EMPLOYMENT**

Title: Do you have any comments to make on the employment strategy?

ID	Comment	Summary of changes being sought/proposed	Council response
687	<p>Why are there so many empty units and retail shops in Bridgend and surrounding areas job forecasts for this area are 219-266 per year? I would suggest that most homeowners in BCBC commute outside the area for work as there are no opportunities here</p>	<p>Concerns regarding empty retail shops / employment opportunities</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of retail centres, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>

			<p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>Furthermore, the Council has recently outlined a vision for Bridgend Town Centre through the publication of the Bridgend Town Centre Masterplan. The vision brings together enterprise, employment, education, in-town living, shopping, culture, tourism and well-being within a historic setting. The masterplan will be used as a planning tool to improve the town centre and will be used to secure future funding to deliver identified projects. It forms the starting point for the decision making process which will follow. No decisions will be made without full engagement and there will be extensive consultation.</p> <p>Bridgend town centre consists of a variety of uses, which has formed the basis of eight development zones, within which 23 relevant projects have been identified, plus a number of site wide projects.</p> <p>The development zones include, The Railway Station Area; Brackla, Nolton and Oldcastle; The Retail Core; Café and Cultural Quarter; The Northern Gateway; Riverside; Newcastle; and Sunnyside.</p> <p>The regeneration projects identified in the Bridgend Town Centre Masterplan will be implemented in various phases over the next 10 years. An action plan has been developed to assist with formulating a project timeline, prioritising and planning projects and furthermore, identifying what resources or inputs are needed to deliver individual projects.</p> <p>The successful delivery of the masterplan will be dependent on an active partnership approach between key stakeholders from the public, private and third sectors. A strategic approach to project delivery will be taken, with BCBC acting as a key facilitator to bring together key project enablers to deliver projects that form part of the overall vision for the regeneration of the Bridgend town centre.</p> <p>Funding applications will be made to number of funding bodies to deliver projects, some of which include:</p> <ul style="list-style-type: none"> • UK Government • Welsh Government • Cardiff Capital Region • Private Investment • And various other funders
699	None.		Comments noted.
723	Seeing as we have lost the ford factory I cannot see people wanting to move to Bridgend and create a business. Building these houses will just push the housing market way out of the reach of local people who wish to live in the town they were brought up in. Instead you are looking to bring people in who will probably sell a house for a high margin and buy one for less than where they used to live.	Concerns regarding employment opportunities	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of the former Ford plant, Policy ENT5 recognises a unique approach is required to enable redevelopment of the site and it will be necessary to enable a flexible mix of economic uses, not necessarily akin to the type and density of uses previously accommodated on the site. The Council will work collaboratively with Welsh Government and the landowners to secure the best outcome for Bridgend.</p>
752	There is absolutely NO guarantee or even evidence that extra housing will attract new jobs	No evidence of housing attracting new jobs	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 			Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.
789	Pie in the sky. These plans relate almost entirely to massive increase in dwellings. These fine words about new employers moving in, existing employers expanding locally, stimulation of economic growth are all pie in the sky, just a wish list with very little to give practical support to such ideals.	Concerns regarding employment	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 1001	<p>Island Farm Development The current adopted LDP identifies Island Farm as a Strategic Employment Site and I understand that there is a valid planning permission on the site to deliver such development. Given that this site is good quality agricultural land (Grades 2 and 3a), the adopted LDP presumably had to demonstrate over-riding need for employment land in this location. What has changed to demonstrate that the site is no longer needed for Strategic Employment? If the site is not needed for Strategic Employment it should be released to safeguard the agricultural land. Why is Island Farm now suitable for a Sustainable Growth Area (PLA2) - which is largely residential rather than employment? The evidence demonstrating over-riding need for such residential development in this area - which could be delivered elsewhere - is very limited. Good quality agricultural land will be lost to development without</p>	<p>Concerns regarding Strategic Allocation PLA2: Island Farm</p>	<p>Comments noted. In terms of the existing LDP employment allocation on Island Farm, the 2019 Economic Evidence Base Study (EEBS) (See Appendix 14), indicates that whilst there is planning permission for a stadium plus other sports / leisure uses and 221,000 sq m office, and some of the leisure element is coming forward, there has been no known interest in expanding the Science Park through any form of B1 use.</p> <p>As identified by Background 15: The Best of Most Versatile Agricultural Land, Island Farm consists of nearly 44ha of BMV agricultural land as identified by Version 2 of the Predictive ALC Map. An earlier Agricultural Land Classification survey was also prepared in August 2009 as part of the outline application for the sports village at the Island Farm site. This survey found that the site is a mix of Grade 2 (6.5ha) and Grade 3a (19.5ha). They survey also found that the ability for the site to be productively farmed was limited by the stoniness of the soil and the large number of hedgerows. It was concluded that declining revenue from cereal production and the site forming part of a larger farmstead meant that the ceasing of cultivation would have limited economic impact.</p> <p>However, and moreover, development has already lawfully commenced on this site and re-allocation within the Replacement LDP would therefore not result in the loss of any additional BMV agricultural land. The Island Farm mixed use development comprising sport/leisure/commercial and office uses was granted Outline planning permission on 14th March 2012 (P/08/1114/OUT). The permission was subject to a Section 106 Legal Agreement (Legal File Refr: E40-275) that controlled highway works, land dedication, management plans, contributions and matters relating to travel and management plans associated with the stadia development. A series of reserved matters consents were granted for an indoor tennis centre, (P/14/354/RES refers), landscaping and ecological works, (P/14/823/RES refers), and highway and drainage infrastructure (P/14/824/RES refers). The Outline permission included the standard time limit conditions for the submission of reserved matters and the commencement of development. The final approval of reserved matters was issued on 12th June 2015.</p>

<p>sufficient justification. There is very little detail - and potentially contradictory policy - between PLA2 and interactions with Bridgend town centre. E.g. Transport policies PLA8 and PLA9 to improve the A48 for vehicles are very likely to worsen the poor access for pedestrians and cyclists and will not result in the expressed green lung between Merthyr Mawr and Newbridge Fields. PLA2 along with the other housing proposals in this area of Bridgend will lead to an unacceptable increase in traffic volumes on the main roads and the minor road network in the area.</p>		<p>The Outline planning permission included approval for the construction of a new traffic light controlled junction on the A48 that would serve as the primary access to the development site. The road construction would however pass through an area of local ecological value – the Island Farm Prisoner of War Camp Site of Importance for Nature Conservation (SINC). Under the Conservation and Habitats and Species Regulation 2010, a conditional European Protected Species Licence was issued. In order to comply with the licence and to prevent the new access road from fragmenting the dormice population, the developer proposed to construct and plant the approved ‘Green Bridge’. However, access to the site could not be formed from the A48 until the Green Bridge had been established. Under a non-material amendment to the outline planning permission and application P/17/29/FUL, the Council consented a temporary construction access from Ewenny Road/New Inn Road to allow a sequence of ‘enabling works’ that had been approved under P/14/354/RES and P/14/824/RES. These ‘enabling works’ are described as:</p> <ul style="list-style-type: none"> The setting up of the site facilities via Island Farm Lane and New Inn Road to provide the site facilities and temporary internal roads for the delivery of earth moving plant to the site; Undertaking earthworks to form a plateau for the Tennis Centre; Undertaking the earthworks, drainage works and form the sub base to the internal access road working from the boundary adjacent to the interconnecting spur with the adjacent Technology Drive; Break through the boundary hedgerow and construct the proposed road link between the Island Farm site access road and Technology Drive. Install the incoming services infrastructure that will access the site via Island Farm Lane. Construction access herein to be via Technology Drive; <p>The aforementioned works were commenced in July 2017 in accordance with the above consents and the details agreed in relation to the pre-commencement planning conditions. Under the definitions within the planning obligation, the aforementioned works constituted a ‘commencement of development’ triggering a number of obligations in relation to highway works. A deed of variation to the original agreement was signed on 11th October 2018 which reconciled the enabling works (phase 0) with the original obligation. On the basis of the above, the ‘enabling works’ constituted a material operation and a lawful commencement of reserved matters consents P/14/354/RES and P/14/824/RES. The works have not been completed but the Council’s opinion is that the permissions are extant. Hence, re-allocation of this site as a mixed use scheme (including residential) within the Replacement LDP would not result in the loss of any additional BMV agricultural land.</p> <p>Notwithstanding the extant planning permission, based on the revised mix of uses now proposed on the site, there is considered to be an overriding need for the development. Re-allocation of this site will enable accommodation of sustainable growth enshrined in placemaking principles, deliver affordable housing in the highest need part of the County Borough and enable delivery of two schools on the site, including relocation of Heronsbridge Special School. It will also enrich active travel and green infrastructure networks within Bridgend through creation of a ‘green lung’ that will connect the site to the Town Centre via Newbridge Fields. Development of this edge of settlement site would accord with the Preferred Strategy, channel growth to the Primary Key Settlement of the County Borough and make a significant contribution to the housing need identified in the LHMA. The site promoter has also provided extensive supporting information to evidence the site is both viable and deliverable.</p> <p>In terms of traffic, the proposed allocation is supported by detailed masterplanning work, including an illustrative block plan to identify a realistic dwelling yield on the site’s net developable area. The initial Transport Assessment has now been updated to reflect the final number of dwellings the site is expected to deliver. This identifies the various transport issues relating to the proposed development, and, in combination with the Strategic Transport Assessment, what measures will be taken to deal with the anticipated transport impacts of the scheme. Proposed Policy PLA2 prescribes the appropriate development requirements in relation to all forms of travel. The density and mix of uses proposed is considered appropriate to support a diverse community and vibrant</p>
--	--	--

		<p>public realm, whilst generating a critical mass of people to support services such as public transport, local shops and schools. In accordance with national planning policy, higher densities should be encouraged in urban centres and near major public transport nodes or interchanges. Given the site's location within the Primary Key Settlement of the County Borough and the proximity to Bridgend Town Centre, this density level is therefore considered appropriate to foster sustainable communities, further bolstered by the proposed enhancements to the active travel network.</p> <p>The Replacement LDP aims to reduce private car reliance and help the County Borough achieve the principles set out by the Active Travel (Wales) Act 2013, with the ultimate aim of improving and expanding upon the current active travel routes as identified in the Existing Route Maps. Consideration of active travel has been key during the master planning of strategic sites in the County Borough. Reference to the Active Routes detailed in Policy PLA2 in conjunction with Policy PLA12 should be considered essential in the delivery of any strategic site or any proposal, ensuring that development is contributing to the promotion of a sustainable and healthy lifestyle.</p> <p>The Active Travel Network Maps aim to improve access to key services and facilities including town centres, employment sites, retail areas and transport hubs, improved access to education facilities such as schools and colleges and improvements to, and expansion of, the existing strategic cycle network in the County Borough. Opportunities will be maximised to further improve upon these routes, providing walking connections which will allow integration between new developments and existing communities.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Proposed Policy PLA2 prescribes a number of placemaking principles for Land South of Bridgend (Island Farm), which are considered instrumental to achieving sustainable places, delivering socially inclusive developments and promoting cohesive communities. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods. There will be a clear emphasis on providing safe pedestrian and cycling linkages between the site, the Town Centre, Brynteg Comprehensive School and surrounding environs. In addition proposed Policy PLA2 will require the site's green infrastructure network to extend to Newbridge Fields, thereby capitalising on proposed active travel route INM-BR-49 and establishing a 'green lung' that connects the site to both Bridgend Town Centre and Merthyr Mawr. This will facilitate a key multi-functional network of integrated spaces and features south of Bridgend, providing a plethora of economic, health and wellbeing benefits for new and existing residents. Housing allocation COM1(2) will also be required to provide a link/extend route on A48 to connect the adjacent site (PLA2) in addition to widening footway on southern side of</p>
--	--	---

			<p>A48 to 3m and extend length on both southern and northern side. Broadlands roundabout will also be required to be upgraded for pedestrians and cyclists.</p> <p>The site promoter's Transport Assessment has identified that with exception of the A48 proposed site access junction, and the Ewenny Road Roundabout in the AM peak hour, and the B4265 / Ewenny Road junction in both peak hours, the revised Island Farm proposals will result in lower traffic flows through all junctions across the assessment network over both the AM and PM peak hour periods, compared to the previous consented development proposals on the Island Farm Site. As the consented flows are technically already considered to be existing on the highway network, this revised scheme will provide traffic reduction improvements across the local highway network. Previous assessment work on the Island Farm site has identified that the Broadlands Roundabout, Ewenny Roundabout, and Picton Close Junction all show capacity issues in forecast year assessment scenarios both including and excluding the consented Island Farm proposals traffic. Although the revised Island Farm proposals in general bring traffic reductions across these junctions (from what was previously consented), with consideration of background traffic growth alone, these junctions will still likely require mitigation to operate within capacity during future forecast years. The reduction in flows as a result of the revised Island Farm proposals however, may mean that any mitigation measures implemented can potentially achieve greater capacity improvements at each junction. The revised proposals at the Island Farm site include three separate vehicle access points onto the local highway network (compared to just two within the consented scheme). All three site access junctions are expected to operate within capacity under the revised Island Farm proposals. An updated assessment at all three identified junctions, and the site access junctions will be undertaken as part of a future supporting Transport Assessment for the revised Island Farm development, which will ideally include up to date baseline traffic flows as the basis for the assessment (Covid restrictions allowing).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that the proposed development with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
1018	<p>Has the need for business units been examined since the covid 19 pandemic? Are the plans been adjusted for more businesses working from home going forward? What is the risk of too much vacant office spaces in the borough?</p>	<p>Concerns regarding the impact of the pandemic on the employment strategy</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p>

			<p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). Policy SP11: Employment Land Strategy already allows for flexibility in changing circumstances and so no action is likely to be necessary. However, a refreshed Background Paper has been produced to consider the existing evidence base in light of COVID-19 and the refreshed Demographic Forecasts and Analysis Addendum. A sense-check of policy wording has also been conducted to ensure the early release criterion is flexible enough.</p>
1031	I don't think this is realistic	Concerns regarding employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. 1083	As I have already stated, building houses alone does not bring economic growth. In building these huge estates across the borough you are simply providing more housing stock for Cardiff and Swansea. We have already seen the loss of employment on a grand scale in the Borough - Sony, Fords, Igneos and more. I fail to see how by creating more key strategic employment sites you are actually going to attract new business. There are many empty units already and the town centre itself is a disgrace. I think your views of creating growth by building houses and designating employment locations as rather naive. Perhaps you should consider giving more thought to tourism by retaining the countryside and	Concerns regarding employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 570	Again, Lack of infrastructure, no regard to public health and wellbeing, lack of green	Concerns relating to lack of	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based

	<p>spaces, damage to ecology and without thought to future generations.</p>	<p>infrastructure and green spaces, health and well being, damage to ecology and future generations.</p>	<p>judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale (sustainable urban extensions) is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p> <p>In terms of wellbeing, The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan,</p>
--	---	--	--

			<p>underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Replacement LDP has been prepared in line with the Well-Being of Future Generations Act of which places a duty on public bodies to carry out sustainable development. The LDP Vision has been developed to take into account the 7 Well-being Goals and Bridgend's Local Well-being Plan with the specific characteristics and key issues affecting the County Borough. Background Paper 10 (See Appendix 50) demonstrates that the Replacement LDP assists in the delivery of the 7 Well-being Goals.</p> <p>The Replacement LDP has also been prepared in line with Bridgend Public Service Board Well-being Plan objectives. The Bridgend Well-being Plan outlines the things that Bridgend Public Service Board will work together on over the next five years; our wellbeing objectives and steps, and how we want Bridgend to look in 10 years' time. Background Paper 9 (See Appendix 49) demonstrates that the Replacement LDP assists in the delivery of the local well-being plan.</p> <p>In relation to lack of green space, the Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough's environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children's playspace across the County Borough (See Appendix 22: Outdoor Sport and Children's Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed 'audit' of the provision of Outdoor Sports and Children's Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend's green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINCs. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
1206	The switch to homeworking during the pandemic should be taken into account here. Many more people will be working	Concerns in relation to effect of covid on the	In light of the current Covid-19 pandemic a report has been undertaken in order to update and review on the preparation of the Replacement LDP (See Appendix 51 - Background Paper 11). The report evaluated the foundations of the plan's strategic direction to determine whether the vision, strategic objectives, strategic

	<p>from home at the moment and many employers will continue to support workers in homeworking for at least part of the week for the foreseeable future. In such a world, areas which are complete communities would be preferable to what would essentially be dormitory estates.</p>	<p>working pattern more specifically rise in homeworking.</p>	<p>policies and supporting technical studies remain appropriate given the emerging impacts of the pandemic. It also considered whether any updates and/or modifications were necessary to ensure that the Replacement LDP remained sufficiently flexible to accommodate any potential eventualities. The report demonstrates that the overall direction of the Replacement LDP still holds true, subject to minor flexibility amendments to ensure the Replacement LDP Policies can respond to changing circumstances over the plan period. Hence all the strategic policies have been assessed against sensitivity to the consequences of pandemic in the Covid 19 policy review background paper 11. Consequences of Covid 19 has also been taken into consideration in strategic site selection criteria that aims to achieve an integrated sustainable community. The LDP is prepared for next 15 years so it is difficult to know the full impact of covid in future.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>
--	---	---	--

			<p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. Sites will be required to deliver affordable housing, education provision, recreation facilities, public open space, active travel provision plus appropriate community facilities.</p> <p>The Replacement Plan ensures that all development comply with Strategic Policy 3 on Good Design and Sustainable Place Making (See Page 60). The development must contribute to creating high quality, attractive, sustainable places that support active and healthy lives and enhance the community in which they are located, whilst having full regard to the natural, historic and built environment. As such future planning applications will be required to be supported through the submission of appropriate design and technical information to demonstrate compliance with the criteria set out by Policy SP3. Such criteria include design of the highest quality possible, whilst respecting and enhancing local distinctiveness and landscape character.</p>
645	The Valley taskforce promised employment investment, it hasn't happened.	Concerns in relation to employment.	<p>Comment noted. The Taskforce is a cross-governmental body that was set up to coordinate policy and interventions in the south Wales Valleys, increasing the impact of current resources. Welsh Government are leading on delivering the aims and objectives set by the Taskforce.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11. Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>The Strategy recognises the need to deliver wider regenerative benefits to Valleys communities at a scale which acknowledges their infrastructure capacity, topography and geographical constraints. Therefore, Maesteg and the Llynfi Valley is allocated as a Regeneration Growth Area, reflecting the fact that it demonstrates the largest capacity to accommodate regeneration-led growth within the Valleys communities. There are individual sites</p>

			<p>within this area that already have the benefit of planning permission or are the subject of development briefs or master planning exercises to facilitate their delivery and regeneration. A substantial number of these sites are also brownfield or are under-utilised, whilst also being aligned to transport hubs, thereby demonstrating high credentials in terms of sustainable development and placemaking. However, it is acknowledged that some will require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to facilitate delivery.</p> <p>The Ogmere and Garw Valleys are not identified as areas that will accommodate significant growth in recognition of their topographical and viability-based constraints. However, these areas would benefit from community based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.</p>

562	No	No changes proposed	Comments noted.
584	Main employers in Porthcawl are related to tourism industry. Investment in facilities to enhance the experience of visitors will create more jobs.	Investment in leisure and tourist facilities needed to create more jobs	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
585	Employment opportunities will be short lived. Will end once building has ended.	Concerns relating to employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>Futhermore, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate</p>

			<p>a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>In terms of telecommunication infrastructure, please see Deposit Plan Appendix 5: Implementation and Delivery Appendix of which sets out the key issues, constraints, phasing and mitigation measures which are required to deliver proposals in the LDP. In summary, it is inherently feasible to connect telecommunications to all allocated Strategic Development sites.</p>
590	<p>Try replacing lost employers and skilled jobs. Concentrate on skills training and growing the workforce rather than just building houses.</p>	<p>Replace lost employers and skilled jobs</p>	<p>Comments noted. 772	Since coronavirus there are so many fewer jobs in the area. Many businesses forced to close or reduce. A pause should be put on housing to give the economy time to recover, else you are just adding to the plight of individuals already in the borough	Concerns with housing and employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households</p>

			<p>within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). Policy SP11: Employment Land Strategy already allows for flexibility in changing circumstances and so no action is likely to be necessary. However, a refreshed Background Paper has been produced to consider the existing evidence base in light of COVID-19 and the refreshed Demographic Forecasts and Analysis Addendum. A sense-check of policy wording has also been conducted to ensure the early release criterion is flexible enough.</p>
781	As I have previously said. With no parking facilities, and reduce footfall as a result, businesses are not going to invest in the area.	Concerns with lack of parking in Porthcawl	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of car parking, it's acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl</p>

			regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.
791	I think the new Aldi will give a little employment but I also think Aldi will attract more people in to town and with good travel links people can come and work in the town also	No changes proposed	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
794	I certainly accept that a supermarket will create new jobs within Porthcawl.	No changes proposed	Comments noted.
803	No	No changes proposed	Comments noted.
804	The employment strategy should not include a supermarket to generate job opportunities. Porthcawl requires affordable sports and leisure facilities appropriate to a seaside town. We should be building on the character and best of Porthcawl and not another money making opportunity for the council.	Concerns with employment in Porthcawl	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of the foodstore, evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings'</p>

			<p>as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site.</p>
881	<p>There are no strategic sites in Porthcawl - other than the one for ALDI. Any growing of business would be on a fairly small scale in the town and also with people working from home. Will housing briefs include the home working idea? Will infrastructure support this? Current Internet and Wi-fi in Porthcawl is 'variable'.</p>	<p>Concerns with employment in Porthcawl / internet infrastructure to support home working</p>	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of telecommunication infrastructure, please see Deposit Plan Appendix 5: Implementation and Delivery Appendix of which sets out the key issues, constraints, phasing and mitigation measures which are required to deliver proposals in the LDP. A desktop feasibility study has informed and supports future development of Porthcawl Waterfront. In summary the study confirms that it is inherently feasible to connect telecommunications to the site.</p>
884	<p>it is good that local people have jobs</p>	<p>No changes proposed</p>	<p>Comments noted.</p>
894	<p>I do not believe that employment will be significantly increased. There is likely to be loss of employment with other business as it is suggested that park and ride is an alternative to parking within Porthcawl but many visitors visit to go to beach with considerable equipment which they are unlikely to leave to go to visits the shops. This will impact on employment. The considerable number of houses that are proposed will again increase traffic on the roads, this will put people off visiting the town as already the roads on a sunny day are bumper to bumper. The crossing of roads is not safe because of the amount of traffic already in the town even in winter. I have experience long waits to cross the road on my mobility scooter. I have my dog travelling with me and it is a considerable risk to elderly people and animals that</p>	<p>Concerns with employment in Porthcawl / parking</p>	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
928	<p>You will be taking tourists away, taking businesses cash away and loosing jobs with this plan</p>	<p>Plan will reduce level of jobs and tourism</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's</p>

			<p>deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. Policy PLA1 requires Green Infrastructure and Outdoor Recreation Facilities to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance'. It is envisaged that significant public spaces will be created within the Sandy Bay element of the development, predominately within the Griffin Park Area (incorporating and extending the existing Griffin Park). This extension of Griffin Park could be utilised for events and activities, potentially including the fair. A significant expansion of Griffin Park, to provide amenities for the residential area, is key to the development framework. The expanded Griffin Park, in turn, leads to the Relic Dunes on the site's south-eastern edge. A large linear tapered public open space/residential square is proposed to spring from the Relic Dunes and provide a "grand" setting for the residential development around the space. Elsewhere on Sandy Bay, smaller "pocket" open spaces will be provided. However, exact locations of open space will be determined at the formal planning application stage. The seafront will also be clearly defined by the introduction of a potential recreational route along Sandy Bay that links seamlessly with the Eastern Promenade.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new</p>
--	--	--	---

			<p>meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Furthermore, the Council have prepared a Sustainability Appraisal (SA) to inform the Replacement LDP (See Appendix 9) of which was carried out to identify the likely significant environmental and wider sustainability effects from the Deposit Plan. It also considers whether any mitigation and enhancement measures should be incorporated within the Replacement LDP to ensure the avoidance of likely significant adverse effects and to enhance the effectiveness of the plan. The findings of the SA indicate that development of Porthcawl Waterfront with its proposed range of land uses will likely produce a wide range of significant beneficial effects.</p>
939	It needs to ensure youngsters have got job opportunity's.	Job opportunities for younger population needed	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
972	No	No changes proposed	Comments noted.

978	You have failed previously look at Bridgend town and learn by mistakes	Failed previously	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. 985	None	No changes proposed	Comments noted.
992	I do not agree with an Aldi taking prime waterfront land in porthcawl. It is a tourist town and re-development should reflect this.	Concerns regarding Aldi in Porthcawl	Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.

			<p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as ‘gateway buildings’ as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p>
993	<p>Additional employment is welcomed but it needs to reflect the needs and abilities of the Borough . I think locating Bridgend College is a brilliant idea to bring in additional footfall to Bridgend Town . I also think that empty shops in all the county towns could be used as classrooms and nurseries . This would bring even more people into our town centres . One way of thinking out side of the box is to look at a cross section of the communities daily / evening routines . Then take this information and look at other potential uses for the empty shops / buildings . Of course we also need to to improve public transport , why not introduce free buses to the town centres , which could also continue to Mcarthur Glen or Waterton</p>	<p>Employment is required / improvements to town centres</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of town centres, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p>

			<p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>In terms of public transport, it is beyond the scope of the LDP to provide free buses, however, the LDP will maximise opportunities for increased public transport use as and when new development takes place, ensuring development promotes connections to ensure efficient and equality of access for all.</p>
998	It about housing and commuting to cities - this plan does not consider may local jobs and supporting tourism.	Plan does not consider local jobs and supporting tourism	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector</p>

			<p>based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of tourism, Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
1000	NO	No changes proposed	Comments noted.
1002	The more support BCBC can give to local businesses the better. Having a good business plan for the area and develop Porthcawl as a major tourist destination will have huge economic benefits for all. Building housing to make a quick buck is not the answer a forward thinking and sustainable business plan to lead Porthcawl in to the next 10 - 20 years will require imagination and a realisation from some that Porthcawl is the jewel of the Bridgend county and must be developed accordingly.	Concerns regarding housing in Porthcawl. Focus should be on tourism	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

			<p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1007	A mix of permanent and seasonal jobs always required if Porthcawl to retain a holiday, visitor reputation	Permanent and seasonal jobs required in Porthcawl	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1008	Try lowering the rates local businesses already have to pay for their shops and rental units, maybe then they would have the financial resources to grow their business rather than close down.	Lower business rates	<p>Comments noted. It is beyond the scope of the LDP to control local business rates.</p>
1011	Porthcawl is a seaside town which offers little in the way of high quality employment. Transport provision does nothing for the town currently - no train station and no buses going west to Port Talbot or Swansea.	Transport in and out of Porthcawl poor	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Whilst it is beyond the scope of the LDP to provide bus services, the authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus</p>

			<p>terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new 'bus terminus' may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p>
1014	<p>yes the purposed plan for building 1,115 new homes will not enhance the employment strategy if the tourism, industry is killed off by lack of faculties to meet the needs of the tourists and locals , indeed this will detrimental .</p>	<p>Concerns regarding employment and housing in Porthcawl</p>	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1019	<p>Why are we developing new sites when old sites are lying empty, beggars belief</p>	<p>Development empty sites rather than new sites</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix</p>

			<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>In terms of allocated Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements, all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Additional long-term brownfield Regeneration Sites are also proposed for allocation (See Policy COM1(R1-R3)), located within parts of the County Borough that will benefit the most and also those that exhibit opportunities to deliver the greatest positive impacts of such growth. However, as referenced in Planning Policy Wales, the housing land supply will not be dependent on these additional long-term Regeneration Sites, as they require longer lead-in times, preparatory remediation-based enabling works and more detailed strategies to enable their delivery.</p>
1044	<p>I believe creating employment and providing houses is necessary just not on frontline of our beautiful coastline! Please make Porthcawl more of a tourist resort which will still encourage employment, build a supermarket opposite Newton Nottage Road, there are so many fields there which will not cause congestion to our beaches and town centre!</p>	<p>Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront</p>	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses,</p>

			<p>existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>In terms of the proposed foodstore, evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings' as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to "place-making", taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site.</p>
1048	Leisure and tourism could potentially be one of the largest employers in Bridgend, particularly in Porthcawl, but the Council needs to rethink its approach to L&T in the LDP, particularly looking at Sandy Bay and Salt Lake. Make a statement that L&T, not	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed

	<p>housing or retail, will drive Porthcawls economy forward, and commit to using these essential waterfront plots for tourism, not housing or retail. They will be lost forever otherwise</p>		<p>the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. 1058	Again this is beneficial to BCBC to gain more money from council tax.	Council will gain tax	<p>Comments noted.</p> <p>The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW). The Replacement LDP has been prepared in line with the Well-Being of Future Generations Act of which places a duty on public bodies to carry out sustainable development. The LDP Vision has been developed to take into account the 7 Well-being Goals and Bridgend's Local Well-being Plan with the specific characteristics and key issues affecting the County Borough. Background Paper 10 (See Appendix 50) demonstrates that the Replacement LDP assists in the delivery of the 7 Well-being Goals.</p> <p>The Replacement LDP has also been prepared in line with Bridgend Public Service Board Well-being Plan objectives. The Bridgend Well-being Plan outlines the things that Bridgend Public Service Board will work together on over the next five years; our wellbeing objectives and steps, and how we want Bridgend to look in 10 years' time. Background Paper 9 (See Appendix 49), demonstrates that the Replacement LDP assists in the delivery of the local well-being plan.</p>
1062	Investment in The Pavilion will create more jobs locally. It currently contributes circa £10Million to local economy in terms of secondary spend and supports many supply chain businesses	Invest in the Pavilion	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2.76 hectares of land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
475	Support local tourism businesses.	Support local tourism buisnesses	<p>Comments noted. Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p>
1099	There is no evidence to support the suggestion that new houses would bring new jobs to Porthcawl. Qualified tradesmen would be needed and in all probability these would live elsewhere	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront / employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan</p>

			<p>requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>In terms of Porthcawl, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires 2 land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1128	It is good to see some new businesses coming into Porthcawl we should encourage these independent businesses to use some of the empty banks and shops in the town.	No changes proposed	Comments noted.
1141	As previously stated, investment in tourism, rather than housing, would be a better option for Porthcawl. Improved leisure facilities would attract visitors and provide employment. The land earmarked for housing is a prime site for building leisure facilities, such as a Pump Track, cafés, sustainable shops, a boutique hotel and/or perhaps facilities for rainy days such as a small public swimming pool or	Concerns relating to Strategic Allocation PLA1: Porthcawl Waterfront	Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.

	<p>small cinema. Porthcawl could be made a place that appeals to a wider range of visitors by providing a wider variety of facilities. This would provide much needed income to the town and would increase employment opportunities for local people. This would, in my opinion provide greater economic opportunity than housing that's unaffordable to most local people, which will likely be bought up by investors and remain empty for a large proportion of the year. Further, if the land is taken up with housing, what will there be in Porthcawl to attract visitors?</p>		<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl's role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. Policy PLA1 requires land for leisure and commercial uses including a foodstore.</p> <p>With regards to leisure, an area north of the marina within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Mixed-use development will also be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1161	<p>What is happening to all empty factory building in Bridgend</p>	<p>What is happening to all empty factory buildings in Bridgend</p>	<p>Whilst it is beyond the scope of the LDP to prevent existing factory buildings from becoming empty, the plan will ensure that there is adequate land available for employment take up.</p> <p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p>
1499	Town Centres may have to include a broader range of employment opportunities as the nature of retailing changes.	Town centres need to be more flexible	<p>Comments noted. In terms of town centres, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p>
1501	Skilled workforce - are you vetting peoples qualifications, age, disability etc to assess skill level? People are mobile, will they not be allowed to leave Bridgend area for work? How exactly are you going to attract industry	How will you attract industry	Comments noted. 1506	Whilst it may facilitate growth in some areas it will negatively impact many small businesses - especially the new Aldi supermarket.	Growth in some areas will impact many small businesses	<p>Comments noted. In terms of the proposed foodstore, evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as ‘gateway buildings’ as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p>
1507	Cant see many jobs being created in Porthcawl as it will be mostly housing	Concerns regarding employment in Porthcawl	<p>Comments noted. In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged compared with other settlements within the County Borough, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors. 446	Attracting the right retail as well as technology, manufacturing into the area is difficult, I would like to see less cases of companies Taking advantage of financial incentives to come to the area only to move out again in a couple of years. There must be another way.	Concerns regarding retail and employment	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p>

			<p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>In terms of retail, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>
447	<p>Yes develop the industrial estates, market the Ford engine plant rather than let it go to waste. Stop out of town retail development and invest in independent local businesses in the town centre. Make our town have a uniqueness that attracts employers</p>	<p>Develop the industrial estates / stop out of town retail and invest in town centre</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p>

			<p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>In terms of the former Ford Site, Policy ENT5 will prioritise the redevelopment of the site as a key economic opportunity and will work collaboratively with Welsh Government and the landowners to secure the best outcome for Bridgend, whilst seeking to replace the jobs that have been lost. Therefore the former Ford Site remains an important part of the employment land portfolio, and, as a development opportunity, has scope to make a much larger economic impact (in terms of jobs supported) than the previous use. Policy ENT5 recognises that a unique approach is required in this respect and it will be necessary to enable a flexible mix of economic uses, not necessarily akin to the type and density of uses previously accommodated on the site. This will simultaneously provide a greater degree of flexibility and choice to the employment land supply. The exact nature, type and mix of uses will be subject to refinement through future Supplementary Planning Guidance.</p> <p>In terms of retail, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>
448	It is more likely that the additional population will be working outside the borough and therefore will increase traffic in the area.	More likely that the additional population will be working outside the borough and therefore will increase traffic in the area	As detailed within the Employment Background Paper, the Replacement LDP evidence base has evaluated a comprehensive range of growth options and analysed the link between different levels of population change and the size and profile of the resultant resident labour force. This has ensured development of a Growth Strategy that is most appropriate to achieve an equilibrium between the number of economically active people remaining within and moving into the County Borough plus the number of employers relocating and/or expanding within the same vicinity. One of the key aims of the Plan is to minimise the need for out-commuting. The relationship between housing growth and employment provision has been very carefully considered to this end. Therefore, the Deposit LDP does not seek to transform Bridgend County Borough into a commuter area for Cardiff and Swansea, and this is the opposite aim of what the strategy is seeking to achieve. The level of growth proposed is considered the most appropriate to achieve an equilibrium between new homes and employment provision, balanced against other key infrastructure requirements, and connected through enhanced active travel opportunities. This is detailed further within the Employment Background Paper.
449	lower business rates in town centres, and keep limited free parking in porthcawl to encourage footfall	Lower business rates in town centres, and keep limited free parking in	Comments noted. Unfortunately, this is beyond the scope of the LDP.

462	<p>Encouraging investment in businesses is commendable for the people who ALREADY live in the area. It does not mean that more houses have to be built on our green spaces increasing the population in the area so much that pressure is put on all the services and that increased traffic leads to slow traffic emitting polluting gases. Development must NOT be at the expense of the health of the community due to the added pollution levels.</p>	<p>Concerns regarding greenfield development</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p>

			<p>Policy PLA1-5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such development will deliver a wide range of land uses including affordable housing, education, recreation facilities, public open space, active travel plus appropriate community facilities and commercial uses. Delivery of these Strategic Sites will prove fundamental in achieving the Replacement LDP’s Vision and Objectives for the County Borough.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>
463	<p>This would be a disgraceful use of this greenfield land. The recent pandemic had demonstrated how important such land is - for many it was the only place to escape their homes during the lockdowns. Please do not allow one of the last fee pieces of natural beauty around Laleston to be lost.</p>	<p>Concerns regarding Strategic Allocation PLA3: Land West of Bridgend</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered

			<p>how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>In terms of the former Ford Site, Policy ENT5 will prioritise the redevelopment of the site as a key economic opportunity and will work collaboratively with Welsh Government and the landowners to secure the best outcome for Bridgend, whilst seeking to replace the jobs that have been lost. Therefore the former Ford Site remains an important part of the employment land portfolio, and, as a development opportunity, has scope to make a much larger economic impact (in terms of jobs supported) than the previous use. Policy ENT5 recognises that a unique approach is required in this respect and it will be necessary to enable a flexible mix of economic uses, not necessarily akin to the type and density of uses previously accommodated on the site. This will simultaneously provide a greater degree of flexibility and choice to the employment land supply. The exact nature, type and mix of uses will be subject to refinement through future Supplementary Planning Guidance.</p> <p>In terms of retail, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p>
472	How will travellers improve employment strategies	How will travellers improve employment strategies	It is a Welsh Government requirement for all Local Authorities to undertake a Gypsy and Traveller Accommodation Assessment the Housing (Wales) Act 2014 places a legal duty on the Council to meet any identified Gypsy and Traveller accommodation needs. These needs have to be considered as part of the

			Replacement LDP process and the plan to propose sites to meet any identified need to comply with statutory legislation.
474	Not long term jobs should invest in industrial estates already run down	Not long term jobs should invest in industrial estates already run down	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. 			Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.
501	Working for Aldi is not progress	Working for Aldi is not progress	<p>Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as ‘gateway buildings’ as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to “place-making”, taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p>
502	Please can you be more specific with regards to the types of business and employment opportunities that you wish to attract to the area	Be more specific with regards to the types of business and employment opportunities that you wish to attract to the area	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 507	Porthcawl is a tourist resort and the focus should be on this in ensuring there are jobs all year. Ensuring adequate hotel and hospitality jobs and marketing it as a year round holiday destination. We don't want it to be a commuter town with the 1000+ additional homes having people that don't work here	Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix 13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site’s deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As set out by Policy PLA1 (See Page 63), Porthcawl Waterfront is an underutilised brownfield site occupying a prominent seafront position. The regeneration site is allocated for a residential-led, mixed use scheme that will deliver up to 1,115 dwellings with associated facilities, including tourism, open space, leisure, retail, a bus terminus and community provision. Policy PLA1 details the site-specific requirements including masterplan development principles and development requirements to enable its implementation, in accordance with the Growth (See Appendix 42) and Spatial Strategy (See Appendix 43) identified within SP1 and allocation identified within SP2. Delivery of the site will prove fundamental in achieving the Replacement LDP’s Vision and Objectives for the County Borough.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and</p>
--	--	--	--

			<p>better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. It is envisaged that significant public spaces will be created within the Sandy Bay element of the development, predominately within the Griffin Park Area (incorporating and extending the existing Griffin Park). This extension of Griffin Park could be utilised for events and activities, potentially including the fair. A significant expansion of Griffin Park, to provide amenities for the residential area, is key to the development framework. The expanded Griffin Park, in turn, leads to the Relic Dunes on the site's south-eastern edge. A large linear tapered public open space/residential square is proposed to spring from the Relic Dunes and provide a "grand" setting for the residential development around the space. Elsewhere on Sandy Bay, smaller "pocket" open spaces will be provided. LAPs, LEAPs and NEAPs will also be incorporated within these areas of open space. However, exact locations of open space will be determined at the formal planning application stage. The seafront will also be clearly defined by the introduction of a potential recreational route along Sandy Bay that links seamlessly with the Eastern Promenade.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Whilst it's acknowledged that there is an imbalance in Porthcawl relating to employment, it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors.</p>
508	Aldi at salt lake would not provide diversity and local businesses	Aldi at salt lake would not provide diversity and local businesses	<p>Comments noted. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p>
510	Employs people to clean up the mess left by visitors	Employ people to clean up the mess left by visitors	Comments noted. Unfortunately, such matters are beyond the scope of the LDP.
513	BCBC's plan for Porthcawl provides very weak employment generation	Concerns regarding employment in Porthcawl	Comments noted. Whilst it's acknowledged that there is an imbalance in Porthcawl relating to employment, it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors.
514	I think is a good idea having employment investment in the area however these opportunities must be sustainable. Investment needs to be in quality jobs.	Investment needs to be in quality jobs	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment</p>

			<p>need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
515	<p>Explain skilled... I too think we need to ensure everyone is able to work. Why not encourage those smaller businesses to grow enabling them to employ people living within the county.</p>	<p>Encourage those smaller businesses to grow enabling them to employ people living within the county</p>	<p>Comments noted. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>In term of affordable housing, The Council has prepared an updated Local Housing Market Assessment (LHMA) for the County Borough (See Appendix 23). This assessment has informed the Replacement LDP to ensure the plan will provide an appropriate contribution to affordable housing provision, through viable thresholds and proportions.</p> <p>While additional affordable housing is needed throughout the County Borough, this varies by Housing Market Area in terms of quantity and type, with Bridgend having been identified as the highest housing need area. This evidence, combined with the Settlement Assessment (See Appendix 19) and Spatial Strategy Options (See</p>

			<p>Appendix 43) Background Paper, informed the classification of Bridgend as the Primary Key Settlement within the Settlement Hierarchy and the primary focus for sustainable growth. Equally, the LHMA identified high need within and informed classification of the other Main Settlements in the Strategy (including Pencoed, Porthcawl and the grouped settlement of Pyle, Kenfig Hill and North Cornelly), along with moderate need in Maesteg. The Spatial Strategy has therefore been developed to maximise affordable housing delivery in high housing need areas.</p> <p>The LDP is one significant means of addressing this shortfall, although it must be recognised that its policies and allocations are not the only mechanism to deliver affordable housing. The Plan-Wide Viability Assessment (2021) (See Appendix 32) was therefore prepared to determine the extent to which the LDP can contribute to the need identified for affordable housing across the County Borough over the plan period. The Assessment considered the broad levels of development viability across the County Borough's seven Housing Market Areas as identified within the LHMA and was supplemented with site specific viability testing for those sites key to delivery of the Plan. This process informed the contribution that sites (within different market areas) can make to the delivery of infrastructure, affordable housing and other policy requirements. These requirements are reflected in Development Management Policy COM3.</p>
526	<p>An Aldi store offers limited employment opportunities - most of which are at the lower end of the scale. It will have a potentially devastating impact on the local businesses - many of which only just survive the winter months with no tourism as it is. Allowing an Aldi store would most definitely not attract economically active households, nor encourage expansion of current businesses or attract investment from outside the area. It would provide low level, year round employment but so would the growth of smaller employers, who would also establish and require a more diverse, potentially skilled/professional workforce</p>	<p>Concerns regarding proposed foodstore in Porthcawl</p>	<p>Comments noted. Evidence confirms (See Appendix 16 – Retail Study) that the centre fulfils its function as a town centre and performs well against most indicators of vitality and viability. However, the centre has a limited convenience offer which is significantly below the UK average. Although the centre contains a range of smaller food stores suitable for top-up shopping, there is only one large supermarket suitable for main food shopping. This provides limited consumer choice and means that most residents must travel to other centres to meet their needs.</p> <p>Marketing for a new foodstore was carried out in autumn 2020 whereby numerous bids (five in total) were received and appraised. A robust selection process in which each bid was carefully assessed against a planning development brief resulted in Aldi Stores Ltd being identified as the preferred bidder. The planning development brief required bidders to submit high-quality, bespoke designs for premises that could act as 'gateway buildings' as well as incorporating appropriate access and active travel arrangements. The development brief for the food store site does not prescribe a particular architectural approach, but it does require clear attention to "place-making", taking in account the historic urban form and scale of the surrounding area. This will enable a development designed for human interaction and enjoyment whilst responding to and celebrating the maritime setting, cultural and heritage of Porthcawl. Cabinet members approved the disposal of the site to Aldi Stores Ltd, and delegated authority to officers to approve the terms of the disposal agreement.</p> <p>The food store site forms a key element of the wider masterplan that has been worked up for the Porthcawl Waterfront Regeneration Scheme and is intended to act as a precursor to, and catalyst for, future phases of development across the wider site. Subject to a planning application, the foodstore will be constructed alongside all-new residential, leisure, retail development at Salt Lake as well as new areas of green open space, bus terminus, active travel facilities and more.</p> <p>As well as providing residents with greater choice and more flexibility, the development is intended to unlock funds that will be reinvested into local infrastructure improvements within Porthcawl and further stages of the regeneration plans.</p> <p>In terms of employment, a positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the</p>

			<p>scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
527	retail opportunities need fostering, town and villages need to be resuscitated as places of interest, rather than languishing, and festering as they are now	Need to provide retail opportunities	<p>Comments noted. Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p>
528	Gypsies and travellers do not do any employment which will bring any benefit to our village	Objection to proposed Gypsy, Traveller and Showpeople allocation SP7(2) Land adjacent to Bryncethin Depot	<p>Comments noted. It is a Welsh Government requirement for all Local Authorities to undertake a Gypsy and Traveller Accommodation Assessment the Housing (Wales) Act 2014 places a legal duty on the Council to meet any identified Gypsy and Traveller accommodation needs. These needs have to be considered as part of the Replacement LDP process and the plan to propose sites to meet any identified need to comply with statutory legislation.</p>
530	It will never happen _ as in Ogmores by Sea _ lots of promises _ no facilities	It will never happen	<p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open</p>

			<p>space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. With regards to leisure, an area north of the harbour within Salt Lake will be safeguarded for a leisure use, potentially a hotel. In the event that a hotel facility is not delivered then the site could provide an alternative form of leisure/tourism/commercial, year round, wet-weather attraction. Furthermore, the comprehensive enhancement of the Eastern Promenade with new buildings, facilities and better landscaping provides an exciting opportunity to create an area that will not only enhance the frontage but also act, with others, to set a quality benchmark which will also need to be achieved elsewhere.</p> <p>Mixed-use development will be encouraged throughout the development. Commercial units will be considered on the ground floor if there is market demand for such uses. Retail uses, restaurants and cafes will be particularly encouraged. This mix of uses will help bring life and vitality during the day and into the evening.</p> <p>Sandy Bay will accommodate public open space, residential, education provision and commercial. In terms of open space and recreation, it's acknowledged that such provision is considered important for health and well-being, therefore the development should aim for standards in excess of the minimum. Policy PLA1 requires development of Porthcawl Waterfront to incorporate Green Infrastructure and Outdoor Recreation Facilities in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance. It is envisaged that significant public spaces will be created within the Sandy Bay element of the development, predominately within the Griffin Park Area (incorporating and extending the existing Griffin Park). This extension of Griffin Park could be utilised for events and activities, potentially including the fair. A significant expansion of Griffin Park, to provide amenities for the residential area, is key to the development framework. The expanded Griffin Park, in turn, leads to the Relic Dunes on the site's south-eastern edge. A large linear tapered public open space/residential square is proposed to spring from the Relic Dunes and provide a "grand" setting for the residential development around the space. Elsewhere on Sandy Bay, smaller "pocket" open spaces will be provided. However, exact locations of open space will be determined at the formal planning application stage. The seafront will also be clearly defined by the introduction of a potential recreational route along Sandy Bay that links seamlessly with the Eastern Promenade.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children's play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Proposals for the Porthcawl Waterfront Regeneration site are currently being developed further as part of a 'Placemaking Strategy' that represents a form of sub area masterplanning supported by illustrative design</p>
--	--	--	---

			material. This will provide a coherent basis for guiding development, securing future funding, attracting investors and delivering a comprehensive range of regeneration projects. I urge you to participate in the public engagement events being facilitated by Austin-Smith: Lord. In addition, any future development proposals for this site will be subject to a formal planning application where you can also have your say.
531	Strong support to incentivise apprenticeships.	Support to incentivise apprenticeships	<p>Comments noted. Whilst it is beyond the scope of the LDP to incentivise apprenticeships, A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
532	CONTINUED FROM PREVIOUS QUESTION They worded the notice in a way that put fear into people that did see, by making statements like this could affect your property, but in actual fact it was evident that the down grading to a public foot path would take away the restriction of not being able to build on a bridle way. Documentation can be produced if required to evidence this. It is my opinion that the local authority is wanting to take revenue from tourism and expect the residents to pay extortionate contribution to services for the county of Bridgend, but there is little return by way of meaningful recreation, and opportunities for children and young people to develop skills, and be supported in their positive health and wellbeing within the town they live. During Covid I volunteered to support people who were not coping with the restrictions, these people generally needed recreation to support their mental health. In my opinion there are simple answers to helping residents to improve their health and wellbeing, and building more house within the town is not the answer as it reduces the opportunities for recreation, and would be detrimental to the community as a whole and to future generations. Again, I do not accept the argument that Parc Dean is available to residents. Throughout Covid and post Covid this has not been the case. The site is only open to the people staying at the site.	Concerns regarding Strategic Allocation PLA1: Porthcawl Waterfront	<p>Comments noted. The Deposit Plan has been prepared in accordance with Welsh Government Development Plans Manual (Edition 3). It contains guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in Planning Policy Wales (PPW).</p> <p>The Deposit Plan has been underpinned through the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables the Replacement LDP will maintain Porthcawl’s role as a Main Settlement capable of supporting regeneration-led growth, demonstrating capacity for sustainable growth based on its accessibility, availability of amenities and employment provision in the context of its existing population base.</p> <p>The plan preparation has involved the assessment of 171 sites. Each candidate site has been assessed against the criteria in the Candidate Site Assessment Methodology which was previously consulted upon (See Appendix</p>

<p>Please also bear in mind that there is only a proportion of services that were ever available to the residents of Porthcawl. I understand that there is a requirement for housing to be built within the county of Bridgend. I object strongly to Porthcawl being the correct location to meet the requirement. I repeat, Porthcawl is primarily a tourist town, with an infrastructure that currently does not fully meet the current population and there are more appropriate areas for development. I repeat it is a transient town and the number of visitors has increased considerably since covid. Residents are increasingly working from home therefore whereas they would use leisure facilities in the main towns/cities they are now needing more localised provision. Porthcawl has three golf clubs in close in and around Porthcawl. If houses need to be built maybe one of these sights could be considered. . I strongly do not believe that the local authority has not given sufficient consideration to meeting the physical and emotional needs of residents and future generations.</p> <p>EMPLOYMENT Employment within Porthcawl should be tourism related. However, there are conflicts within this. The idea of park and ride, because there is not enough parking within the town, in my opinion is short sighted. Families using this service will likely have to carry bags, chairs, barbeques, pushchairs, body boards etc, they are unlikely to want to carry such items to leave the beach to use the local shops or tourist attractions. Therefore suitable car parking and sustainable employment go hand in hand. I do not believe park and ride has been thought through properly. Covid has changed the lifestyles of many people and I do not believe that enough consideration has been given to this within the LDP. More people are working from home, therefore more residents are using the seaside town facilities rather than recreation facilities within the towns and cities outside of Porthcawl. Recreation needs expansion with this in mind. This means they are more likely to shop locally also. Winter as well as</p>	<p>13 – Candidate Sites Assessment Report (2020)). During Stage 2 detailed assessment, sites were examined based on any specific issues they raised in terms of their deliverability, general location, neighbouring land uses, existing use(s), accessibility, physical character, environmental constraints and opportunities. Site promoters were asked to prepare and submit a number of technical supporting studies to demonstrate the site's deliverability, sustainability and suitability. Proceeding this detailed assessment, only those sites deemed appropriate were included for allocation in the Deposit Plan.</p> <p>As part of the proposed allocation of Porthcawl Waterfront, development will be subject to site-specific requirements including masterplan development principles and placemaking principles (See Deposit Policy PLA1 – Page 63). The provision of new residential units, including affordable dwellings, will enable the delivery of other vital regeneration requirements comprising flood defences, public open space, leisure, enhanced active travel links plus education, retail and community facility provision.</p> <p>A Placemaking Strategy has been developed and produced of which provides the framework to deliver the broader vision for Porthcawl; which aims to create a premier seaside resort of regional significance through the comprehensive regeneration of this key waterfront site. It proposes a sustainable distribution and variety of complementary land uses across the area. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p> <p>In terms of Salt Lake, development will include a new food store, residential (including affordable housing), supporting commercial uses and leisure. A large linear tapered public open space/residential square is proposed to spring from the Relic Dunes and provide a "grand" setting for the residential development around the space. Elsewhere on Sandy Bay, smaller "pocket" open spaces will be provided. LAPs, LEAPs and NEAPs will also be incorporated within these areas of open space.</p>
---	---

<p>summer opportunities for recreation need to be considered. There would be employment within this. It needs to be considered that owning pets and pursuing hobbies has increased since Covid. Are you going to support local livery by not building on agricultural land?. There has been an expansion in people wanting livery and this creates jobs. ie Diamond Day livery Zig Zag lane in Porthcawl. More dogs have created employment for dog walkers, trainers etc. With this in mind there needs to be consideration to maintaining the bridle ways and working in partnership with highways to allow for safe activity within the local community. There are a lot of skills within the community. Historically it has been tradition for the elder generations to share such skills with the young. It is my opinion that this should be promoted. An example of this is the skills workshop in Merthyr. It is noted within your LDP that there is a high proportion of elderly people in Porthcawl and I am sure they would welcome sharing their knowledge and skills with the younger generation to support them in future employment. It would be good if the LDP could use imagination and promote growth of skill level in a less formal setting than school/college. Individual/self employment could be considered by encouraging local artists to work in the open such as happens in Brixham (Devon) for example. More street demonstrations would not only result in employment but would enrich the town. Let the imagination of the local people be encourage and supported. I make such statements with a background in community and project development although qualified as a social worker in child protection. I have given presentations in the house of commons (parliamentary receptions) on the subject of child friendly communities, I have presented in ISPCAN world congress on such subjects. I now work as a consultant for local authorities. I would be happy to share my knowledge and skills and I am sure there are many other professional and skilled people within the communities that would welcome to be meaningfully included</p>		<p>However, exact locations of open space will be determined at the formal planning application stage. The seafront will also be clearly defined by the introduction of a potential recreational route along Sandy Bay that links seamlessly with the Eastern Promenade.</p> <p>Additionally, there are plans for creating new facilities at Cosy Corner, including community facilities whilst also creating employment opportunities. The plans for Cosy Corner include an all-new stone and glass-clad building which will feature new premises suitable for retail and start-up enterprises. The council also wants to create new meeting space for community use, a parade square for the Sea Cadets and an office for the harbour master as well as changing facilities for users of the nearby marina. If funding allows, plans are in place that will further enhance the scheme with new landscaping, public seating, a children’s play area and a canopy structure capable of providing comfortable outdoor shelter from rain and the sun.</p> <p>Strategic Policy 16: Tourism and supporting development management policies will promote tourism development. The LDP will also provide the framework for the provision and protection of well-located, good quality, tourism, sport, recreation and leisure facilities and to diversify tourism in the County including Porthcawl, thereby contributing to the Aims and Priorities of the Bridgend County Destination Management Plan (2018-2022) (See Appendix 30).</p> <p>Proposals for the Porthcawl Waterfront Regeneration site are currently being developed further as part of a ‘Placemaking Strategy’ that represents a form of sub area masterplanning supported by illustrative design material. This will provide a coherent basis for guiding development, securing future funding, attracting investors and delivering a comprehensive range of regeneration projects. I urge you to participate in the public engagement events being facilitated by Austin-Smith: Lord. In addition, any future development proposals for this site will be subject to a formal planning application where you can also have your say.</p> <p>In terms of car parking, it’s acknowledged that a sound and robust parking strategy will be critical to the success of the regeneration. As part of the strategy, the site will accommodate a new multi storey car park on the existing Hillsboro car par enabling more ground floor space to be given over to public realm and development. Consideration should be given to alternative future uses as, overtime, the aspiration is that travel to Porthcawl Waterfront will be principally by public transport including park and ride schemes, greatly reducing the number of private vehicles requiring parking facilities. Consultations confirmed widespread support for the concept of a multi storey car park whilst recognising it will change the immediate outlook of properties on Hillsboro Place.</p> <p>The authority has a strong desire to facilitate and actively encourage a modal shift towards increased use of public transport and the provision of a new bus terminus is integral to this as well as being part of the wider Future Wales Plan. As such, a new ‘bus terminus’ may also be located along the Portway of which will function as a boulevard where visitors and locals could arrive at, and depart from the regeneration site and town centre. The location of the bus terminus will enable access towards the waterfront and also the town centre. The Council has also undertaken feasibility work to explore proposals to deliver a bus terminus within the Porthcawl regeneration area. The bus terminus project is being brought forward in connection with Cardiff Capital Region Metro Plus project and is seen as a key element of the wider regeneration plans.</p> <p>In terms of employment, the imbalance and shortage of employment land in Porthcawl is acknowledged, although it is likely that the majority of employment in the town will continue to be provided through planned growth in the commercial, leisure and tourism sectors.</p> <p>With regards to the provision of workshops/community spaces, Strategic Policy 9 provides the framework for the provision of new or replacement social and community facilities, including educational and training facilities.</p>
---	--	--

	<p>in the future of Porthcawl to meet the 17 UN Global Goals.</p>		<p>Furthermore, Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p> <p>With regards to the provision of liveries of which often require a countryside location, applications for such uses will be assessed against Policy DNP1 of which sets a presumption against development in the countryside, except if it is considered an acceptable use. It is likely the provision of a livery would be considered acceptable under criteria 12 – outdoor recreational and sporting activities.</p> <p>In terms of bridal ways, please contact the Council's Rights of Way Section to resolve any queries that you may have.</p>
533	<p>How can BCBC justify that 9,027 new dwellings correlate to new jobs within BCBC ?</p>	<p>Concerns between number of dwellings and number of jobs</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector</p>

			<p>based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
493	pie in the sky	No changes proposed	Comments noted. Considered non-material without rationale.
378	As stated previously without a comprehensive improvement in the transportation infrastructure of the County borough then this strategy is a non starter.	Concerns regarding transportation infrastructure	<p>Comments noted. The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p>
535	any company that gets grants must not be allowed to close up when funding money gone	Any company that gets grants must not be allowed to close up when funding money runs out	Comments noted. This is a non-planning issue, therefore is beyond the scope of the LDP.
538	South Wales has a very low pay/income level so how does this work when people are willing to relocate or travel to England for better paid jobs?	Concerns regarding employment	Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. 540	If it looks like BS and it smells like BS then it is BS	No changes proposed	Comments noted.
543	no	No changes proposed	N/A.
544	The strategy seems to be considerate of the important factors relating to increasing employment. But similar to my previous points, this should not be overshadowed by the want to increase more housing. The Employment opportunities as well the training opportunities (apprenticeships, further education, degrees, and internships) need to be established for the current population to be able to progress. unemployment or low skilled jobs are not low in Bridgend and i think its important to push people and industries into higher skilled jobs etc.	Employment should not be overshadowed by the want to increase more housing	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). 438	Internet nationalised nationwide.	Comments relating to the provision of nationalise internet.	<p>Comments noted. This would be beyond the scope of the Local Development Plan. Although, the LDP supports the NDF 2040 outcomes which address the provision of world-class digital infrastructure. Better digital communication will enable economic and social progress and ensure Wales can lead and keep pace with the latest global technological advancements. In this regard, the LDP will incorporate Policy 13 (Supporting Digital Communications) of the NDF 2040, which stipulates that Planning authorities must engage with digital infrastructure providers to identify the future needs of their area and set out policies in Strategic and Local Development Plans to help deliver this. New developments should include the provision of Gigabit capable broadband infrastructure from the outset.</p>
640	A Goodsheds (Barry) style of smaller, independent businesses would be perfect for Porthcawl. We need the artisan brewers, pop up food stalls, and nice places for people to visit and socialise here & an area for events, concerts etc.	Comments relating to the provision of commercial development within the borough.	<p>Comments noted. Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. It also proposed to retain and improve upon areas of attractive open space within Griffin Park, whilst creating significant new areas of open space along the seafront, supplemented with high quality active travel routes that traverse the entire site between the harbour and Trecco Bay. Physical development of the waterfront in this manner will improve the attractiveness of the town as a place to live and work, enhance the vibrancy of the Town Centre and deliver wider socio-economic benefits that allow the broader settlement of Porthcawl to thrive and prosper.</p>
645	<p>The Valley taskforce promised employment investment, it hasn't happened.</p>	<p>Comments regarding Valleys taskforce and employment provision.</p>	<p>Comments noted. The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p>

			<p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP’s success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough’s future housing requirements can be realised.</p> <p>The Replacement LDP apportions sustainable growth towards settlements that already benefit from significant services, facilities and employment opportunities and are most conducive to enabling transit orientated development. As such, a Settlement Assessment has been undertaken (See Appendix 19) to establish a sustainable settlement hierarchy. Based upon the consideration of a comprehensive range of variables sustainable growth will be appropriately directed towards the Main Settlements of Bridgend and Pencoed along with the grouped Main Settlement of Pyle, Kenfig Hill and North Cornelly.</p> <p>The Llynfi Valley demonstrates the most significant scope for growth across the three Valleys. As outlined by the Settlement Assessment Study, Maesteg retains its role as a main settlement of which has the potential capacity and infrastructure to accommodate future growth. Whilst the Spatial Strategy recognises several constraints associated with a number of large regeneration sites in the Maesteg and the surrounding parts of the Llynfi Valley, ‘hotspots’ on the edge of the Regeneration Growth Area of Maesteg and the Llynfi Valley, particularly in the south present viable opportunities to accommodate sustainable development.</p> <p>The Ogmore and Garw Valleys are identified as Local Settlements. Therefore, whilst these areas will not be earmarked to accommodate significant growth, the Replacement LDP seeks to create sustainable communities linked to wider opportunities in a manner that protects their high quality environment. It is recognised that alternative forms of development would help deliver smaller-scale growth, such as (but not limited to) co-operative housing, self-build and custom build opportunities alongside other forms of development. Such community investment opportunities will enable development of a scale and nature that is tailored to community needs, whilst diversifying and strengthening the local economies, connecting communities to wider opportunities and protecting the high quality environments.</p>
647	<p>There has been a significant switch to working from home in the last 18 months. How will this plan consider requirements for improved infrastructure ie super fast broadband to support this?</p>	<p>Comments regarding home working and the provision of broadband infrastructure to support this.</p>	<p>Comments noted. In light of the current Covid-19 pandemic a report had been undertaken in order to update and review on the preparation of the Replacement LDP (See Background Paper 11). The report evaluated the foundations of the plan’s strategic direction to determine whether the Vision, Strategic Objectives, Strategic Policies and supporting technical studies remain appropriate given the emerging impacts of the pandemic. It also considered whether any updates and/or modifications were necessary to ensure that the Replacement LDP remained sufficiently flexible to accommodate any potential eventualities. The report overall demonstrates that the overall direction of the Replacement LDP still holds true, subject to minor flexibility amendments to ensure the Replacement LDP Policies can respond to changing circumstances over the plan period.</p> <p>In this regard, the LDP supports the NDF 2040 outcomes which address the provision of world-class digital infrastructure. Better digital communication will enable economic and social progress and ensure Wales can lead and keep pace with the latest global technological advancements. In this regard, the LDP will incorporate Policy 13 (Supporting Digital Communications) of the NDF 2040, which stipulates that Planning authorities must engage with digital infrastructure providers to identify the future needs of their area and set out policies in</p>

			Strategic and Local Development Plans to help deliver this. New developments should include the provision of Gigabit capable broadband infrastructure from the outset.
652	Please see my letter sent by e-mail to ldp@bridgend.gov.uk, consultation@bridgend.gov.uk and planning@bridgend.gov.uk on 02/07/2021.		Comments noted.
649	With business failing locally and towns becoming ghost towns unless manufacturing returns there will still be issues with employment	Comments regarding employment provision and local businesses.	<p>Comments noted. Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in commuter spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Primary Shopping Area boundaries for Bridgend, Maesteg and Porthcawl have been reviewed against the existing distribution of uses and likely future requirements. In Bridgend and Maesteg, the Primary Shopping Areas have been condensed to create a consolidated retail core. Additional Secondary Shopping Areas have been identified on the proposals map for Bridgend, Maesteg and Porthcawl to create greater flexibility and promote the potential for a wider range of uses.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The hierarchy will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p>
547	The shift in how many work during the pandemic will impact on employers not requiring as much office space. Bridgend has tried and failed to bring new business in to replace Ford. There is a concern that there isn't the vision or ability to bring different types of businesses into Bridgend	No changes - Concern that businesses will not want to relocate to Bridgend	<p>In light of the current Covid-19 pandemic a report had been undertaken in order to update and review on the preparation of the Replacement LDP (See Background Paper 11). The report evaluated the foundations of the plan's strategic direction to determine whether the Vision, Strategic Objectives, Strategic Policies and supporting technical studies remain appropriate given the emerging impacts of the pandemic. It also considered whether any updates and/or modifications were necessary to ensure that the Replacement LDP remained sufficiently flexible to accommodate any potential eventualities. The report overall demonstrates that the overall direction of the Replacement LDP still holds true, subject to minor flexibility amendments to ensure the Replacement LDP Policies can respond to changing circumstances over the plan period.</p> <p>Changes in working practices (i.e. additional home working) could reduce the need for B1 space provision, although this could equally be offset with additional need for B2/B8 provision (i.e. due to an increase in demand for storage and distribution). Whilst it is difficult for any forecast to predict the longer-term impacts of the pandemic in these respects, it is vital for the Replacement LDP to allocate sufficient B space provision to plan for any eventuality. The existing evidence base has very carefully considered the link between economic growth, dwellings, employment, jobs and employment land. However, the planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting.</p>

555	Yes more investment and jobs need to be brought into Bridgend this will then improve the overall area and make the populace more affluent	Support Employment Strategy	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence-based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.
565	Free parking and the high street vibrant success would help via tax help etc - It appears the shops struggle to stay open-taxes too high etc.- thus lower employment-The employment strategy certainly not working in the area. I suspect many travel to Cardiff to work. While as a result many shoppers shop in Cardiff and elsewhere.and other areas to shop- where many things could be bought in the town centre- I like the pedestrianised areas - great improvements have been made- but few customers. Creating jobs here is an obvious area,.employment should be linked with the environment in this strategy as local is better for the environment- the worker has less travel expenses, more time also. More money to spend in Bridgend is better for Bridgend. How many work in Cardiff who could have worked in Bridgend. Online shopping of course plays a part in the decline of high streets across the country. Its not a level playing field that should change.	Concern over out commuting	<p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace-based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>Strategic Policy SP12 of the Replacement Plan will promote Town, District and Local Centres throughout the County Borough as hubs of socio-economic activity and the focal points for a diverse range of services which support the needs of the communities they serve.</p> <p>As part of the technical supporting evidence base the Council have prepared a Retail Study (See Appendix 16) of which sets out evidence-based recommendations on retail need, the distribution of need and the definition of primary shopping areas to inform policies and site allocations. Additionally, the Council have also undertaken a sense check of the evidence base in light of the pandemic (See Appendix 51 – Background Paper 11: Covid-19 Policy Review). The 2019 Retail Study already identified a shift in customer spending habits and online shopping, which the pandemic has accelerated. The LDP recognises that high streets will continue to change especially in the short-term, hence it contains more flexible planning policies and retail boundaries within town centres, recognising their changing roles and functions. It will be increasingly important for them to accommodate a wider array of uses than just retail, including community, health, leisure, residential and flexible co-working spaces alongside areas of open space.</p> <p>The Replacement LDP ultimately seeks to allow the traditional role and function of established retail centres to evolve and adapt appropriately. The Retail Hierarchy (Policy SP12) will be used positively to ensure Town, District and Local Centres continue to be the principal locations for new retail, office, leisure and community facilities. This will both capitalise on and enhance the vitality and viability of centres, whilst generating increased social and economic activity.</p>
566	There appears, according to media reports a shortage, in some cases a severe shortage of key workers - builders, carers and skilled technicians. Will there be adequate provision for the training and retention of these people by the council? Will there be support for local art and craft businesses that can bolster the local image and attract more people to the area? Promote the area via social media and	Concern over training and retention of key workers / ability to attract employers	The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.

	through coordination of other developmental / redevelopment agencies. Reliable broadband is also essential.		The Growth Strategy can be succinctly explained by the acronym 'CARM', which summarises the Strategy's intentions to Counter-balance the ageing population by Attracting skilled, economically active households, Retaining skilled, economically active households and rendering the County Borough a Magnet for employers to expand within or move into.
569	After this year, employment is scarce and anything to support more jobs in the community would be hugely beneficial. Many young people are uncertain about university in the current climate and need opportunities on their doorstep due to the delay in driving tests. The area needs more collaboration with other areas of the community; schools and businesses working together. As the world of shopping is changing, how can the main town centre be revived?	Concern over job creation especially for young people	<p>This LDP is based on a balanced and sustainable level of economic growth that will facilitate the continued transformation of the County Borough into a network of safe, healthy and inclusive communities that connect more widely with the Cardiff Capital Region and Swansea Bay Region. The proposed growth level of 505 dwellings per annum is derived from a POPGROUP Scenario that Uses an ONS 2019 Mid-Year Estimate base year and calibrates its migration assumptions from a 6-year historical period (2013/14–2018/19). This period witnessed sustainable population growth, in part linked to the number of dwelling completions across the County Borough, which the Replacement LDP seeks to continue.</p> <p>Maintaining this trajectory will lead to more established households (particularly around the 35-44 age group) both remaining within and moving into the County Borough, coupled with less outward migration across other economically active age groups. This will encourage a more youthful, skilled population base to counterbalance the ageing population, resulting in an overall population increase of 9.4% or 13,681 people over the plan period.</p> <p>The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision.</p>
592	Welsh Government don't seem to be good at this, they are losing more than they gain eg Ford's.	No changes	Comments noted
598	No	No changes	Comments Noted
601	Why build more when half the units in industrial estates are empty	Concern over empty premises	The 2019 Economic Evidence Base Study (EESB) (See Appendix 14) and 2021 Update (See Appendix 15) analysed the land best suited to meet employment need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper (see Appendix 47). Consequently, the sites that make up the Employment Land Strategy of the Deposit LDP largely consist of existing employment allocations and vacant land that forms part of established employment sites that have a realistic prospect of contributing to future supply. This approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth. It is encapsulated in Policy SP11 – Employment Land Supply, which is supported by Policy ENT1 which allocates new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites, thus enabling a range of different sites to come forward.
606	Lower business rates and better access to the areas that are too be targeted	Increased access to employment sites	One of the specific objectives of the Deposit LDP is to “Promote accessibility for all by supporting the transport hierarchy (set out in PPW) that prioritises walking and cycling (active travel), then public transport and finally motor vehicles. New development should be located and designed in accordance with this hierarchy to prioritise the use of sustainable transport, reduce related airborne pollution, reduce the need to travel and reduce the dependency on private vehicles.” (See Appendix 1 – Deposit LDP, page 35, OBJ 2f). Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way

			that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).
609	Prospective employers are being put off relocating to Bridgend, due to the absence of the "proposed" link road scheme in Newport, as the congestion in Brynglas Tunnels makes it impossible to try to run transport from Bridgend/Cardiff areas or further west, to England. Until the Welsh Assembly Ministers realise this (which they refuse to do), there will be very little chance of attracting new major employers to this area. This means that there will not be any new jobs created here. People need work in order to afford to buy and run their homes, so this is all a domino effect. Pressure needs to be put onto WAG to rethink their decisions. Too much time is lost in traffic hold ups. Time is money. Time lost is money lost. Better road links for transport will ensure manufacturers will come here and provide jobs. No road links, no jobs.	Concern over job creation due to poor transport infrastructure	<p>Comments noted.</p> <p>With regards to wider regional transport issue, this is outside of the scope of the Replacement LDP. However, the Deposit Plan recognises that Bridgend County Borough plays an important role in the development and economic growth of the South East Wales region. The Council is working alongside local authorities of the Cardiff Capital Region (CCR) to tackle issues such as worklessness and poor transportation links. The 'Cardiff Capital Region City Deal' aims to build on the region's sectoral strengths and will provide opportunities to tackle barriers to economic growth by: improving transport connectivity; increasing skill levels still further; supporting people into work; and giving businesses the support they need to innovate and grow. Key projects include the delivery of the South East Wales Metro and modernisation of the Valleys lines.</p>
615	I fail to see how building houses will attract more jobs to the area, apart from the construction industry workers who will be building the houses, who will probably be brought in from outside the Borough anyway.	Queries link between housing and employment growth	The Mid Growth Option pursued by the Replacement LDP (See Appendix 42 – Background Paper 2 – Strategic Growth Options) would incite sustainable levels of development that would meet the needs of newly forming households and lead to more established households both moving into and remaining within the County Borough. The more recent trend-based levels of growth (above the baseline) would also result in less outward migration across other economically active age groups. These phenomena would counter-balance the naturally ageing population in Bridgend and provide more scope to incite job creation. Areas identified as suitable to accommodate housing growth would attract skilled workforces within their growing populations and thereby act as alluring bases for new employers to consider moving into or expanding within. The Mid Growth Option would enable sustainable economic growth in the County Borough in accordance with the proposed strategic policies. It would notably help to achieve a better balance between the location of employment provision and housing, facilitate delivery of job opportunities and provide a realistic level and variety of employment land (refer to Appendices 14 & 15 Economic Evidence Base Study & Update). This level of provision would help maintain an accessible, long term supply of local employment land, which is key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region City Deal. This would also enable transit orientated development grounded in placemaking principles, consistent with the objectives of both Future Wales and Planning Policy Wales. In addition, this level of growth would capitalise upon existing service and employment facilities, thus inducing a local multiplier effect to increase revenue for and therefore vitality of local businesses and services. Simultaneously, residents would be able to benefit from sustainable access to service centres and public transport links, helping minimise additional traffic congestion by improving active travel infrastructure and reducing car dependencies. Development of this scale and nature would contribute towards several strategic aims of the revised Plan that seek to support the viability of town and district centres, build a more self-reliant economy and deliver accessible well-connected neighbourhoods. It would also promote a 'town centre first' approach in accordance with national policy.

			<p>The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.</p> <p>The Growth Strategy can be succinctly explained by the acronym 'CARM', which summarises the Strategy's intentions to Counter-balance the ageing population by attracting skilled, economically active households, Retaining skilled, economically active households and rendering the County Borough a Magnet for employers to expand within or move into.</p>
622	Lower council tax, every one must pay something towards local services even if they cant be bothered to get a job, every one must pay council tax to live in this area!	No changes	<p>Comments noted.</p> <p>The scope of the LDP does not extend to Council Tax.</p>
657	Grow local employment opportunities drive businesses from outside wales you invest in the area. Get back to when the Sony factories were fully functioning in Bridgend	No changes – need to attract more outside investment	<p>Comments noted.</p> <p>The Replacement LDP Growth Strategy demonstrates higher underlying population growth in the 20-44 year age bands over the plan period than previously envisaged, with a correspondingly higher growth in the youngest age-ranges, 0-14. The higher proportion of growth in these age-groups (than projected at Preferred Strategy stage) is particularly important when considering the link between Bridgend's population change and the size and profile of its resident labour force. Demographic analysis and forecasts of economic activity estimate that this level of growth could now support up to 7,500 jobs over the plan period (i.e. 500 jobs per annum).</p> <p>The level of planned growth will provide a sustained and enhanced labour force, comprising skilled, established households, thus ensuring that Bridgend County Borough continues to be a desirable prospect for employers to move into or expand within. This in turn will stimulate economic growth and enhance employment opportunities for local people. The 2019 Economic Evidence Base Study (Appendix 14) and 2021 Update (Appendix 15) have analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of PPW and TAN 23, justified further in the Employment Background Paper (See Appendix 47), and set out in Policy SP11.</p>
669	Save the Coity graveyard	No changes	<p>Comments noted.</p> <p>No candidate site submission was received for the land known as Coity Graveyard. The settlement boundary currently passes through the middle of the site, so part of the land is considered to be in the countryside. The Settlement Boundary Review (See Appendix 38) undertaken to support the preparation of the Replacement LDP does not propose altering the settlement boundary in this location.</p>
692	hopes this works as we have lost a lot of big companies from the area as well as new bids for new companies to locate here	Support for Strategy	Comments noted.

			community-based regeneration and are therefore designated as Regeneration Areas in recognition of the fact that a range of approaches are required to incite community investment opportunities.
769	Too high level for comments, public need an appropriate consultation...not this	Concern over Public Consultation	<p>It is the view of the Council that the overall objectives of the Community Involvement Scheme (CIS) as originally set out in the approved Delivery Agreement (See Appendix 5), have been met. It is also considered that the LDP has been prepared in accordance with the LDP 'Preparation Requirements' set out in the Development Plans Manual (Edition 3).</p> <p>The Council previously consulted the public on the Preferred Strategy which was held from 30th September to 8th November 2019. Following the public consultation period the Council was required to consider all representations made in accordance with LDP Regulation 16(2) before determining the content of the deposit LDP. As such the Council drafted an initial Consultation Report (See Appendix 8 – Preferred Strategy & Initial Consultation Report) for publishing. This report was subsequently signed off by members of Council.</p> <p>As part of Stage 4 of the Delivery Agreement, the Council was required to undertake Deposit public consultation for a statutory period of 6 weeks, however the Council made an allowance for 8 weeks in order to maximise public participation. This was to ensure a range of views could be considered as part of a process of building a wide consensus on the Replacement LDP's strategy and policies. A number of consultation methods were used to ensure efficient and effective consultation and participation, in accordance with the CIS. These methods included:</p> <ul style="list-style-type: none"> • A Legal Notice was placed within the Glamorgan Gazette on 3rd June 2021 • The package of consultation documents were made available online via Bridgend County Borough Council's Website. Respondents were able to complete an electronic survey online to make a formal representation. • Printed reference copies were placed within Council buildings, including every library in the County Borough (fixed and mobile), subject to social distancing guidelines. The reference copies were also available to view at the Council's Civic Offices, by appointment only as the offices had not re-opened to the public due to the pandemic. Hard copies of the survey form were also made available at these locations for members of the public to complete by hand. • Dissemination of hard copies of information to individuals. Members of the public were able to request a copy of the survey by post to complete by hand (free of charge). There was a £25 charge for a hard copy of the whole Deposit Plan to cover printing and postage costs for such a large document. • Every individual and organisation on the LDP Consultation Database was notified by letter or email to inform them of the availability of the Deposit Consultation. Approximately 500 representors were contacted, provided with details of how to access the package of consultation documents and how to respond. As the consultation progressed, additional representors were informed of and added to the database upon request. • Planning Aid Wales were commissioned by the Council to run remote engagement events for all Town and Community Councils in the County Borough. • A comprehensive social media plan was devised. A series of social media posts were released periodically on Facebook, LinkedIn and Twitter. They drew attention to different thematic areas / parts of the County Borough throughout the consultation period. • Planning Officers have presented the consultation remotely to established working groups, including the Bridgend Community Cohesion and Equalities Forum and Youth Forum. • In place of face to face public drop-in sessions, representors were able to book one-to-one telephone appointments with planning officers to discuss any queries/concerns they may have had. • Posters were sent to all Town and Community Councils to display on their notice boards.

			<p>The Plan has to be prepared in the context of national legislation and guidance and has to be informed by an evidence base comprising of background papers and other technical documents. The written statement has been written with the aim of being understandable and not too technical or jargonistic but its content must reflect the fact that it is a land use plan. The Plan has been accompanied by an easy read summary leaflet, and the opportunity for telephone calls on an appointment basis where Officers were on hand to help talk interested persons through the Plan, its policies and proposals and how to comment. All Local Development Plan documents were available in main libraries throughout the County Borough in addition to the Civic Offices via appointment. Guides on how to comment and register were available online. Additionally, the phone lines were manned between the hours of 9am-5pm weekdays to provide assistance. The Local Development Plan has to be written in a particular style to meet the guidance set out in the LDP regulations manual.</p>
770	There are so many empty premises in the towns of Bridgend Borough that would benefit from this approach, that I fail to see the reason for building any more	Concern over amount of empty premises	<p>Comments noted.</p> <p>The thrust of the Replacement LDP's economic strategy is to 'create productive and enterprising places' by providing sufficient employment land and a variety of sites to support a diversity of employment opportunities, achieving:</p> <ul style="list-style-type: none"> • new and better-paid jobs for existing and future generations of residents; and • a better balance between the location of jobs and housing, which will reduce the need to travel and promote sustainable growth <p>The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed the land best suited to meet employment need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper (see Appendix 47). Consequently, the sites that make up the Employment Land Strategy of the Deposit LDP largely consist of existing employment allocations and vacant land that forms part of established employment sites that have a realistic prospect of contributing to future supply. This approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth. It is encapsulated in Policy SP11 – Employment Land Supply, which is supported by Policy ENT1 which allocates new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business premises and employment sites, thus enabling a range of different sites to come forward.</p>
776	All in favour of employment strategies properly thought out and appropriate to the area.	Support Employment Strategy	Comment noted.
438	working with employers to increase local employment and for an increase in a work life balance.	Support increased employment opportunities	<p>Comments noted.</p> <p>The thrust of the Replacement LDP's economic strategy is to 'create productive and enterprising places' by providing sufficient employment land and a variety of sites to support a diversity of employment opportunities, achieving:</p> <ul style="list-style-type: none"> • new and better-paid jobs for existing and future generations of residents; and • a better balance between the location of jobs and housing, which will reduce the need to travel and promote sustainable growth <p>The Mid Growth Option pursued by the Replacement LDP (See Appendix 42 – Background Paper 2 – Strategic Growth Options) would incite sustainable levels of development that would meet the needs of newly forming</p>

			<p>households and lead to more established households both moving into and remaining within the County Borough. Areas identified as suitable to accommodate housing growth would attract skilled workforces within their growing populations and thereby act as alluring bases for new employers to consider moving into or expanding within. The Mid Growth Option would enable sustainable economic growth in the County Borough in accordance with the proposed strategic policies. It would notably help to achieve a better balance between the location of employment provision and housing, facilitate delivery of job opportunities and provide a realistic level and variety of employment land (refer to Appendices 14 & 15 Economic Evidence Base Study & Update). This level of provision would help maintain an accessible, long term supply of local employment land, which is key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region City Deal. This would also enable transit orientated development grounded in placemaking principles, consistent with the objectives of both Future Wales and Planning Policy Wales. In addition, this level of growth would capitalise upon existing service and employment facilities, thus inducing a local multiplier effect to increase revenue for and therefore vitality of local businesses and services. Simultaneously, residents would be able to benefit from sustainable access to service centres and public transport links, helping minimise additional traffic congestion by improving active travel infrastructure and reducing car dependencies. Development of this scale and nature would contribute towards several strategic aims of the revised Plan that seek to support the viability of town and district centres, build a more self-reliant economy and deliver accessible well-connected neighbourhoods. It would also promote a 'town centre first' approach in accordance with national policy.</p>
786	<p>Historically work has come first and housing, if the work is sufficient, second. Where, what and how? our industrial estates are run down and look like ghost towns.</p>	<p>Concern over lack of detail</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence-based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace-based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>

676	Economic growth should be concentrated on existing and brown field areas	Supports brownfield development	The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed the land best suited to meet employment need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper (see Appendix 47). Consequently, the sites that make up the Employment Land Strategy of the Deposit LDP largely consist of existing employment allocations and vacant land that forms part of established employment sites that have a realistic prospect of contributing to future supply. This approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth. It is encapsulated in Policy SP11 – Employment Land Supply, which is supported by Policy ENT1 which allocates new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business premises and employment sites, thus enabling a range of different sites to come forward.
792	Local people must be ready to reskill and train and the strategy should have a mix of small businesses support and larger enterprises, BUT we need to encourage new activities not just old ones.	Support for balanced portfolio of job opportunities	<p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in Policy SP11.</p> <p>Policy ENT1 supports Policy SP11 by allocating new employment land for development. Policy ENT2 supports Policy SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward. This dual approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth.</p>
880	Just to say sustainable seems to be getting overused in your justifications.	No changes	Comments noted.
954	Stop the discrimination towards disabled people that ALL employers in Bridgend do. we got more chance getting a job if we are a x con then if we are disabled	Concerned over job opportunities for disabled people	<p>Comments noted.</p> <p>The LDP seeks to direct development to sustainable locations which are accessible by a range of transport means including public transport. Policy SP3 demands a high quality of design incorporating equality of access in all development proposals. Policy SP5 seeks to promote connectivity for all by maximising opportunities for active travel routes, including those contained within Existing Route Maps and future proposals detailed within the Integrated Network Maps. Well-connected developments will assist in promoting the improvement of health and well-being by encouraging people to adopt healthier and active lifestyles, whilst also contributing to the creation of a successful place.</p>
960	We are coming out of a pandemic following 10 years of austerity. the LDP does not adequately make a case that a plethora of employment provision and investment will flock to the area. We have seen what has happened with ford and Ineos amongst others. There's some scope in developing	Concern over empty premises and ability to attract investment	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence-based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate

	<p>the foundational economy, social enterprise and small scale employment and therefore the further development and upgrading of enterprise parks would be beneficial, but there is a need to be realistic with what can be achieved, rather than investing in white elephants. there are masses of empty warehouses and units on a number of industrial estates going to rack and ruin - have a strategy to bring those back into use.</p>		<p>response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.</p> <p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace-based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. This will enable a range of different sites to come forward.</p>
969	Yes, but how?	No changes – queries how strategy will be implemented	<p>In order to achieve the Vision and Objectives of the LDP, the Council will follow a Regeneration and Sustainable Growth Strategy. This will provide the framework to help realise the regeneration priorities of the Council, whilst also apportioning sustainable growth towards existing settlements that demonstrate strong employment, service and transportation functions. This dual faceted approach seeks to broadly balance housing, economic development, connectivity, social needs and environmental protection and enhancement to allow the County Borough to prosper, whilst contributing to the success of the Cardiff Capital Region and Swansea Bay Region. This has directly informed and resulted in the formulation of Strategic Policy (SP) 1 below, which outlines how the LDP will make provision to deliver the Regeneration and Sustainable Growth Strategy between 2018- 2033.</p> <p>This LDP is based on a balanced and sustainable level of economic growth that will facilitate the continued transformation of the County Borough into a network of safe, healthy and inclusive communities that connect more widely with the Cardiff Capital Region and Swansea Bay Region. The proposed growth level of 505 dwellings per annum is derived from a POPGROUP Scenario that Uses an ONS 2019 Mid-Year Estimate base year and calibrates its migration assumptions from a 6-year historical period (2013/14–2018/19). This period witnessed sustainable population growth, in part linked to the number of dwelling completions across the County Borough, which the Replacement LDP seeks to continue.</p> <p>Maintaining this trajectory will lead to more established households (particularly around the 35-44 age group) both remaining within and moving into the County Borough, coupled with less outward migration across other economically active age groups. This will encourage a more youthful, skilled population base to counter-balance the ageing population, resulting in an overall population increase of 9.4% or 13,681 people over the plan period. This level of growth will also enable delivery of 1,977 affordable homes, thereby maximising delivery in combination with other sources of affordable housing supply in the context of plan-wide viability. This Growth Strategy is deemed the most appropriate, sustainable means to deliver the LDP Vision and Objectives as justified within the Strategic Growth Options Background Paper. All reasonable alternatives have also been duly assessed under the SA process.</p>

			<p>The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.</p> <p>The Growth Strategy can be succinctly explained by the acronym 'CARM', which summarises the Strategy's intentions to Counter-balance the ageing population by attracting skilled, economically active households, Retaining skilled, economically active households and rendering the County Borough a Magnet for employers to expand within or move into.</p>
594	Bridgend borough has more than enough homes to currently supply all local industries, what we don't need is to concrete over our green space to accommodate workers for Cardiff - Cardiff has plenty availability of land on its boundaries it can use	Opposed to greenfield development and out commuting	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>This Growth Option would provide significant scope to deliver necessary infrastructure and complement existing centres by linking new homes to jobs and services via sustainable, multi-modal forms of transport. This will prove key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region. This Growth Option is still therefore considered optimal to deliver against the full range of issues the replacement Plan is seeking to address and enable realisation of all four Strategic Objectives. It will enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, minimise out-commuting, support existing settlements and maximise viable affordable housing delivery.</p> <p>In addition, this Growth Option would provide significant scope to deliver necessary infrastructure and complement existing centres by linking new homes to jobs and services via sustainable, multi-modal forms of transport. This will prove key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region. This Growth Option is still therefore considered optimal to deliver against the full range of issues the replacement Plan is seeking to address and enable realisation of all four Strategic Objectives. It will enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, minimise out-commuting, support existing settlements and maximise viable affordable housing delivery</p>
988	It would be nice to have a huge range of jobs, to create a more varied community.	Supports creation of more job opportunities	<p>Comments noted.</p> <p>The Employment Land Supply of the Replacement LDP seeks to provide a balanced portfolio of sites that will attract employers from various different sectors.</p>
102 3	Most of the development is planned around housing.....employment opportunities are small.... Do not agree with these plans	Queries link between housing and employment growth	In order to achieve the Vision and Objectives of the LDP, the Council will follow a Regeneration and Sustainable Growth Strategy. This will provide the framework to help realise the regeneration priorities of the Council, whilst also apportioning sustainable growth towards existing settlements that demonstrate strong employment, service and transportation functions. This dual faceted approach seeks to broadly balance housing, economic

			<p>development, connectivity, social needs and environmental protection and enhancement to allow the County Borough to prosper, whilst contributing to the success of the Cardiff Capital Region and Swansea Bay Region. This has directly informed and resulted in the formulation of Policy SP1, which outlines how the LDP will make provision to deliver the Regeneration and Sustainable Growth Strategy between 2018- 2033.</p> <p>This LDP is based on a balanced and sustainable level of economic growth that will facilitate the continued transformation of the County Borough into a network of safe, healthy and inclusive communities that connect more widely with the Cardiff Capital Region and Swansea Bay Region. 103 3	The key has to be delivering the metro, transport links from rural areas to employment areas remain very poor and unreliable, also the availability of electric vehicle charging ports is sparse	Supports implementation of South Wales Metro	Bridgend County Borough Council forms part of the Cardiff Capital Region City Deal (CCRCD). This is a 20 year / £1.28 billion investment programme which aims to achieve a 5% uplift in the Region's GVA by delivering a range of programmes to increase connectivity, improve physical and digital infrastructure, as well as regional business governance. The Industrial and Economic Plan has been developed by CCR Economic Growth Partnership to address the priorities facing the region. The Plan promotes global connectivity through investment in best in class transport systems, housing, digital infrastructure, and employable skills in order to fulfil its objectives of job creation, improved productivity and the leveraging of evergreen investment. Key to the success of the CCR Economic Plan is the delivery of the South Wales Metro, which the BCBC fully supports.
104 2	invest in the jobs and infrastructure BEFORE you build any more houses!!	Concerned over infrastructure delivery	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate

			<p>response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>This Growth Option would provide significant scope to deliver necessary infrastructure and complement existing centres by linking new homes to jobs and services via sustainable, multi-modal forms of transport. It will enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, minimise out-commuting, support existing settlements and maximise viable affordable housing delivery.</p> <p>In addition, this Growth Option would provide significant scope to deliver necessary infrastructure and complement existing centres by linking new homes to jobs and services via sustainable, multi-modal forms of transport. This will prove key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region. This Growth Option is still therefore considered optimal to deliver against the full range of issues the replacement Plan is seeking to address and enable realisation of all four Strategic Objectives. It will enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, minimise out-commuting, support existing settlements and maximise viable affordable housing delivery</p>
104 7	What about movement of goods when road system unable to cope with increase on already crowded highways	Concerned over transport infrastructure	<p>The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore, Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p>
106 9	How will they be encouraged to come to the area? Will this result in higher council tax?	Concerned over ability to attract investment	<p>The Mid Growth Option pursued by the Replacement LDP (See Appendix 42 – Background Paper 2 – Strategic Growth Options) would incite sustainable levels of development that would meet the needs of newly forming households and lead to more established households both moving into and remaining within the County Borough. The more recent trend-based levels of growth (above the baseline) would also result in less outward</p>

			<p>migration across other economically active age groups. These phenomena would counter-balance the naturally ageing population in Bridgend and provide more scope to incite job creation. Areas identified as suitable to accommodate housing growth would attract skilled workforces within their growing populations and thereby act as alluring bases for new employers to consider moving into or expanding within. The Mid Growth Option would enable sustainable economic growth in the County Borough in accordance with the proposed strategic policies. It would notably help to achieve a better balance between the location of employment provision and housing, facilitate delivery of job opportunities and provide a realistic level and variety of employment land (refer to Appendices 14 & 15 Economic Evidence Base Study & Update). This level of provision would help maintain an accessible, long term supply of local employment land, which is key to creating productive and enterprising places, whilst also helping deliver the ambitions of the Cardiff Capital Region City Deal. This would also enable transit orientated development grounded in placemaking principles, consistent with the objectives of both Future Wales and Planning Policy Wales. In addition, this level of growth would capitalise upon existing service and employment facilities, thus inducing a local multiplier effect to increase revenue for and therefore vitality of local businesses and services. Simultaneously, residents would be able to benefit from sustainable access to service centres and public transport links, helping minimise additional traffic congestion by improving active travel infrastructure and reducing car dependencies. Development of this scale and nature would contribute towards several strategic aims of the revised Plan that seek to support the viability of town and district centres, build a more self-reliant economy and deliver accessible well-connected neighbourhoods. It would also promote a 'town centre first' approach in accordance with national policy.</p> <p>The projected increase in the working age population and the linked dwelling requirement underpinning this LDP will provide significant scope for residents to live and work in the area, supporting growth of up to 500 jobs per annum. The planned level of housing growth is neither constrained in a manner that could frustrate economic development or promoted in such a way as to encourage inward commuting. Rather, the underlying projection promotes sustainable forms of growth that will help minimise the need for out-commuting and promote more self-contained, inter-connected communities in accordance with the LDP Vision. This level of growth is considered most conducive to achieving an equilibrium between the number of homes provided and the job opportunities expected, a balance that is required by PPW.</p> <p>The Growth Strategy can be succinctly explained by the acronym 'CARM', which summarises the Strategy's intentions to Counter-balance the ageing population by attracting skilled, economically active households, Retaining skilled, economically active households and rendering the County Borough a Magnet for employers to expand within or move into.</p>
1070	I accept economic growth in the right and appropriate locations such as industrial estates which have been earmarked for certain industries.	Supports protection of employment land	The 2019 Economic Evidence Base Study (EBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed the land best suited to meet employment need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper (see Appendix 47). Consequently, the sites that make up the Employment Land Strategy of the Deposit LDP largely consist of existing employment allocations and vacant land that forms part of established employment sites that have a realistic prospect of contributing to future supply. This approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth. It is encapsulated in Policy SP11 – Employment Land Supply, which is supported by Policy ENT1 which allocates new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business premises and employment sites, thus enabling a range of different sites to come forward.
1135	More local jobs is always good	Supports job creation	Comments noted.

121 4	Supporting self-employed and small businesses will meet all the aims of your strategy whilst supporting local people and being good for the environment.	Supports local job and business growth	<p>The 2019 Economic Evidence Base Study (EESB) (See Appendix 14) and 2021 Update (See Appendix 15) analysed the land best suited to meet employment need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper (see Appendix 47). Consequently, the sites that make up the Employment Land Strategy of the Deposit LDP largely consist of existing employment allocations and vacant land that forms part of established employment sites that have a realistic prospect of contributing to future supply. This approach is felt to be the most appropriate to facilitate opportunities for economic growth by directing employment generating development to the most appropriate and sustainable locations, supporting expansion of existing businesses and ensuring strong spatial alignment between housing and employment growth.</p> <p>The Employment Land Strategy is encapsulated in Policy SP11 – Employment Land Supply, which is supported by Policy ENT1 which allocates new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business premises and employment sites, thus allowing existing businesses to grow and create the conditions whereby job opportunities could flourish.</p>
553	There will not be a plethora of employment generated by you destroying green space and building too many houses on an already struggling borough. You are lying by even putting this claim on paper.	Concerns relating to loss of green space and employment.	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough’s demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth. Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EESB) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11. Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p> <p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough’s environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See</p>

			<p>Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC’s. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
558	This should not be done you are taking to much green space away	Concerns relating to loss of green space.	<p>The Strategy acknowledges that the County Borough has a rich and varied biodiversity with a broad range of species, habitats and unique, rich landscapes. Policies within the Deposit Plan have been refreshed and updated from the existing LDP and will continue to protect the county borough’s environment in line with national planning policy and the Environment Act 2016. These policies cover development in the countryside, special landscape areas, local / regional nature conservation sites, trees, hedgerows and development, green infrastructure, nature conservation and natural resources protection and public health.</p> <p>As part of the technical supporting evidence base accompanying the Deposit Plan, the Council has undertaken an updated detailed audit of existing outdoor sports and children’s playspace across the County Borough (See Appendix 22: Outdoor Sport and Children’s Play Space Audit (2021)). Its findings can be used as means of justifying the provision of new facilities and/or remedying local deficiencies in provision. It can also be used as means of safeguarding and enhancing existing facilities as appropriate.</p> <p>Additionally, the Council has undertaken a Green Infrastructure Assessment (See Appendix 23) to guide and shape the planning and delivery of green infrastructure throughout the County Borough. The assessment summaries the findings of the detailed ‘audit’ of the provision of Outdoor Sports and Children’s Playing Space within the County Borough of which is endorsed by Fields in Trust (FIT), whilst also adopting a holistic approach to include green infrastructure assets (such as allotments, cemeteries, woodlands, broad habitats) and the Integrated Network Maps. As such the assessment will provide a mechanism to ensure green infrastructure forms an integral and significant part of development and wider infrastructure proposals.</p> <p>Development proposals including strategic site allocations will be expected to maintain, protect and enhance Bridgend’s green infrastructure network and ensuring that individual green assets are retained wherever possible and integrated into any new development.</p> <p>In terms of Strategic Development Sites, Policies PLA1-PLA5 detail the site specific requirements including masterplan development principles and development requirements. Such requirements will ensure that sites retain and provide suitable buffers to habitats, particularly hedgerows, trees (including Ancient and/or Semi-Ancient Woodland), and SINC’s. Additionally, green infrastructure and outdoor recreation facilities will be required to be delivered in accordance with Policy COM10 and Outdoor Recreation Facilities and New Housing Development Supplementary Planning Guidance.</p>
559	what is the council doing to encourage big business as this is a major plan which will fail at the first hurdle. We have lost big	Comments relating to employment and business.	<p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households</p>

	<p>companies throughout the years. so more must be done</p>		<p>within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11. Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
561	<p>Assuming 'established households' refer to families and households with more than one occupant, the skilled workforces start with access to education and employment. Appropriate and sustainable locations are logically areas that would benefit from development, and have the means to support the future impact on services. Services must be local to the residents, otherwise they impact on traffic and movement within and outside of the communities. Support for rural enterprises would be welcomed, as recent developments appear to be focused around Bridgend town. Again, with the choices of these sites for development, the impact of losing local green spaces for employees and residents must be considered and brownfield sites favoured, to minimise this loss.</p>	<p>Concerns relating to employment and loss of green space.</p>	<p>Over 30% of the County Borough's population is projected to be aged 60+ by 2033. 446	With affluent families and good employment prospects come children who need adequate school places and with each household having one to two cars minimum in each household we need adequate roads. We do not need increased traffic passing through Laleston village to access the A48. It already divides the village in half and traffic is increasing all the time.	Comments relating to infrastructure and traffic.	<p>Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. Such requirements include masterplan development principles and development requirements all of which seek to contribute and address the identified key issues and drivers identified through the Replacement LDP preparation process. This will be facilitated through the provision of affordable housing, on-site education provision, public open space and active travel provision.</p> <p>Development of this scale is necessary to create sustainable communities that will incorporate a mix of complementary uses and deliver improvements to existing infrastructure and/or provide new supporting infrastructure. The latter factor is particularly notable given the school capacity issues across the County Borough and the need for new strategic sites to be significant enough in scale to support provision of a new primary school as a minimum.</p> <p>In terms of supporting infrastructure, an Infrastructure Delivery Plan (IDP) has been produced (See Appendix 37). The IDP provides a single schedule of all necessary infrastructure without which the development of allocated sites for the anticipated quantum of proposed housing/employment uses within the plan period could not proceed. Such infrastructure includes transport, education, health, environmental management, utilities in addition to community and cultural infrastructure.</p>

			<p>Regarding traffic, the Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend's historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
796	Housing needs to be within easy (without requiring people to drive) access to employment opportunities.	Comments relating to housing proximity to employment opportunities.	<p>Comments noted. Policies PLA1-PLA5 (See Deposit Plan – Page 62) detail the site-specific requirements for the mixed-use Strategic Development Sites in Regeneration Growth Areas and Sustainable Growth Areas. This will enable a range of different sites to come forward.</p>
991	<p>PLA 2 Sustainable Growth Area Island Farm. This allocation seems to be a historic one and has certainly been included in various local plans since the days of Mid Glamorgan County Council. Is this not outdated now? Employment sites may well be about to experience dramatic changes in demand due to home working. The time has come to reassess this site and recognise its historic importance and tourist potential</p>	<p>Concerns relating to PLA2 – Island Farm and its historic importance.</p>	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth, support existing settlements and maximise viable affordable housing delivery.</p> <p>The distribution of growth is further evaluated and justified in the Spatial Strategy Options Background Paper (See Appendix 43 – Background Paper 3). The strategy prioritises the development of land within or on the periphery of sustainable urban areas, primarily on previously developed brownfield sites. It continues to focus on the delivery of the brownfield regeneration allocations identified in the existing LDP, hence, Porthcawl, Maesteg and the Llynfi Valley are still denoted as regeneration priorities through their designation as Regeneration Growth Areas. The ongoing commitment to brownfield development opportunities within these settlements accords with the site-search sequence outlined in Planning Policy Wales and seeks to minimise developmental pressure on Best and Most Versatile (BMV) agricultural land. However, given the existing LDP's success in delivering development on brownfield land in other settlements (notably Bridgend and the Valleys Gateway), there are limited further brownfield regeneration opportunities remaining. Additional viable and deliverable sites (including some greenfield sites) are therefore required to implement SP1, deliver affordable housing in high need areas and ensure the County Borough's future housing requirements can be realised. As documented within the SA Report and Spatial Strategy Options Background Paper, the majority of existing, viable, brownfield regeneration sites have recently been delivered under the existing LDP or are committed and expected to come forward within the next few years. However, remaining viable opportunities on previously</p>

			developed land are exhausted, therefore some greenfield sites are required in a sustainable manner through complementary allocations on the edge of existing settlements. Identification of appropriate Sustainable Urban Extensions has been undertaken in accordance with the Site Search Sequence and other requirements set out in Planning Policy Wales, as documented in supporting evidence to the Plan. This includes the Candidate Site Assessment, Spatial Strategy Options Background Paper, Housing Trajectory Background Paper and Minimising the Loss of BMV Agricultural Land Background Paper. The rationale for the proposed allocations within the Deposit Plan is clearly outlined in the Candidate Site Assessment. Without exception, all proposed sites are supported by a large body of technical and viability evidence to demonstrate their deliverability.

100 9	There are no "strategic employment sites" in Pencoed yet the council propose to build 700 homes here. The town will become a true commuter village, taking all the money into neighbouring cities/larger towns, rather than allowing businesses to develop within the town.	There is no strategic employment site in Pencoed	Pencoed Technology Park, Pencoed (SP11 (1b)) - Pencoed Technology Park is also owned by Welsh Government. The site straddles the eastern administrative boundary of Bridgend and Rhondda Cynon Taf. The site is located next to Junction 35 of the M4 east of Bridgend, with good proximity to public transport facilities, particularly at Pencoed Railway Station. It is identified as the focus of High Quality Life Sciences and manufacturing and is already the home of a number of high profile investments. Substantial infrastructure is in place, including 'road stubs' to undeveloped parcels, including the land within Bridgend's administrative area, and the site is considered to be immediately available for development. A total of 5.4ha of employment land currently remain at the Technology Park, representing a highly attractive proposition for development.
108 7	What employment exactly? Do you mean the builders? So temporary jobs only? Any big companies coming our way?	Concerns regarding employment	The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. This has considered how the County Borough's demographic situation is likely to change from 2018-2033 and informed the most appropriate response for the Replacement LDP. As such the Replacement LDP identifies an appropriate plan requirement to enable a balanced level of housing and employment provision that will achieve sustainable patterns of growth.

			<p>Over 30% of the County Borough’s population is projected to be aged 60+ by 2033. With absolute and relative growth across this age group, there is likely to be a broad reduction in local economic activity rates if the Plan does not facilitate sustainable levels of economic growth to offset this phenomenon. The Replacement LDP therefore seeks to deliver sustainable forms of growth that will attract and retain economically active households within the County Borough. As justified within the Strategic Growth Options Background Paper, the Regeneration and Sustainable Growth Strategy is largely driven by households within the 35-44 age group. This growth is projected to support an increase in people in workplace based employment over the Plan period, to be accommodated through provision of up to 7,500 additional jobs.</p> <p>A positive employment land response is necessary to achieve an equilibrium between new homes, a growing skilled labour force and job opportunities in order to stimulate the local to regional economy. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
109 1	As stated enough space and empty units on the Industrial Estates. Make them go there	Enough space and empty units on existing industrial estates	<p>The Deposit Plan has been underpinned by the identification of the most appropriate scale of economic growth and housing provision, all of which have been based upon well informed, evidence based judgements regarding need, demand and supply factors (See Appendix 42 – Background Paper 2: Preferred Strategy Strategic Growth Options). A range of growth scenarios across the whole Replacement LDP period have been analysed and discussed within the Strategic Growth Options Background Paper. The 2019 Economic Evidence Base Study (EEBS) (See Appendix 14) and 2021 Update (See Appendix 15) analysed this projected labour force boost alongside other employment trends including past take up of employment land and sector based economic forecasts. The resulting evidence base has informed the scale and distribution of employment need and the land best suited to meet that need over the plan period in the context of Planning Policy Wales and Technical Advice Note 23, justified further in the Employment Background Paper, and set out in SP11.</p> <p>Policy ENT1 supports SP11 by allocating new employment land for development. Policy ENT2 supports SP11 by safeguarding the employment function of existing business and employment sites. This will enable a range of different sites to come forward.</p>
958	A local business have been declined planning permission for four new business start up units on Pyle Industrial Estate as traffic is at its limit with the opening of the new Recycling Centre. This goes against your stated aims above , is stifling the local economy and not supporting employment. Employment sites need to be accessible	Concerns regarding employment	<p>The Replacement LDP identifies and differentiates between the sustainability of places by defining a settlement hierarchy. This has been informed by the conclusions of the Bridgend County Borough Settlement Assessment (2019, updated in 2021) (See Appendix 19), which reflects Bridgend’s historical and functional settlement pattern and seeks to achieve more sustainable places in a number of ways. The scale and type of growth apportioned to settlements is dependent upon their individual roles, functions and positions within the settlement hierarchy. This is to ensure the Replacement LDP and spatial strategy (See Appendix 43 – Background Paper 3: Spatial Strategy Options) directs the majority of growth towards areas that already benefit from good infrastructure including transport networks, services and facilities, or where additional capacity can be provided.</p> <p>Whilst developments should be encouraged in locations which reduce the need to travel and promote the use of sustainable transport, the Council recognises that any development growth will likely result in greater travel demand, and that increased traffic levels and congestion is likely to occur if appropriate mitigating transport measures and infrastructure are not delivered. Therefore a Strategic Transport Assessment (See Appendix 36) has been undertaken to consider the impact of plan proposals and help guide and inform the process of delivering land allocations by means of modelling and quantifying the transport impact of these proposals. The technical notes accompanying this assessment demonstrate that the proposed level of development detailed within the LDP can be accommodated within the BCBC Highway Network with suitable mitigation.</p> <p>Furthermore Strategic Policy 5: Sustainable Transport and Accessibility will ensure that development must be located and designed in a way that minimises the need to travel, reduces dependency on the private car and</p>

			<p>enables sustainable access to employment, education, local services and community facilities. Development will be required to deliver, or contribute towards the provision of, active travel scheme, public transport measures, road infrastructure, and other transport measures, in accordance with the Bridgend Local Transport Plan and the Bridgend Integrated Network Plan (See Appendix 29).</p> <p>Strategic site allocations identified by policies PLA1-PLA5 detail the site-specific requirements including masterplan development principles and development requirements. Such requirements include pursuing transit-orientated development that prioritises walking, cycling and public transport use, whilst reducing private motor vehicle dependency. Well-designed, safe walking and cycling routes must be incorporated throughout the site to foster community orientated, healthy walkable neighbourhoods.</p>
106 4	<p>I strongly oppose the Local Development Plan (LDP) for the Pyle/Cornelly area (PLA5: Land East of Pyle, Kenfig Hill & North Cornelly) on the following grounds: the lands are of prime agricultural status which are needed for the growing of crops for sustainable human and animal needs; the area in question is of vital importance to the heritage of Kenfig and surrounding areas. I've briefly listed the following that fall within my objections to this proposed plan. STORMY DOWN (a) Prime Agricultural Land (b) Heritage - Stormy Castle, Sturmistown (c) Heritage - Roman Road, Julia Martitima (d) Heritage - Military, RAF Stormy Down (Airfield) WWII (e) Heritage - Military, Air Crash Sites (Controlled sites under the Protection of Military Remains Act 1986) (f) Heritage - Stormy Down Settlement (deserted rural settlement) (g) Heritage - Stormy Farmhouse (h) SSSI - Site of Special Scientific Interest (located under Laleston on BCBC "Designation of Special Landscape Areas", March 2010 - https://www.bridgend.gov.uk/media/1796/designation_of_special_landscape_areas.pdf) (f) SSSI includes the quarry's at this location in addition to the geology/mineral wealth and prehistoric value of the area in general. All this would be lost forever if the proposed LDP for this area was to take effect. As I'm responsible for the Kenfig Heritage website project (documenting the heritage of the Kenfig & surrounding areas) - an online educational resource which has been formerly recognised by the National Library of Wales as "an important part of Wales' documentary heritage" which includes this particular area in question, I'm opposing the</p>	<p>Objection to Strategic Allocation PLA5: Land East of Pyle</p>	<p>Objection noted. Background Paper 15: Minimising the loss of Best and most versatile agricultural land sets out how the Local Planning Authority has considered the location and quality of agricultural land in developing the Bridgend Replacement Local Development Plan (LDP) 2018-2033. It demonstrates how the Preferred Strategy and site selection process has sought to minimise the loss of Best and Most Versatile (BMV) agricultural land when balanced against a range of other material planning considerations.</p> <p>Evidently, Land East of Pyle is a potential strategic site located at the edge of a Main Settlement (as defined by the Settlement Assessment) in a broadly viable housing market (as detailed within the Plan-Wide Viability Study) with high need for additional affordable housing (as identified by the LHMA). The original site submitted at Candidate Site Stage contains no BMV agricultural land based on Version 2 of the Predictive ALC Map. However, in order to ensure a more holistic and inclusive edge of settlement development opportunity, the site submission was expanded at Preferred Strategy Stage to include an additional significant parcel immediately to the south west. The overall proposal now constitutes two large parcels, the first encompassing 60-hectares of land to the north of the M4 and south-west of the A48, and the second being a 40-hectare parcel of land to the north and east of the A48. This revised submission presents an opportunity for significant sustainable development at the edge of a Main Settlement at a scale not matched by any other Stage 2 Candidate Site. This would enable delivery of a sustainable residential-led mixed-use scheme with approximately 2,300 market and affordable dwellings, provision of educational facilities, a local centre and associated supporting infrastructure. Expansion of the original site does mean that 8.4ha of BMV agricultural land (Grade 2 and 3a) would be lost through allocation of this more holistic sustainable urban extension according to the predicative map. However, detailed survey work undertaken by the site promoter indicates that the areas of Grade 2 and 3a as shown on Version 2 of the Predictive ALC Map are in fact Grade 3b. This has to be considered in the context of other deliverable Stage 2 Candidate Sites that are available. It is important for the Replacement LDP to acknowledge the role of this Main Settlement (as identified within the Settlement Assessment) and its potential to deliver sustainable development at a strategic scale when balanced against the potential loss of BMV agricultural land. Hence, there is considered to be an overriding need for this development to enable sustainable growth in accordance with Planning Policy Wales' placemaking principles, to contribute to affordable housing provision in a high-need area and to deliver a plethora of socio-economic benefits that will support both local employment provision and the local commercial centres. A masterplan for the site has been developed to ensure Planning Policy Wales' sustainable placemaking objectives are integrated from the outset. A suite of detailed supporting technical information has also been provided by the site promoter to evidence the deliverability and viability of the site. This development would make a meaningful contribution in terms of housing provision (affordable and market), education provision, active travel and public open space in a manner that would promote the health and well-being of local residents through 64 encouraging active lifestyles. The Candidate Site Assessment has not identified other land at this scale in lower agricultural grades. Therefore, this site is considered appropriate for allocation on this basis in accordance with the site search sequence outlined in Planning Policy Wales.</p> <p>Heritage</p>

<p>proposed LDP as outlined as it would decimate the heritage of the area in its entirety - additionally, the new Welsh government schools curriculum now includes local Welsh history; destroying areas of both natural beauty and of which is steeped in Welsh heritage would detract school visits to places of historic Welsh importance and of which goes completely against the proposals of the new Welsh schools curriculum in the main. Rob Bowen Owner/Author Kenfig - The Complete History (e-Resource) www.Kenfig.org.uk</p> <p>Further Reading</p> <ol style="list-style-type: none"> 1. Protection of Military Remains Act 1986 (Wikipedia) - https://en.wikipedia.org/wiki/Protection_of_Military_Remains_Act_1986 2. Protection of Military Remains Act 1986 (The National Archives) - https://www.legislation.gov.uk/ukpga/1986/35/contents 3. Designation of Special Landscape Areas, March 2010 (BCBC) - https://www.bridgend.gov.uk/media/1796/designation_of_special_landscape_areas.pdf 4. Stormy Down (RCAHMW, Coflein) - https://coflein.gov.uk/en/search/?term=stormy%20down 		<p>As acknowledged by Strategic Policy PLA5, the site is open and exposed to views from the north, west and locally to the east as well as views from the M4 to the south. The most sensitive parts are the three high points, upper slopes and associated minor ridges, and the steep slope to the west on the southern edge. The least sensitive area lies to the north and west on the lower slopes/flat areas, which lends itself to be the most appropriate location for the bulk of higher density development. The southern part of Parcel B is within a Special Landscape Area and the development will need to be planned sensitively to take account of this designation.</p> <p>The site itself is not subject to any ecological designations, although further wildlife and habitat surveys will need to be carried out to inform the site's potential development. Additionally, there are two SSSI's located in close proximity to the boundary of the site; the Penycastell SSSI is located to the north east and the Stormy Down SSSI is located to the south east of the site. Both are physically separated from the site by the route of the trainline and the M4 respectively. Given the need to maintain a landscape buffer between major transport routes and any proposed development, neither are considered to be a constraint to development.</p> <p>Archaeology Wales have undertaken a Desktop study which highlights standing and buried remains of potential archaeological interest. A WWII pillbox exists at the north west area of the site and there is believed to be an area of earthworks related to a 19th century (or possibly older) farmstead at the north east of the site. A 19th century tramline is also located along the northern portion of the site. The development will ensure that these remains are preserved or adequately investigated and recorded if they are disturbed or revealed as a direct result of development activities.</p> <p>The site neighbours Stormy Castle, a medieval settlement, which could extend into the site. Further work will need to be conducted to fully investigate any potential impacts and a geophysical survey of the site will need to be carried out to supplement the planning application.</p> <p>Stormy down airfield would not be negatively impacted by proposed development.</p>
