing is viable in the majority of cases.</p> <p>The LDP and Section 106 Agreements are one significant means of addressing the shortfall between affordable housing need and provision, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p> <p>In terms of the provision of GP surgeries and medical facilities, the Council has engaged with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During the Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>The Replacement LDP has been prepared in line with the Well-Being of Future Generations Act of which places a duty on public bodies to carry out sustainable development. The LDP Vision has been developed to take into account the 7 Well-being Goals and Bridgend's Local Well-being Plan with the specific characteristics and key issues affecting the County Borough. Background Paper 10 (See Appendix 50) demonstrates that the Replacement LDP assists in the delivery of the 7 Well-being Goals.</p> <p>The Replacement LDP has also been prepared in line with Bridgend Public Service Board Well-being Plan objectives. The Bridgend Well-being Plan outlines the things that Bridgend Public Service Board will work together on over the next five years; our wellbeing objectives and steps, and how we want Bridgend to look in 10 years' time. Background Paper 9 (See Appendix 49), demonstrates that the Replacement LDP assists in the delivery of the local well-being plan.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p>
---	--	--

			<p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and a new Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>The Deposit LDP is based on a balanced and sustainable level of economic growth that will facilitate the continued transformation of the County Borough into a network of safe, healthy and inclusive communities that connect more widely with the Cardiff Capital Region and Swansea Bay Region. The proposed growth level of 505 dwellings per annum is derived from a POPGROUP Scenario that Uses an ONS 2019 Mid-Year Estimate base year and calibrates its migration assumptions from a 6-year historical period (2013/14–2018/19). This period witnessed sustainable population growth, in part linked to the number of dwelling completions across the County Borough, which the Replacement LDP seeks to continue.</p> <p>This Growth Strategy is deemed the most appropriate, sustainable means to deliver the LDP Vision and Objectives as justified within the Strategic Growth Options Background Paper (see Appendix 42). All reasonable alternatives have also been duly assessed under the SA process.</p> <p>The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.</p> <p>Strategic Policy SP12 of the Deposit LDP promotes Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council has prepared a Retail Study (See Appendix 16) which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space. Whilst the full impact of the pandemic are not yet known, the repurposing of empty office space for an alternative use that adds vibrancy to a town centre will be encouraged subject to it meeting policy criteria.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The retail hierarchy (Policy SP12) will be used positively to ensure Town, District</p>
--	--	--	--

			<p>and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>The LDP and Section 106 Agreements are one significant means of addressing the shortfall between affordable housing need and provision, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p>
546	<p>Before any further developments are planned in the Broadlands, Laleston, Cefn Glas area careful consideration needs to be given to the level of pollution on Park Road, Bryntirion Hill etc. Furthermore, infrastructure needs to be considered as the current access / exit points to the Broadlands site are insufficient and further developments in this area will have significant impact on congestion in that area.</p>	<p>Concerns relating infrastructure and levels of pollution within strategic allocation sites.</p>	<p>The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
553	<p>There is absolutely no need to destroy this piece of land (Bryntirion and Laleston) other than money. Not money for the area and its residents, but for the developers. If it happens - and I pray it doesn't - it will be yet another area filled with people who have to</p>	<p>Objection to PLA3 based on loss of green space and lack of jobs.</p>	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate</p>

	<p>commute to get to work. Do not pretend for even a second that jobs can be found for 850 units of people here.</p>		<p>response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). Green Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p>
557	<p>There is no meaningful infrastructure detailed The continued building of housing in the Bridgend is shocking, and the roads are struggling to cope. I have a 2.8 mile commute to work and this will often take me 20mins when I moved to Bridgend several years ago this same commute would take less than 10 mins. Yet more housing is planned which will put even more strain on the roads. I cannot see the sustainability. I understand as time moves on things have</p>	<p>Comments relating to a lack of infrastructure and sustainability.</p>	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p>

	<p>to change and change is good. However I feel that problems are trying to be solved that either don't actually exist or being solved in a way which is just going to create more problems.</p>		<p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>With regards to traffic and congestion, the Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
558	<p>This should not be done you are taking to much green space away</p>	<p>Concerns relating to lack of green space.</p>	<p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p>

			<p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
559	<p>better transport links are required if maesteg is being redeveloped as well as the llynfi valley. Bridgend already has new housing being built, so i need for new development not being required, as usually being built on green land.</p>	<p>Comments relating to transport and greenfield land.</p>	<p>The Strategy recognises the need to deliver wider regenerative benefits to Valleys communities at a scale which acknowledges their infrastructure capacity, topography and geographical constraints. Therefore, Maesteg and the Llynfi Valley is allocated as a Regeneration Growth Area, reflecting the fact that it demonstrates the largest capacity to accommodate regeneration-led growth within the Valleys communities. There are individual sites within this area that already have the benefit of planning permission or are the subject of development briefs or master planning exercises to facilitate their delivery and regeneration. A substantial number of these sites are also brownfield or are under-utilised, whilst also being aligned to transport hubs, thereby demonstrating high credentials in terms of sustainable development and placemaking. However, it is acknowledged that some will require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to facilitate delivery.</p> <p>The Ogmore and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could</p>

			<p>not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
561	<p>Sustainable growth areas defined as Bridgend encompassed neighbouring villages such as Cefn Glas, Bryntirion, Broadlands - all areas that have had significant housing development in recent years. As a result, schools in these areas are short of space. These areas have lost much green space to these actions and loss to biodiversity in the area. These green spaces are valuable to communities of all ages, noted especially during lockdown and home working practices during the pandemic. As well as obvious exercise benefits to local residents, they contribute to air quality and counter balancing pollution in high traffic areas such as the town centre. Most recently, a housing development in</p>	<p>Concerns relating to loss of green space, traffic, infrastructure and education</p>	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the</p>

<p>Cefn Glas received opposition by residents due to additional traffic on main routes and loss of local green space. Given that these areas close to Bridgend town centre are marked on the strategic diagram as 'sustainable growth areas', it is a concern that further development will impact these remaining green spaces. They are not designated as special landscape areas or of historic value, but valued by residents in the area and contribute to standard of living. Developing brownfield sites is more appealing, instead of further green space loss - but with planning for developing additional health, education and social facilities. Considerations must be made about the increased pressure on services by adding additional residents into an already underserved area. The recent proposal to close post-16 provision at the local comprehensive school was outlined as a necessity to manage increased admissions to the school. The increase in students directly correlates to the housing development; more families moving to the area with school aged children. Communities grow when they are deemed as a suitable place to 'settle' and raise families. For the students themselves, the stability of knowing their advancement through education at post-16 levels locally adds to their potential. Although this was opposed, the threat to the schools that supply post-16 education and lead to the more skilled workforce that BCBC wants living in the area, show that the proposals aren't considering the impact of their decision making on a longer term basis.</p>		<p>periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan. As such, candidate site 308.C1 Bridgend (West of) was considered appropriate for allocation.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA3 – Page 71). The provision of new residential dwellings, including affordable units, will be incorporated alongside a new one and a half form entry Primary School, recreation facilities, public open space, plus appropriate community facilities all set within distinct character areas.</p> <p>Policy PLA3 will ensure development positively integrate the remains of Llangewydd Church and Churchyard Scheduled Ancient Monument in a manner that preserves and enhances the remains as part of the wider site. Development must also incorporate the Laleston Trail within the central part of the site, providing access to the Bridgend Circular Walk and realigned Public Right of Way. Furthermore, the enclosed byway with the existing hedgerow corridor will be retained as the Y Berth cross link. In terms of active travel, Policy PLA3 requires on-site and off-site measures to provide good quality, attractive, legible, safe and accessible pedestrian and cycle linkages in accordance with Active Travel design. Improved linkages must be provided along the A473, with Bryntirion Comprehensive School and Bridgend Town Centre (including the bus station and train station). New connections will be provided to accord with the proposed routes within the Council's ATNM: INM-BR-52, INM-BR-55, INM-BR-57, INM-BR-58, INM-BR-127 and 2120.</p> <p>The Replacement LDP is accompanied by a SA Report (incorporating SEA) to assess the likely sustainability and significant environmental effects of all substantive component within the Plan (strategy, policies, site allocations, etc.) and any identified reasonable alternatives. This builds directly upon previous SA reporting including an SA Scoping Report (2018) and an Interim SA Scoping Report (2019) which accompanied the Replacement LDP Preferred Strategy. The Deposit Plan SA Report demonstrates how the SA, incorporating</p>
---	--	---

		<p>SEA, process has informed the development of the Deposit Plan, including the incorporation of recommended changes within the document. As a result, the SA Report concludes that there is good coverage of all key sustainability issues in Deposit Plan, with plan components performing well against the SA Framework. It also identifies strong compatibility between the LDP Vision/Objectives and the SA Framework, plus no likely significant adverse effects (taking account of mitigation in all its forms).</p> <p>In accordance with statutory requirements, Planning Policy Wales sets out multiple requirements for development to avoid direct adverse effects on nationally important heritage assets and for the need for any development resulting in adverse effects on the historic environment to be robustly justified. There is also a general presumption in favour of the preservation or enhancement of listed buildings and their settings, along with a requirement for development not to result in direct adverse effects on Scheduled Monuments, unless there are exceptional circumstances. These issues are grouped under 'Cultural Heritage', which is one of the 14 Sustainability Objectives considered by the SA. The potential for adverse impacts on Cultural Heritage was and is an important consideration in determining the overall sustainability and thus suitability of candidate site allocations. Any sustainability impacts would also depend on the scale of development proposed.</p> <p>All Stage 2 Candidate Site Sites were considered to ascertain whether they had the potential to cause an adverse impact upon the historic environment. To facilitate this assessment, the Council consulted with the Glamorgan-Gwent Archaeological Trust (GGAT) early on in the process for their views on the likely range of impacts on the historic environment along with recommendations for mitigation. Any identified impacts were required to be mitigated by site promoters.</p> <p>For Land West of Bridgend the SA identified the potential for adverse impacts due to the proximity of the site to scheduled monuments and important archaeological sites. However, the requirements under SP2 (for each strategic site allocation to be supported by a detailed masterplan) and PLA3 (for the proposed strategic site allocation to implement specific masterplan development principles) represent forms of mitigation to help address the identified likely significant effects. These requirements also enhance the sustainability performance of the strategic site allocation more generally. The SA identifies relevant masterplan development principles included in these spatial development policies to help ensure the avoidance of likely significant adverse effects which could otherwise occur from this development proposal. Additional masterplan development principles are also included within Policy PLA3 to ensure site applies Good Design principles and a Sustainable Placemaking approach to siting, design, construction and operation in accordance with Planning Policy Wales. These principles were informed by SA findings and have been incorporated into the final Deposit Plan, with SA site assessment scoring updated to reflect their inclusion in the Deposit Plan.</p> <p>Further to this, the site promoter commissioned EDP to undertake an Archaeological and Heritage Assessment. The assessment establishes that the site does not contain any World Heritage Sites, Scheduled Ancient Monuments, listed buildings, registered historic parks and gardens or historic landscapes, where there would be a presumption in favour of their physical preservation in-situ and against development. In terms of archaeological remains, the site is identified as having moderate to high potential to contain remains from the medieval period, particularly in its northern extremity, which is adjacent to the site of the former Llangewydd Church. However, the land is a SINC and will not be developed. Policy PLA3 will require development to positively integrate with the remains of Llangewydd Church and Churchyard Scheduled Ancient Monument in a manner that preserves and enhances the remains as part of the wider site.</p> <p>While there is a small amount of evidence for late prehistoric and Roman activity in the surrounding 1km study area, the potential for archaeology of these periods within the site is deemed low. Post-medieval settlement was focused elsewhere in the locality and any archaeology of this period within the site is most likely to relate to agriculture. Overall, the baseline data indicate that the probability of significant archaeology</p>
--	--	--

			<p>being present is low. Any further archaeological investigation can reasonably be secured through an appropriately worded planning condition appended to a planning permission.</p> <p>Potential impacts upon the setting of historic assets in the locality have focused on the 1km study area. No significant effects arising from changes to setting have been identified for scheduled monuments, listed buildings and registered parks and gardens. In respect of the Laleston Conservation Area, there will also not be any significant changes to its visual setting. It is acknowledged that development in the southern part of the Site will remove a part of the agricultural landscape around Laleston which forms a buffer from Bryntirion to the east. However, agricultural land will remain on all sides around Laleston, which will retain its character as a discrete settlement, while landscaping measures associated with the development will mitigate any impression of coalescence. This is assessed as an impact of a minor order, with the special interest of the conservation area being retained. Policy PLA3 will require development to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The site promoter also commissioned EDP to undertake a Landscape and Visual Appraisal (LVA). The purpose of the appraisal was firstly to inform the design evolution of the scheme which enabled an integrated approach to potential landscape and visual opportunities and constraints.</p> <p>The LVA outlines that there are adverse and beneficial landscape effects resulting from development of this site. However, the embedded mitigation and the approach to design is considered to minimise adverse effects over time as the proposed landscape establishes and overall the predicted effects are not considered unacceptable from a landscape and visual perspective in the context of the delivery of a strategic housing site.</p> <p>The appraisal included a review of national and local policy, landscape character and visual amenity. The appraisal included assessment of the National Landscape Character Assessment (NLCA), LANDMAP, and Landscape Character Assessment for Bridgend County Borough (LCABC) (2013) in addition to an on-site assessment. The appraisal confirms that the site relates well both in landscape and visual terms to the existing landscape and settlement, and that the site represents a logical extension to Bryntirion provided a considered design is sensitive to the site's existing characteristics. The design appraised responds sensitively to assets on site such as the Bridgend Circular Walk, the byway, the hedgerow network and vegetated site boundaries. As such the proposals put forward at this stage are considered to be a thoughtful and easily assimilated future development of this site.</p> <p>Mitigation measures include:</p> <ul style="list-style-type: none">• The Laleston Meadows SINC would be brought into regular long-term management. This would protect the visual amenity and landscape character of this northern part of the site. A landscape buffer would set development back from the SINC, and dwellings would front onto it. The SINC could be used as a mitigation receptor site (in ecological terms) and the grazed fields currently within the SINC could be improved by the proposals as well as maintained in the long term. The SINC offers a great opportunity for informal and natural play on site provided increased public access would not clash with its ecological function;• The site contains very few of the key characteristics listed in the published documents on Laleston SLA. The site has a strong network of hedgerows, some which would be lost and the field pattern replaced by urban form. However, the retained hedgerows and trees would be protected by landscape buffers and some of the character of the SLA within which the site lies would be retained;• Provision of structural landscaping, a mix of native and non-native trees and shrubs proposed throughout the site for biosecurity, diversity of ecosystems and habitat creation as well as the visual amenity of future residents. Areas of open space would be bolstered by considered structural planting to create an
--	--	--	---

			<p>aesthetically pleasing urban development which is well integrated with the proposed landscape strategy and the settled landscape character currently experienced in the local area;</p> <ul style="list-style-type: none"> • Retention of existing landscape features (hedgerows and trees) is a priority of the emerging proposals as it forms a desirable strong green framework that links with the wider green infrastructure to the north, west and south of the site; • Adequate replacement planting of local species in appropriate locations to compensate for any loss of trees and hedgerows, and enhancement planting; and • The location of public open space, public footpaths and the street-alignment has been designed to protect and reflect local character. <p>Through consideration of the findings above, it is anticipated that any notable landscape and visual effects resulting from the addition of the proposed scheme would be localised in extent and contained within a c.400m radius of the site, despite the site's relatively open character.</p> <p>Overall is it considered that the masterplan framework proposed for the site has been sensitively designed through a landscape and ecology-led approach, with appropriate incorporation of mitigation measures in order to address concerns of the site in relation to landscape and visual matters. As such, the promotion of this site for residential development should be considered an acceptable extension to the existing settlement of Bryntirion which would not cause significant or wide-ranging adverse effects upon its surrounding landscape context.</p> <p>Policy PLA3 will ensure that the design and layout of the site has regard to the landscape in which it sits, considering the interface between the site, Bridgend and Laleston. Visual impacts must be minimised through the inclusion of mitigation measures and provide links with the existing landscape and access features to safeguard landscape character whilst creating a sense of place. The development must also not be to the detriment of the Special Landscape Area and any development proposal must incorporate measures to reduce adverse effects and/or visual intrusion on the wider landscape.</p> <p>In terms of biodiversity/ecology, an ecological desk study and Extended Phase 1 survey has been undertaken by EDP. The desk study has noted that within the Study Site's zone of influence there are a number of statutorily and non-statutory designated sites present, most notably Laleston Meadows SINC which overlaps with the site itself.</p> <p>Given the combination of designated sites, it is concluded that any future planning submission will need to consider the potential for direct and indirect impacts to arise upon qualifying features, including the Laleston Meadows SINC. However, it is inherent within the emerging masterplan that the Laleston Meadows SINC and its associated designated features will be retained. Furthermore, such retained features will be further protected from potential harm, damage and disturbance through the sensitive design of built development away from SINC boundaries and inclusion of suitable buffers.</p> <p>The desk study confirms that the inclusion of Laleston Meadows SINC within the Study's Site boundary will provide substantial potential for a balanced provision of areas of informal public open space and wildlife zones. When linked with proposed POS and play areas across the developable site this will provide a significant benefit to both visual and recreational amenity, conservation and biodiversity enhancement. In respect of the latter, the SINC provides a potential space to accommodate ecological mitigation and biodiversity enhancements and thus offset ecological impacts that may arise during the development of adjacent land.</p> <p>An Extended Phase 1 survey was undertaken in February 2020, supplemented by further roosting bat works in March 2020. The Phase 1 survey concluded that the site is dominated by agriculturally improved grassland of limited botanical interest and thus of low inherent ecological value. Habitats of greatest ecological importance include the native hedgerows delineating the northern boundary and internal field boundaries in addition to</p>
--	--	--	--

			<p>woodland habitat and marshy grassland associated with Laleston Meadows SINC. The roosting bats surveys identified several trees with low to high potential to support a bat roost whilst onsite ponds have been considered for their potential to support great crested newt.</p> <p>The results of the desk study and Extended Phase 1 survey have influenced the masterplan which has sought to locate development across those habitats of predominantly limited ecological value whilst retaining boundary habitats as far as possible. Where retained, such features have been accommodated within proposed informal green space and sustainable transport links, which ultimately enhances connectivity throughout the Site and contributes to the wider green infrastructure resource.</p> <p>Where avoidance is not possible, however, and will result in the loss of internal field boundaries (albeit predominantly species-poor or defunct), the site is considered to be of sufficient size and extent to enable future development proposals to flexibly avoid and/or mitigate for any significant ecological constraints and compensate where necessary. This will be in addition to the sensitive positioning of built development away from retained boundary features to minimise damage.</p> <p>The report also highlights further detailed habitat and species surveys which are recommended to inform a planning application and ensure proposed mitigation is appropriate and proportional. These include a Dormouse survey, which was raised in comments received from NRW. Policy PLA3 will require the development to retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland) and Laleston Meadows SINC, which includes the green space bordering the northern and north-western boundaries of the site. PLA3 will also require the developer to submit and agree ecological management plans including proposals for mitigation, enhancement and maintenance for retained habitats and protected species (including for bats and dormouse) and provide appropriate compensatory and replacement habitat.</p> <p>Policy PLA3 will require development to incorporate the Laleston Trail within the central part of the site, providing access to the Bridgend Circular Walk and realigned Public Right of Way. Additionally, PLA3 requires 4.1 hectares of retained green infrastructure and new areas of public open space across the site comprising seven key areas of formal open space (including 0.5ha of equipped play provision), informal spaces and linkages, green streets, and explore the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>With regards to education and comprehensive school provision, a contribution will be taken in accordance with the Education Facilities and Residential Development SPG and a decision will be made by the Local Education Authority as to how the sum will be utilised.</p> <p>In terms of sewerage, Dwr Cymru Welsh Water have confirmed that reinforcement works are required on both the clean and foul network to accommodate the site as a whole and a Hydraulic Modelling Assessment will be required to inform such works. They have also confirmed that there are no insurmountable obstacles to the delivery of the site.</p> <p>With respect of drainage, the site promoter has prepared a high-level drainage strategic of which confirms that the site is located with DAM Zone A, which is used within Technical Advice Note 15 to indicate that there is</p>
--	--	--	--

		<p>considered to be little to no risk of fluvial or tidal flooding at such a location. This reflected in comments received from NRW, and in the Strategic Flood Consequence Assessment (SCFA which informs the LDP and flags the site as green in its RAG assessment. As such, all proposed land uses are permitted without need for a flood consequence assessment. The SFCA does highlight that a small proportion of the site (4.9%) has a low risk of flooding due to surface water, which corresponds with topographic depressions running from north to south. There are two areas most at risk of surface water flooding. The first corresponds with a path of surface water flowing down into the north western corner of the site. This area of the site is currently comprised of woodland which is to be retained as part of the proposals. It is therefore considered that this area of surface water flood risk will have little influence on development proposals. The second area is a key surface water flow route that runs through the centre of the site towards the A473 where a small area of high surface water flood risk is shown. The surface water flow routes in this part of the site will be retained where possible and incorporated within the surface water drainage strategy through the use of SUDs and green corridors.</p> <p>A revised TAN15 is due to be implemented in June 2023. This will be supported by the new Flood Map for Planning, which includes climate change information to show how this will affect flood risk extents over the next century. It shows the potential extent of flooding assuming no defences are in place. A review of the new Flood Map for Planning shows the site to be located outside of any flood zone and is therefore considered at low or no risk of flooding.</p> <p>In terms of the impacts on primary healthcare provision, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p> <p>The site promoter commissioned Air Quality Consultants to undertake an Air Quality Assessment to assess the impact of the proposed development and subsequent increased traffic emissions arising from the additional traffic on the Air Quality Management Area (AQMA) of Park Street. Concentrations have been modelled for a number of worst-case receptors, representing existing properties where impacts are expected to be greatest. In addition, the impacts of traffic emissions from local roads on the air quality for future residents on the proposed development have been assessed.</p> <p>The assessment has demonstrated that concentrations of PM10 and PM2.5 will remain below the objectives at all existing receptors in 2022, with or without the proposed development, and that all impacts for these pollutants will be negligible.</p> <p>In the case of annual mean nitrogen dioxide, concentrations will remain below the objective at all but one existing receptor (representative of 6-8 homes) in 2022, with or without the proposed development. However, it is now considered unlikely that any new homes within the development will be occupied before 2024, by which time it would be reasonable to expect concentrations at these 8 homes to be below the objective. The assessment has demonstrated that the impacts in terms of annual mean nitrogen dioxide concentrations of the full development traffic being on the roads in 2022 will be negligible everywhere other than at this one receptor, where the impact under this scenario would be moderate adverse. However, bearing in mind that no new homes will be occupied before 2024, and the development is unlikely to be complete and thus generating its full traffic volumes until the 2030s, this scenario is unrealistically worst-case. Applying professional judgement, it is considered most likely</p>
--	--	---

		<p>that the actual impact of the development at these 8 homes will also be negligible in all years from the first occupation in 2024.</p> <p>The effects of local traffic on the air quality for future residents living in the proposed development have been shown to be acceptable at the worst-case locations assessed, with concentrations being well below the air quality objectives. As such, the overall operational air quality effects of the development are judged to be 'not significant'. The proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site's net developable area. The Transport Assessment reflects the number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA3 prescribes the appropriate development requirements in relation to all forms of travel. For the avoidance of any doubt, this number of dwellings does not require the original proposed site boundary to be expanded, rather more efficient use of the existing net developable area. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA3 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p>
--	--	---

			<p>Proposed Policy PLA3 prescribes a number of placemaking principles for Land West of Bridgend, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages along the A473, with Bryntirion Comprehensive School and Bridgend Town Centre (including the bus station and train station). New connections will be provided to accord with the proposed routes within the Council's ATNM: INM-BR-52, INM-BR-55, INM-BR-57, INM-BR-58, INM-BR-127 and 2120.</p> <p>Policy PLA3 will require on-site highway improvements to ensure the principal point of vehicular access is achieved from a new signalised junction with the A473 at the southern boundary; the junction will accommodate a new-shared use crossing to connect the internal cycleway/footway with the existing active route BRC9b on the southern side of the A473.</p> <p>The site promoter's Transport Assessment confirms that the traffic effect of 850 dwellings is forecast to be in the order of 269 and 243 two-way movements in the AM and PM peak hours respectively, although this is considered worst case as attitudinal change towards travel progresses. This quantum of trips equates to just over 4 vehicles per minute two-way, diluted across the local highway network. The assessment concludes that the development provides opportunities to create a new western edge to Bridgend in a self-sustaining site offering community facilities suitable for day to-day living. In this way, the transport case for mobility provides the options necessary to promote sustainable travel modes before the private vehicle. The design of the environment, the travel planning and the locational advantages, together with the Mobility Strategy means there is a major benefit for existing and new residents, significantly improving travel choice, for commuting, leisure and social journeys and hence social inclusion. Working from home and from a third-place such as a non-site Workhub will be encouraged from the outset, in line with Welsh Government's aspirations.</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>

575	No		Comments noted.
578	As long as the provision of space and community facilities is adhered to, this will form an integral part of infrastructure improvements and will certainly develop the county borough.	Comments relating to the provision of community facilities as part of strategic allocations	Support noted.
580	if the council is looking for sites for redevelopment ,why can't the council consider build more house adjacent to the new village that's been built between Pyle and margin,this area excellent access to the m4 both west bound and east bound	Comments relating to alternative sites for housing allocations	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a

			<p>balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision. As detailed within the Spatial Options Background Paper, the Spatial Strategy seeks to continue to provide a land use framework that helps realise the regeneration aspirations and priorities of the Council, whilst balancing the need to deliver future housing requirements up to 2033. Regeneration Growth Areas appear before Sustainable Growth Areas within SP1 to clearly highlight a necessary degree of continuity with the first adopted LDP. The undeveloped brownfield regeneration allocations identified in the existing LDP are proposed to be retained and supplemented with sustainable urban growth in settlements that demonstrate strong employment, service and transportation functions. This approach is essential to implement the long term regeneration strategy embodied within the Replacement LDP Vision.</p> <p>Additionally, as documented within the SA Report and Spatial Strategy Options Background Paper, the majority of existing, viable, brownfield regeneration sites have recently been delivered under the existing LDP or are committed and expected to come forward within the next few years. However, remaining viable opportunities on previously developed land are exhausted, therefore some greenfield sites are required in a sustainable manner through complementary allocations on the edge of existing settlements. Identification of appropriate Sustainable Urban Extensions has been undertaken in accordance with the Site Search Sequence and other requirements set out in Planning Policy Wales, as documented in supporting evidence to the Plan. This includes the Candidate Site Assessment, Spatial Strategy Options Background Paper, Housing Trajectory Background Paper and Minimising the Loss of BMV Agricultural Land Background Paper. The rationale for the proposed allocations within the Deposit Plan is clearly outlined in the Candidate Site Assessment. Without exception, all proposed sites are supported by a large body of technical and viability evidence to demonstrate their deliverability.</p>

616	Regeneration? Local councils say they are under funded now with many public services suffering, just look at the state of our roads alone. All this money is coming from where??	Concerns relating to funding for development within the borough	<p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of the deliverability of such infrastructure and other requirements, high-level viability testing has been carried out (see Appendix 32: Plan-Wide Viability Assessment (2021)), to give certainty that the Replacement LDP and its policies can be delivered in principle, taking into account affordable housing targets, infrastructure and other policy requirements. This high-level viability appraisal is further bolstered by site-specific appraisals for those sites key to delivering the Replacement LDP (i.e. strategic sites). The Council has maintained continuous dialogue with respective site promoters to demonstrate that these sites can be delivered through analysis of more specific costs, constraints and site requirements (site-specific strategic policies (PLA-5)). This dual-faceted approach is paramount to ensure Council's aspirations for delivering high-quality new communities are both realistic and deliverable.</p>
653	Housing development in areas where schools are already full to capacity, and taking away green areas, lack of doctors surgeries to meet the growing needs, poor	Concerns relating to green space, infrastructure and	Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements including a series of masterplan development principles and development requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas, all of which seek to

	<p>road conditions, up keep of green areas, children's facilities, poor lighting, pollution should all be considered first. The proposed building of 850 houses between Laleston and Bryntirion is something I appose</p>	<p>GP appointments.</p>	<p>contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process.</p> <p>Such development must accord with a list of principles and requirements, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. The Council will require the preparation of a masterplan of which will need to be agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will be facilitated through the provision of affordable housing, on-site education provision, public open space, appropriate design, layout and densities in addition to active travel provision.</p> <p>As part of the proposed allocation of Land West of Bridgend, any development will be required (See Deposit Policy PLA3 – Page 71) to provide 2.3 hectares of land to accommodate a 1.5 form entry primary school with co-located nursery facility and a financial contribution to nursery, primary, secondary and post-16 education provision as required by the Local Education Authority. Development of this scale is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of GP surgeries the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
668	the schools are at full capacity at the moment .	Concerns relating to school capacity within the borough.	<p>As part of the proposed allocation of Land West of Bridgend, any development will be required (See Deposit Policy PLA3 – Page 71) to provide 2.3 hectares of land to accommodate a 1.5 form entry primary school with co-located nursery facility and a financial contribution to nursery, primary, secondary and post-16 education provision as required by the Local Education Authority. Development of this scale is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p>
446	Bridgend cannot be allowed to expand at the cost of surrounding villages being swallowed up into its boundaries and consequently those villages losing their identities.	Concerns relating to over-development and the loss of identity within local communities.	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p>

			<p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). The proposed allocation will be required to provide 4.1 hectares of retained green infrastructure and new areas of public open space as well as exploring the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p>
689	<p>It is suggested that PLA3 is an underutilised site. This is wholly inaccurate. Observation would inform you that this area is well utilised by local dog walkers, runners and families taking exercise in their beautiful surroundings. Loss of this facility is an irreparable error of judgement.</p>	<p>Concerns regarding PLA3 in particular the loss of green space</p>	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables</p>

			<p>sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). Green Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough’s environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
--	--	--	--

			Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.
719	I object to any housing in Laleston.	General objection to PLA3	Comments noted. Considered non-material without rationale.
796	Housing - and affordable housing should be the priority - should use brownfield sites only wherever possible, particularly for sustainable growth areas. Any new developments, particularly housing, must have the necessary infrastructure to support them before they are approved.	Comments relating to use of brownfield sites and associated infrastructure.	<p>Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements including a series of masterplan development principles and development requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process.</p> <p>Such development must accord with a list of principles and requirements, which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. The Council will require the preparation of a masterplan of which will need to be agreed with the Council prior to the sites development to demonstrate how these principles will be delivered in an appropriately phased manner. This will be facilitated through the provision of affordable housing, on-site education provision, public open space, appropriate design, layout and densities in addition to active travel provision.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of affordable housing, the Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>While additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p> <p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of</p>

			<p>infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself, especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p> <p>Additionally, Paragraph 5.3.74 states that any S106 requirements must be reasonable and comply with the tests of necessity set out in Welsh Office Circular 13/97 'Planning Obligations'. Developers will only need to address the needs arising from their specific development and are encouraged to make use of pre application discussions to identify likely requirements at an early stage.</p>
868	<p>The proposed Site PLA3 will not meet the infrastructure improvements and will have a detrimental impact on transport, green infrastructure, health and education.</p>	<p>Concerns relating to infrastructure, transport, health and education.</p>	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability,</p>

			<p>general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). The proposed allocation will be required to provide 4.1 hectares of retained green infrastructure and new areas of public open space as well as exploring the provision of enabling sensitive public access to part of Laleston Meadows SINC and woodland. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summarises the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p>
--	--	--	--

			<p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
947	<p>Underutilised or brownfield land needs to be considered before important green spaces which give a place its character and community - it is not sustainable to link distinct communities and fail to provide sufficient school places and other infrastructure to support them. The failure to recognise the importance of visual breaks and the sense of place that green wedges create is contrary to Future Wales and other national policies.</p>	<p>Comments relating to greenfield and brownfield. Concerns regarding loss of green space, school capacity and infrastructure.</p>	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. 1016	Sustainable growth areas identified between Laleston and Bridgend is going to cause even more traffic and pollution. Bryntirion comprehensive school is a good size and what attracted me to the area. The plan that has been proposed concerns me that the school will become over subscribed or the local primary schools will be replaced at some by super schools which are not in the interest of children.	Concerns relating to traffic and pollution, as well as school capacity.	The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). Green Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p>
--	--	--	---

			<p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of traffic, the Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
--	--	--	--

			<p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
688	<p>PLA3 is marked as part of the sustainable growth strategy "expansion through under-utilised sites" - the fields between Bryntirion and Laleston are not under-utilised as anyone who regularly walks, runs or cycles around the area will tell you.</p>	<p>Concerns regarding the utilisation of PLA3.</p>	<p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

			<p>As part of the proposed allocation of Land West of Bridgend, development will be subject to site-specific requirements including a range of placemaking principles and masterplan development principles (See Deposit Policy PLA3 – Page 71). Green Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. The proposed allocation will also be required to maintain a strategic green corridor between the site and Laleston to retain the separate identities and character of these settlements whilst preventing coalescence.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough’s environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, tress (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
105 9	Sustainable growth areas - The areas propped fro expansion of housing in Bridgend are not under utilised there has been a surge of people using the land around the propped development west of	Concerns regarding a loss of green space relating to PLA3	The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 117 3	<p>While the strategy state it will use brown sites a large number of the areas outlined in the plan especially for development are green sites and prime agricultural land. Such as the proposed area in Kenfig hill and that in Laleston. Which could have a detrimental affect on the environment. Which should be a priority to the council especially as the Welsh government aims to hit carbon neutral targets by 2030. Also Urbanisation could put people off buying in the area as it loses its appeal is a village and with large number of people seeking the tranquility of village and countryside life building new house rather than regeneration could affect that. Social housing is a good concept however it actually prevents people from buying house on that estate. People who are paying thousands or there hard earns money for a home, that they will pay off for the rest of there lives dont want to live by or next to people who have had the same house as them given to them for free and payed for by there taxes. It's makes people feel used and causes a negative mentality and off putting especially in some case where you do not know who your living next to. Typically if your neighbours are also spending thousands on their house they have the same mentality as you and are going to treat the house street and living environment well. Whereas those getting it for free typically don't care and do the</p>	<p>Concerns relating to loss of green space associated with PLA3, as well as the provision of affordable housing</p>	<p>Whilst the Council cannot ultimately control the occupancies of new homes, new housing developments must incorporate an appropriate mix of house types, sizes and tenures to cater for the range of locally identified housing needs.</p> <p>The Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>While additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p> <p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself,</p>

	opposite. It could cause a significant outward migration off the site after purchase and the lack of skilled people		especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP. Additionally, Paragraph 5.3.74 states that any S106 requirements must be reasonable and comply with the tests of necessity set out in Welsh Office Circular 13/97 'Planning Obligations'. Developers will only need to address the needs arising from their specific development and are encouraged to make use of pre application discussions to identify likely requirements at an early stage.
620	Along with many others I have huge concerns with the use of The Bryncethin depot to be used as a potential gypsy/traveller site. Living in the rural Heol Laethog area just a few seconds from the proposed site I am concerned with a rise in the problems that often come with the gypsy community. This is also detrimental to the people living directly next to the site. How can such a site ever be considered as a permanent area when it's so close to residents? This is unfair. I am concerned in the rise of crime and antisocial behaviour in the area. Especially living in quiet country lanes. It makes us extremely vulnerable.	Concerns regarding Gypsy, Traveller and Showperson Allocation SP7 (2) Land adjacent to Bryncethin Depot	The Council has a statutory duty to carry out an assessment of the accommodation needs of Gypsies and Travellers under Part 3 of the Housing (Wales) Act 2014 and to meet any identified need for additional pitches under section 56 of the Mobile Homes (Wales) Act 2013. PPW also clarifies that "where a Gypsy and Traveller Accommodation Assessment (GTAA) identifies an unmet need, a planning authority should allocate sufficient sites in their development plan to ensure that the identified pitch requirements for residential and/or transit use can be met" (para 4.2.35). When the GTAA was completed, the total estimated pitch provision needed for Gypsies and Travellers was 7 pitches up until 2033. Since then, one family has met their accommodation needs on an existing authorised site, leaving a remaining need for six pitches over the Plan period. This need stems from two families (i.e., three pitches per family). One of these families has recently received planning consent to intensify their existing site and meet their accommodation needs (planning application P/21/677/FUL refers). This leaves a remaining need for 3 pitches, which the Council considers can be appropriately accommodated by the original proposed allocation at Court Colman (SP7(1)), which is already in the family's ownership. As such, the other proposed allocation at Bryncethin (SP7(2)) is no longer considered necessary and has been removed from the Replacement LDP. Refer to the Gypsy and Traveller Site Options Background Paper.
774	Being the gateway to both Ogmores and Garw valley the development of playing fields and nature park would enhance and support the current regeneration plans, whereas a traveller site wouldn't. This park and playing fields would benefit the community and surrounding areas especially as there has been so much housing development with no improvement to facilities.	Concerns regarding Gypsy, Traveller and Showperson Allocation SP7 (2) Land adjacent to Bryncethin Depot	The Council has a statutory duty to carry out an assessment of the accommodation needs of Gypsies and Travellers under Part 3 of the Housing (Wales) Act 2014 and to meet any identified need for additional pitches under section 56 of the Mobile Homes (Wales) Act 2013. PPW also clarifies that "where a Gypsy and Traveller Accommodation Assessment (GTAA) identifies an unmet need, a planning authority should allocate sufficient sites in their development plan to ensure that the identified pitch requirements for residential and/or transit use can be met" (para 4.2.35). When the GTAA was completed, the total estimated pitch provision needed for Gypsies and Travellers was 7 pitches up until 2033. 552	Yes, don't build on greenfield sites.	Don't build on greenfield sites	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>
556	How is Pencoed a sustainable growth area when you are creating 770 houses by stretching the Pencoed boundary further. Counter intuitive? Is this a handshake to ensure RCT take the school places. At least Woodlands is off the LDP.	Concerns regarding Strategic Allocation PLA4: Land East of Pencoed	The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to

			<p>enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land (refer to Background Paper 15 – Best and Most Versatile Agricultural Land). However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of PLA4: Land East of Pencoed, 2.3 hectares of land to accommodate a 1.5 form entry primary school with co-located nursery facility and a financial contribution to nursery, primary, secondary and post-16 education provision as required by the Local Education Authority. The financial contribution (including timing and phasing thereof) will be secured through Section 106 Planning Obligations in accordance with the Education Facilities and Residential Development SPG. The school will be accessible to new and existing residents by all travel modes, enabled by the development.</p>
613	N/A	No changes proposed	Comments noted.
658	Pencoed cannot afford to lose anymore areas of natural beauty. The plan to build next to Ty Merchant needs to stop.	Concerns regarding land adjacent to Ty Merchant	Comments noted. The Candidate Site Assessment Report (2021) details that land adjacent to Ty Merchant has not been proposed as a residential allocation.
937	No	No changes proposed	Comments noted.
973	The infra-structure needs to be developed with the housing not be a pipe dream for the future. New homes mean a larger	Concerns regarding infrastructure	Comments noted. In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan

	community that an already over-stretched education and health service will have to accommodate. Build the new schools and surgeries first. Then consider the homes.		period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
1009	There is insufficient planning for access to services within the planned developments for the Pencoed area - for example health care services and public transport.	Concerns regarding infrastructure within the Pencoed area	In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
1087	More pressure on Pencoed? Building on even more grade 2 agricultural land? Houses before infrastructure? Sony in Pencoed is empty - we have to lose jobs before we can "gain" them? Ask yourselves these questions and be truthful.	Concerns regarding greenfield development / infrastructure	Background Paper 15: Best and Most Versatile Agricultural Land sets out how the Local Planning Authority has considered the location and quality of agricultural land in developing the Bridgend Replacement Local Development Plan (LDP) 2018-2033. It demonstrates how the Preferred Strategy and site selection process has sought to minimise the loss of Best and Most Versatile (BMV) agricultural land when balanced against a range of other material planning considerations. In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.
1091	Again, housing not required	Housing not required	This LDP is based on a balanced and sustainable level of economic growth that will facilitate the continued transformation of the County Borough into a network of safe, healthy and inclusive communities that connect more widely with the Cardiff Capital Region and Swansea Bay Region. The proposed growth level of 505 dwellings per annum is derived from a POPGROUP Scenario that Uses an ONS 2019 Mid-Year Estimate base year and calibrates its migration assumptions from a 6-year historical period (2013/14–2018/19). This period witnessed sustainable population growth, in part linked to the number of dwelling completions across the County Borough, which the Replacement LDP seeks to continue. Maintaining this trajectory will lead to more established households (particularly around the 35-44 age group) both remaining within and moving into the County Borough, coupled with less outward migration across other economically active age groups. This will encourage a more youthful, skilled population base to counter-balance the ageing population, resulting in an overall population increase of 9.4% or 13,681 people over the plan period. This level of growth will also enable delivery of 1,977 affordable homes, thereby maximising delivery in combination with other sources of affordable housing supply in the context of plan-wide viability. This Growth Strategy is deemed the most appropriate, sustainable means to deliver the LDP Vision and Objectives as justified within the Strategic Growth Options Background Paper. All reasonable alternatives have also been duly assessed under the SA process. The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.
603	I completely and wholeheartedly disagree with plans to build new houses in the pyle, and north cornelly areas in stormy down. There are woods in that area that need	Objection to Strategic Allocation PLA5: Land East of Pyle	The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been

<p>protection for the sake of the environment and our planet. There will be little green space left for nature if this goes ahead. Additionally 15% of said houses being affordable is an absolute disgrace! There is a homelessness crisis and many young people like myself, will never be able to afford to buy my own house, so we continually have to rely on housing benefit to pay over priced rental charges! The majority of the housing should be affordable as so little of it is in this county</p>	<p>/ Nature / Affordability</p>	<p>analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land (refer to Background Paper 15 – Best and Most Versatile Agricultural Land). However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pen-coed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites, the vast majority of which are greenfield. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p><u>Green Space</u></p>
---	-------------------------------------	---

			<p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC's. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p> <p><u>Affordable Housing</u></p> <p>The Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>As detailed in Background Paper 5: Affordable Housing, additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p> <p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p> <p>During the plan period, development proposals within the LDP are expected to deliver a total of 1,977 affordable dwellings across the County Borough in order to contribute to the level of housing need identified by the LHMA. The remaining need for affordable housing (identified in the LHMA) will need to be delivered through a range of other mechanisms. These mechanisms include capital grant funding (Social Housing Grant or otherwise), self-funded Registered Social Landlord developments, private sector leasing schemes, re-utilisation of empty homes and re-configuration of existing stock. However, these mechanisms are outside the scope of the LDP itself,</p>
--	--	--	--

			<p>especially considering that past availability of capital funding (notably Social Housing Grant) does not provide a robust indication of the future availability of funding over the life of the LDP.</p> <p>This high-level viability appraisal is further bolstered by site-specific appraisals for those sites key to delivering the Replacement LDP (i.e. strategic sites). The Council has maintained continuous dialogue with respective site promoters to demonstrate that these sites can be delivered through analysis of more specific costs, constraints and site requirements. Unlike this broad assessment, therefore, the site-specific strategic policies (PLA1-5). This dual-faceted approach is paramount to ensure Council's aspirations for delivering high-quality new communities are both realistic and deliverable.</p>
605	How can you improve transport links with new houses? Your just adding to more cars on the road!!	Concerns regarding transport infrastructure	<p>In terms of road infrastructure, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore, a Strategic Transport Assessment has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p>
971	Schools are already oversubscribed, doctor surgeries are not able to meet the needs of patients in the area due to overcapacity. How will building more homes without building these additional facilities help these area grow?	Concerns regarding infrastructure	<p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>PLA5: Land East of Pyle, will set aside 5.7 hectares of land to accommodate 2 two form entry primary schools with co-located nursery facilities and a financial contribution to nursery, primary, secondary and post-16 education provision as required by the Local Education Authority. The financial contribution (including timing and phasing thereof) must be secured through Section 106 Planning Obligations in accordance with the Education Facilities and Residential Development SPG. Both schools must be accessible to new and existing residents by all travel modes, enabled by the development.</p> <p>In terms of health, the Council has been engaging with Cwm Taf Morgannwg University Health Board from the outset of the Replacement LDP process. Early meetings were held to ensure the level and spatial distribution of growth proposed was clarified to help facilitate alignment of service provision. As part of Stage 3 of the Candidate Site Assessment, the health board amongst other consultation bodies were invited to provide comments in respect of those sites identified as suitable for future development and possible allocation in the Deposit LDP. Whilst the Council cannot ultimately control provision of primary healthcare services, close working relationships will continue and be maintained with Cwm Taf Morgannwg University Health Board. This will be key to service provision planning as site allocations within the Deposit Plan progress.</p>

106 4	<p>I strongly oppose the Local Development Plan (LDP) for the Pyle/Cornelly area (PLA5: Land East of Pyle, Kenfig Hill & North Cornelly) on the following grounds: the lands are of prime agricultural status which are needed for the growing of crops for sustainable human and animal needs; the area in question is of vital importance to the heritage of Kenfig and surrounding areas. I've briefly listed the following that fall within my objections to this proposed plan. STORMY DOWN (a) Prime Agricultural Land (b) Heritage - Stormy Castle, Sturmistown (c) Heritage - Roman Road, Julia Martitima (d) Heritage - Military, RAF Stormy Down (Airfield) WWII (e) Heritage - Military, Air Crash Sites (Controlled sites under the Protection of Military Remains Act 1986) (f) Heritage - Stormy Down Settlement (deserted rural settlement) (g) Heritage - Stormy Farmhouse (h) SSSI - Site of Special Scientific Interest (located under Laleston on BCBC "Designation of Special Landscape Areas", March 2010 - https://www.bridgend.gov.uk/media/1796/designation_of_special_landscape_areas.pdf) SSSI includes the quarry's at this location in addition to the geology/mineral wealth and prehistoric value of the area in general. All this would be lost forever if the proposed LDP for this area was to take effect. As I'm responsible for the Kenfig Heritage website project (documenting the heritage of the Kenfig & surrounding areas) - an online educational resource which has been formerly recognised by the National Library of Wales as "an important part of Wales' documentary heritage" which includes this particular area in question, I'm opposing the proposed LDP as outlined as it would decimate the heritage of the area in its entirety - additionally, the new Welsh government schools curriculum now includes local Welsh history; destroying areas of both natural beauty and of which is steeped in Welsh heritage would detract school visits to places of historic Welsh importance and of which goes completely against the proposals of the new Welsh</p>	<p>Objection to Strategic Allocation PLA5: Land East of Pyle</p>	<p>Objection noted. Background Paper 15: Minimising the loss of Best and most versatile agricultural land sets out how the Local Planning Authority has considered the location and quality of agricultural land in developing the Bridgend Replacement Local Development Plan (LDP) 2018-2033. It demonstrates how the Preferred Strategy and site selection process has sought to minimise the loss of Best and Most Versatile (BMV) agricultural land when balanced against a range of other material planning considerations.</p> <p>Evidently, Land East of Pyle is a potential strategic site located at the edge of a Main Settlement (as defined by the Settlement Assessment) in a broadly viable housing market (as detailed within the Plan-Wide Viability Study) with high need for additional affordable housing (as identified by the LHMA). The original site submitted at Candidate Site Stage contains no BMV agricultural land based on Version 2 of the Predictive ALC Map. However, in order to ensure a more holistic and inclusive edge of settlement development opportunity, the site submission was expanded at Preferred Strategy Stage to include an additional significant parcel immediately to the south west. The overall proposal now constitutes two large parcels, the first encompassing 60-hectares of land to the north of the M4 and south-west of the A48, and the second being a 40-hectare parcel of land to the north and east of the A48. This revised submission presents an opportunity for significant sustainable development at the edge of a Main Settlement at a scale not matched by any other Stage 2 Candidate Site. This would enable delivery of a sustainable residential-led mixed-use scheme with approximately 2,300 market and affordable dwellings, provision of educational facilities, a local centre and associated supporting infrastructure. Expansion of the original site does mean that 8.4ha of BMV agricultural land (Grade 2 and 3a) would be lost through allocation of this more holistic sustainable urban extension according to the predicative map. However, detailed survey work undertaken by the site promoter indicates that the areas of Grade 2 and 3a as shown on Version 2 of the Predictive ALC Map are in fact Grade 3b. This has to be considered in the context of other deliverable Stage 2 Candidate Sites that are available. It is important for the Replacement LDP to acknowledge the role of this Main Settlement (as identified within the Settlement Assessment) and its potential to deliver sustainable development at a strategic scale when balanced against the potential loss of BMV agricultural land. Hence, there is considered to be an overriding need for this development to enable sustainable growth in accordance with Planning Policy Wales' placemaking principles, to contribute to affordable housing provision in a high-need area and to deliver a plethora of socio-economic benefits that will support both local employment provision and the local commercial centres. A masterplan for the site has been developed to ensure Planning Policy Wales' sustainable placemaking objectives are integrated from the outset. A suite of detailed supporting technical information has also been provided by the site promoter to evidence the deliverability and viability of the site. This development would make a meaningful contribution in terms of housing provision (affordable and market), education provision, active travel and public open space in a manner that would promote the health and well-being of local residents through 64 encouraging active lifestyles. The Candidate Site Assessment has not identified other land at this scale in lower agricultural grades. Therefore, this site is considered appropriate for allocation on this basis in accordance with the site search sequence outlined in Planning Policy Wales.</p> <p>Heritage As acknowledged by Strategic Policy PLA5, the site is open and exposed to views from the north, west and locally to the east as well as views from the M4 to the south. The most sensitive parts are the three high points, upper slopes and associated minor ridges, and the steep slope to the west on the southern edge. The least sensitive area lies to the north and west on the lower slopes/flat areas, which lends itself to be the most appropriate location for the bulk of higher density development. The southern part of Parcel B is within a Special Landscape Area and the development will need to be planned sensitively to take account of this designation.</p> <p>The site itself is not subject to any ecological designations, although further wildlife and habitat surveys will need to be carried out to inform the site's potential development. Additionally, there are two SSSI's located in close proximity to the boundary of the site; the Penycastell SSSI is located to the north east and the Stormy Down SSSI is located to the south east of the site. Both are physically separated from the site by the route of the</p>

Stormy Down (RCAHMW, Coflein) - https://coflein.gov.uk/en/search/?term=stormy%20down</p>		<p>trainline and the M4 respectively. Given the need to maintain a landscape buffer between major transport routes and any proposed development, neither are considered to be a constraint to development.</p> <p>Archaeology Wales have undertaken a Desktop study which highlights standing and buried remains of potential archaeological interest. A WWII pillbox exists at the north west area of the site and there is believed to be an area of earthworks related to a 19th century (or possibly older) farmstead at the north east of the site. A 19th century tramline is also located along the northern portion of the site. The development will ensure that these remains are preserved or adequately investigated and recorded if they are disturbed or revealed as a direct result of development activities.</p> <p>The site neighbours Stormy Castle, a medieval settlement, which could extend into the site. Further work will need to be conducted to fully investigate any potential impacts and a geophysical survey of the site will need to be carried out to supplement the planning application.</p> <p>Stormy down airfield would not be negatively impacted by proposed development.</p>
--	--	---
